

CONTENTS

Effect of hole imperfection on adiabatic film cooling effectiveness M.B. Jovanović, H.C. de Lange and A.A. van Steenhoven	377
Experimental and numerical investigation of turbulent cross-flow in a staggered tube bundle S.S. Paul, S.J. Ormiston and M.F. Tachie	387
Grouping and trapping of evaporating droplets in an oscillating gas flow D. Katoshevski, T. Shakked, S.S. Sazhin, C. Crua and M.R. Heikal	415
Modelling of high-pressure dense diesel sprays with adaptive local grid refinement S. Tonini, M. Gavaises and A. Theodorakakos	427
Simulation and measurement of 3D shear-driven thin liquid film flow in a duct H. Lan, M. Friedrich, B.F. Armaly and J.A. Drallmeier	449
A first assessment of the NEPTUNE_CFD code: Instabilities in a stratified flow comparison between the VOF method and a two-field approach Y. Bartosiewicz, J. Laviéville and J.-M. Seynhaeve	460
Experimental investigation of a circular radially deforming cylinder near wake using an infrared technique L. Menfoukh, S. Hanchi, H. Oualli, A. Bouabdellah and R. Askovic	479
Boundary layer receptivity measurements on compliant surfaces J.-C. Huang and M.W. Johnson	495
Predicting transition in two- and three-dimensional separated flows L. Cutrone, P. De Palma, G. Pascazio and M. Napolitano	504
Computational study of buoyancy effects in a laminar starting jet R.P. Satti and A.K. Agrawal	527
Numerical study of laminar fluid flow in a curved elliptic duct with internal fins P.K. Papadopoulos and P.M. Hatzikonstantinou	540
Fully developed mixed convection in horizontal and inclined tubes with uniform heat flux using nanofluid M. Akbari, A. Behzadmehr and F. Shahraki	545
Effect of nanoparticles mean diameter on mixed convection heat transfer of a nanofluid in a horizontal tube S. Mirmasoumi and A. Behzadmehr	557
