

CONTENTS

An experimental methodology to quantify the spray cooling event at intermittent spray impact A.L.N. Moreira, J. Carvalho and M.R.O. Panão	191
Experimental investigation of convective heat transfer of Al_2O_3 /water nanofluid in circular tube S. Zeinali Heris, M. Nasr Esfahany and S.Gh. Etemad	203
Prediction of turbulent forced convection of a nanofluid in a tube with uniform heat flux using a two phase approach A. Behzadmehr, M. Saffar-Avval and N. Galanis	211
Influence of three-dimensional wall roughness on the laminar flow in microtube H. Wang and Y. Wang	220
Vortex breakdown in a cylinder with a rotating bottom and a flat stress-free surface E. Serre and P. Bontoux	229
Three-dimensional turbulent swirling flow in a cylinder: Experiments and computations A. Gupta and R. Kumar	249
Flow and heat transfer over a rotating disk with surface roughness M.S. Yoon, J.M. Hyun and J.S. Park	262
Large eddy simulation of scalar turbulence using a new subgrid eddy diffusivity model Y. Guo, C.-X. Xu, G. Cui, Z. Zhang and L. Shao	268
On nonlinear RANS models when predicting more complex geometry room air flows A. Jouvray, P.G. Tucker and Y. Liu	275
Three-dimensional natural convection in finned cubical enclosures R.L. Frederick and S.G. Moraga	289
A note on the flow and heat transfer enhancement in a channel with built-in winglet pair S.R. Hiravennavar, E.G. Tulapurkara and G. Biswas	299
Heat transfer augmentation in a rectangular channel with a vee-shaped vortex generator A. Sohankar	306
Heat transfer augmentation in a heat exchanger tube using a baffle Nasiruddin and M.H.K. Siddiqui	318
A thermal periodic boundary condition for heating and cooling processes S.A. Mohsen Karimian and A.G. Straatman	329
