

CONTENTS

Letter from the Editors B.E. Launder	iii
Effect of coolant–mainstream blowing ratio on leading edge film cooling flow and heat transfer – LES investigation A. Rozati and D.K. Tafti	857
Experimental transport-rate budgets in complex 3-D turbulent flow near a wing/body junction S.M. Ölçmen and R.L. Simpson	874
Wall-oscillation conditions for drag reduction in turbulent channel flow P. Ricco and M. Quadrio	891
The influence of wall heating on the flow structure in the near-wall region S.T. Gajusinh and M.H. Kamran Siddiqui	903
Heat transfer with dimple/protrusion arrays in a rectangular duct with a low Reynolds number range S.D. Hwang, H.G. Kwon and H.H. Cho	916
Experimental approach and numerical prediction of a turbulent wall jet over a backward facing step N. Nait Bouda, R. Schiestel, M. Amielh, C. Rey and T. Benabid	927
An experimental study on hot round jets impinging a concave surface M. Fenot, E. Dorignac and J.-J. Vullierme	945
Influence of a synthetic jet excitation on the development of a turbulent mixing layer J.-P. Bonnet, W.L. Siauw, S. Bourgois and J. Tensi	957
Active control of a free jet using a synthetic jet D.A. Tamburello and M. Amitay	967
Active performance enhancement of spray cooling A.A. Pavlova, K. Otani and M. Amitay	985
Effect of cavitation in nozzle orifice on the diesel fuel atomization characteristics H.K. Suh and C.S. Lee	1001
Stochastic modelling of aerosol deposition for LES of 90° bend turbulent flow A.S. Berrouk and D. Laurence	1010
Experimental study of heat transfer in pulsating turbulent flow in a pipe E.A.M. Elshafei, M. Safwat Mohamed, H. Mansour and M. Sakr	1029
Hydrodynamics of gas–liquid slug flow along vertical pipes in turbulent regime— An experimental study T.S. Mayor, V. Ferreira, A.M.F.R. Pinto and J.B.L.M. Campos	1039
Onset of vortex shedding in planar shear flow past a square cylinder A. Lankadasu and S. Vengadesan	1054
Numerical study of the near wake of a circular cylinder J.G. Wissink and W. Rodi	1060
Large eddy simulation of flow around wavy cylinders at a subcritical Reynolds number K. Lam and Y.F. Lin	1071

Continued

Vortex dynamics in confined counter-current shearing flows with applications to mixing J.A.C. Humphrey, J.L. Rosales, L.A. Legendre, J. Patrick LeDuc and J.P. Landers	1089
Wavelet analysis of the surface temperature field at an air–water interface subject to moderate wind stress N.V. Scott, R.A. Handler and G.B. Smith	1103
Measurements of density profile evolution during the stably-stratified filling of an open enclosure C.M. Tarawneh and K.O. Homan	1113
Numerical and experimental investigation of laminar free convection around a thin wire: Long time scalings and assessment of numerical approach M.-C. Duluc, S. Xin, F. Lusseyran and P. Le Quéré	1125
An experimental study of the unsteady thermal flow around a thin fin on a sidewall of a differentially heated cavity F. Xu, J.C. Patterson and C. Lei	1139
Natural convection in a horizontal binary fluid layer bounded by thin porous layers Z. Alloui, M. Fekri, H. Beji and P. Vasseur	1154
Buoyancy convection in a square cavity with mutually orthogonal heat generating baffles A.K. Abdul Hakeem, S. Saravanan and P. Kandaswamy	1164
Numerical study of natural convection dominated heat transfer in a ventilated cavity: Case of forced flow playing simultaneous assisting and opposing roles A. Raji, M. Hasnaoui and A. Bahlaoui	1174
Natural convection on discrete heaters in a square enclosure with ventilation ports E. Bilgen and A. Balkaya	1182
Thermocapillary flows in liquid bridges of molten tin with small aspect ratios K. Li, B. Xun, N. Imaishi, S. Yoda and W.R. Hu	1190
Simulation of heat transfer in a ferrofluid using computational fluid dynamics technique A. Jafari, T. Tynjälä, S.M. Mousavi and P. Sarkomaa	1197
Lattice Boltzmann simulations of conjugate heat transfer in high-frequency oscillating flows F. Meng, M. Wang and Z. Li	1203
Micro-PIV and CFD characterization of flows in a microchannel: Velocity profiles, surface roughness and Poiseuille numbers G. Silva, N. Leal and V. Semiao	1211
Thermal performance of nanofluid flow in microchannels J. Li and C. Kleinstreuer	1221
