

CONTENTS

Large-eddy simulation of turbulent duct flow: heating and curvature effects J. Hébrard, O. Métais and M. Salinas-Vasquez	569
Large eddy simulation of periodically perturbed separated flow over a backward-facing step A. Dejoan and M.A. Leschziner	581
Numerical study of the instability mechanism in transitional separating–reattaching flow I.E. Abdalla and Z. Yang	593
Experimentally aided development of a turbine heat transfer prediction method A.E. Forest, A.J. White, C.C. Lai, S.M. Guo, M.L.G. Oldfield and G.D. Lock	606
On the drag reduction mechanism in a lubricated turbulent channel flow S. Solbakken and H.I. Andersson	618
Novel MILES computations for jet flows and noise P.G. Tucker	625
An experimental characterization of cross-flow cooling of air via an in-line elliptical tube array M.G. Khan, A. Fartaj and D.S.-K. Ting	636
Simulation of flow and heat transfer in the tip region of a brush seal J.W. Chew and C. Guardino	649
Numerical modeling of buoyancy-driven turbulent flows in enclosures K.J. Hsieh and F.S. Lien	659
Correlation for Nusselt number in natural convection in vertical convergent channels at uniform wall temperature by a numerical investigation A.S. Kaiser, B. Zamora and A. Viedma	671
Effect of natural convection on laser chemical vapor deposition with a stationary laser beam Y. Zhang	683
Opposing mixed convection along vertical isothermal moving bodies A. Pantokratoras	692
Acknowledgment of reviewers	697
