

CONTENTS

Including Special Issue of the 5th Conference in the Turbulence,
Heat and Mass Transfer series (THMT5), Dubrovnik

Papers selected from the 5th conference in the Turbulence, Heat and Mass Transfer series

Preface	
B.E. Launder, F.W. Schmidt, K. Hanjalić, S. Jakirlić and Y. Nagano	1191
Effects of interfacial velocity boundary condition on turbulent mass transfer at high Schmidt numbers	
Y. Hasegawa and N. Kasagi	1192
DNS of passive scalar transport in turbulent channel flow at high Schmidt numbers	
F. Schwertfirm and M. Manhart	1204
Analysis of subgrid scale mixing using a hybrid LES-Monte-Carlo PDF method	
C. Olbricht, F. Hahn, A. Sadiki and J. Janicka	1215
A complete and irreducible dynamic SGS heat-flux modelling based on the strain rate tensor for large-eddy simulation of thermal convection	
B.-C. Wang, J. Yin, E. Yee and D.J. Bergstrom	1227
Temporal large-eddy simulation of unstratified and stably stratified turbulent channel flows	
A.E. Tejada-Martínez, C.E. Grosch and T.B. Gatski	1244
Direct numerical simulation of stable and unstable turbulent thermal boundary layers	
H. Hattori, T. Houra and Y. Nagano	1262
Instantaneous fluctuation velocity and skewness distributions upstream of transition onset	
D. Hernon, E.J. Walsh and D.M. McEligot	1272
Coherent fine scale eddies in turbulence transition of spatially-developing mixing layer	
Y. Wang, M. Tanahashi and T. Miyauchi	1280
DNS of heat transfer in turbulent and transitional channel flow obstructed by rectangular prisms	
F. Kawamura, Y. Seki, K. Iwamoto and H. Kawamura	1291
The effect of a single vortex generator jet on the characteristics of a turbulent boundary layer	
J. Ortmanns and C.J. Kähler	1302
Evolution of jets effusing from inclined holes into crossflow	
W. Jessen, W. Schröder and M. Klaas	1312
Experimental study of turbulent round jet flow impinging on a square cylinder laid on a flat plate	
N.-S. Kim and A. Giovannini	1327
Experimental study of an impinging jet with different swirl rates	
S.V. Alekseenko, A.V. Bilsky, V.M. Dulin and D.M. Markovich	1340
Large-eddy simulations of flow over a jet-impinged wall-mounted cube in a cross stream	
M. Popovac and K. Hanjalić	1360
Simulation of wing-body junction flows with hybrid RANS/LES methods	
S. Fu, Z. Xiao, H. Chen, Y. Zhang and J. Huang	1379

Continued

Regular papers

Flow measurements inside a heated multiple rotating cavity with axial throughflow C.A. Long, N.D.D. Miché and P.R.N. Childs	1391
Shroud heat transfer measurements inside a heated multiple rotating cavity with axial throughflow C.A. Long and P.R.N. Childs	1405
Flow produced in a conical container by a rotating endwall M.P. Escudier, J. O'Leary and R.J. Poole	1418
The low Reynolds number turbulent flow and mixing in a confined impinging jet reactor F. Schwertfirm, J. Gradl, H.C. Schwarzer, W. Peukert and M. Manhart	1429
The artificial buffer layer and the effects of forcing in hybrid LES/RANS J. Larsson, F.S. Lien and E. Yee	1443
Apparent transition behavior of widely-used turbulence models C.L. Rumsey	1460
Heat transfer enhancement in a turbulent natural convection boundary layer along a vertical flat plate T. Tsuji, T. Kajitani and T. Nishino	1472
Numerical simulation of compressible gas flow and heat transfer in a microchannel surrounded by solid media J. Zhou, Y. Zhang and J.K. Chen	1484
Temperature and particle-size dependent viscosity data for water-based nanofluids – Hysteresis phenomenon C.T. Nguyen, F. Desgranges, G. Roy, N. Galanis, T. Maré, S. Boucher and H. A. Mintsa	1492
The effect of two-way coupling and inter-particle collisions on turbulence modulation in a vertical channel flow H. Nasr and G. Ahmadi	1507
Modeling fluid and heat transport in the reactive, porous bed of downdraft (biomass) gasifier A.Kr. Sharma	1518
Three-dimensional numerical study and field synergy principle analysis of wavy fin heat exchangers with elliptic tubes Y.B. Tao, Y.L. He, Z.G. Wu and W.Q. Tao	1531
Author index to volume 28	1545
Keyword index to volume 28	1551
