

## CONTENTS

Direct numerical simulation of turbulent heat transfer in pipe flows: Effect of Prandtl number L. Redjem-Saad, M. Ould-Rouiss and G. Lauriat	847
A double-population lattice Boltzmann method with non-uniform mesh for the simulation of natural convection in a square cavity F. Kuznik, J. Vareilles, G. Rusaouen and G. Krauss	862
Lagrangian dispersion in turbulent channel flow and its relationship to Eulerian statistics J. Luo, T. Ushijima, O. Kitoh, Z. Lu and Y. Liu	871
The thermal characteristics of a hot wire in a fluctuating freestream flow W.Z. Li, B.C. Khoo and D. Xu	882
Large-eddy simulation of three-dimensional flow around a hill-shaped obstruction with a zonal near-wall approximation F. Tessicini, N. Li and M.A. Leschziner	894
Validation of large-eddy simulation of strongly curved stationary and rotating U-duct flows K.M. Guleren and A. Turan	909
Turbine blade showerhead film cooling: Influence of hole angle and shaping Y. Lu, D. Allison and S.V. Ekkad	922
Aerodynamics and heat transfer predictions in a highly loaded turbine blade Y. Liu	932
Near-wake effects of a heat input on the vortex-shedding mechanism R. Kieft, C.C.M. Rindt and A.A. van Steenhoven	938
Effects of initial conditions on wavelet-decomposed structures in a turbulent far-wake A. Rinoshika and Y. Zhou	948
Airflow patterns in a slot-ventilated enclosure partially loaded with empty slotted boxes M. Tapsoba, J. Moureh and D. Flick	963
Natural convection in a horizontal fluid layer with a periodic array of internal square cylinders – Need for very large aspect ratio 2D domains J.R. Lee, M.Y. Ha and S. Balachandar	978
Infrared thermography investigation of local heat transfer in a plate fin and two-tube rows assembly D. Bougeard	988
Heat transfer enhancement in oscillatory flow in channel with periodically upper and lower walls mounted obstacles A. Korichi and L. Oufer	1003
Performance analysis of nanofluid-cooled microchannel heat sinks T.-H. Tsai and R. Chein	1013
Numerical study of slip flow heat transfer of non-Newtonian fluids in circular microchannels M. Barkhordari and S.Gh. Etemad	1027
Some characteristics of developing bubbly flow in a vertical mini pipe T. Hibiki, T. Hazuku, T. Takamasa and M. Ishii	1034
Flow pattern based two-phase frictional pressure drop model for horizontal tubes. Part I: Diabatic and adiabatic experimental study J. Moreno Quibén and J.R. Thome	1049

*Continued*

Flow pattern based two-phase frictional pressure drop model for horizontal tubes, Part II: New phenomenological model	
J. Moreno Quibén and J.R. Thome	1060
Turbulence modeling for flows around convex features giving rapid eddy distortion	
P.G. Tucker and Y. Liu	1073
A simplified explicit algebraic model for the Reynolds stresses	
M. Antonello and M. Masi	1092
Analysis of turbulent flow in channels roughened by two-dimensional ribs and three- dimensional blocks. Part I: Resistance	
D.N. Ryu, D.H. Choi and V.C. Patel	1098
Analysis of turbulent flow in channels roughened by two-dimensional ribs and three- dimensional blocks. Part II: Heat transfer	
D.N. Ryu, D.H. Choi and V.C. Patel	1112
Prediction of coherent vortices in an impinging jet with unsteady averaging and a simple turbulent model	
G. Le Song and M. Prud'homme	1125
Numerical analysis of shock wave interaction with a cloud of particles in a channel with bends	
P. Kosinski	1136
Numerical simulation and theoretical analysis of thermal boundary characteristics of convection heat transfer in porous media	
P.-X. Jiang and X.-C. Lu	1144
Macroscopic modeling of turbulent flow over a porous medium	
H.C. Chan, W.C. Huang, J.M. Leu and C.J. Lai	1157
Heat transfer and pressure drop characteristics of mini-fin structures	
P.-X. Jiang and R.-N. Xu	1167
The effects of axis ratio on laminar fluid flow around an elliptical cylinder	
Z. Faruquee, D.S.-K. Ting, A. Fartaj, R.M. Barron and R. Carriveau	1178
