

## CONTENTS LISTS

### JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XI, No. 4

October, 1966

|   | <i>Page</i> |
|---|-------------|
| V. P. KASHKAROV and B. M. MIKHAELIAN: A laminar jet over a right circular cone  | 419         |
| E. K. KALININ and S. A. YARKHO: The effect of Reynolds and Prandtl numbers on the increase of heat transfer in tubes  | 426         |
| P. M. BRDLIK and V. K. SAVIN: Turbulent transition of a laminar boundary layer in an axi-symmetric flow past flat surfaces normal to the flow                                 | 432         |
| E. V. STEFANOV: Experimental results of non-isothermal incompressible flow in underground tubes and channels  | 438         |
| A. I. VOLKOV: Mechanical energy dissipation of a subsonic compressible flow with changed direction  | 447         |
| B. P. KONSTANTINOV and L. S. KOTOUSOV: Multistage thermal diffusion calculation in a rotation force field   | 455         |
| I. YA. SIGAL and D. A. LYUBEZNIKOV: Gas flame heat transfer with different preliminary mixing rate of gas and air   | 463         |
| D. S. KAYUMOVA: Heat transfer between combustion products and tube walls during flame propagation   | 467         |
| S. K. ASLANOV: To the flame stability theory  | 472         |
| V. S. SHKLYAR, E. A. IODKO and V. A. BLASHCHUK: On unsteady moisture transfer in capillary porous bodies  | 479         |
| V. V. KRASNIKOV and V. A. DANILOV: Drying kinetics of different materials. The calculation method of drying time  | 482         |
| A. M. GLOBUS and S. V. NERPIN: Non-isothermal moisture transfer in closed disperse systems  | 487         |
| A. G. GORELIK: On the heat-transfer mechanism in a fluidized bed  | 495         |
| I. S. ZHITOMIRSKII and L. I. DIKII: On the mathematical description of the processes controlling operation of cascade air-spouting installations                              | 503         |
| Z. R. GORBIS and G. V. MAL'TSEVA: On the non-uniformity of solid motion in packed beds in vertical rectangular ducts  | 509         |
| A. P. LYUBCHENKO, I. V. TSARINA, D. G. SHERMAN and A. S. SHUKHOV: The method of determination of temperature fields of machine element surfaces inaccessible during operation | 516         |
| E. D. VIKTOROV and E. A. CHOBAN: Steady temperature field in a notched ring   | 521         |
| A. V. KHROMOV and YU. V. LIBIN: Heat source density and the temperature field in the crystal of a ruby optical quantum generator  | 526         |
| B. N. BIRGER: Phenomenological properties of conducting systems   | 532         |
| N. V. ANTONISHIN, L. E. SIMCHENKO and G. A. SURKOV: Heat conduction differential equations for a disperse system  | 537         |
| V. V. IVANOV: Calculation of radiative cooling of fuel elements   | 542         |
| B. N. SELIVERSTOV: To the choice of a mathematical model of unsteady heat transfer with one-phase incompressible coolant  | 545         |
| <i>Shorter Communication</i>  |             |
| L. K. GUSACHENKO: To the problem of ballistic unsteady combustion rate  | 552         |
| <i>Reader's Guide</i>   |             |
| Contents List of the <i>International Journal of Heat and Mass Transfer</i> , Vol. 9, No. 7   | 555         |

# JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XII, No. 4

April, 1967

|  | <i>Page</i> |
|--|-------------|
| G. N. DUL'NEV and YU. P. ZARICHNYAK: Thermal conductivity of multicomponent mixtures   | 419         |
| R. S. MIKHAL'CHENKO, A. G. GERZHIN, N. P. PERSHIN and L. V. KLIPACH: Experimental study of thermal properties of a multilayer insulation | 426         |
| P. A. NOVIKOV and B. M. SMOLSKII: A note on the mass-transfer effect of heat transfer in sublimation in rarefied gas Couette flow        | 433         |
| V. B. LEMBERSKII and E. M. KHABAKHPASHEVA: Experimental study of laminar-turbulent transition for pure viscous fluid flow                | 440         |
| B. M. RASPOPOV: Control of some transfer processes   | 444         |
| P. P. SMYSHLYAEV: Approximate solutions of the heat-conduction equation for a two-layer slab with sublimating external surface           | 451         |
| P. P. YUSHKOV and P. G. GEITS: On the time of plate freezing   | 460         |
| L. YA. AINOLA: Variation principles for transient heat-conduction problems   | 465         |
| E. M. TYNTAREV: Peculiarities of the temperature of the heat-exchanger tube of an electronic digital computer                            | 469         |
| SH. N. PLYAT: Space temperature field of a discretely growing semi-infinite rod with heat generation                                     | 474         |
| I. G. MEEROVICH: Temperature field in multilayer systems with variable thermal properties  | 484         |
| G. M. FAIKIN: Approximate model of a heat exchanger with distributed parameters  | 491         |
| P. P. OLODOVSKII: On density distribution of adsorbed water in dispersed media   | 496         |
| P. A. PAVLOV and V. P. SKRIPOV: Vapour generation in pulse heating of liquids  | 503         |
| V. I. MUKOSEI, L. I. KHEIFETS and R. V. DZHAGATSPANYAN: Mathematical simulation of fluidized bed installations                           | 508         |
| V. V. KLIMENKO, L. A. AKOPYAN and A. N. PLANOVSKII: Particle velocity in a fluidized bed   | 515         |
| L. K. VASANOVA, YU. N. SHIMANSKII and R. V. SHIRINKIN: On the calculation of the periodic cooling of a fluidized bed                     | 523         |
| I. F. PYATKOV: Choice of the optimal infrared radiation conditions of heating grain  | 526         |

## Shorter Communications

|   |     |
|---|-----|
| G. A. AKSEL'RUD, O. M. SHAPOVALOV and G. L. STAVROSKII: Transient mass transfer in solid-liquid systems                               | 532 |
| A. A. IVASHKEVICH: The effect of the adjacent vapour generating sections of the duct on the critical heat flux in forced liquid flows | 535 |
| V. D. SOVERSHENNI: Engineering formulae for friction on permeable surface in a turbulent gas flow                                     | 538 |
| V. S. RAVIN: On effective boundary conditions in the problems of steady-state heat conduction   | 540 |

## Reader's Guide

|   |     |
|---|-----|
| Contents list of the <i>International Journal of Heat and Mass Transfer</i> , Vol. 9, No. 11, 12 (1966) | 542 |
|---|-----|

## JOURNAL OF ENGINEERING PHYSICS

*(Published in the U.S.S.R. in Russian with English abstracts)*

Volume XII, No. 5

May, 1967

Page

|   |     |
|---|-----|
| R. Z. ALIMOV: Convective mass transfer with transpiration cooling of strongly heated surface by two-phase vortex flow   | 559 |
| S. S. KUTATELADZE, N. V. VALUKINA and I. I. GOGONIN: Dependence of the critical heat flux upon the heater size for saturated liquid boiling in free convection                        | 569 |
| E. G. LEONOV, YU. P. FINAT'EV and B. S. FILATOV: Effect of the surface-active agent upon the hydraulic resistance and flow structure of a gas-liquid dispersion in a vertical annulus | 576 |
| E. A. NEPOMNYASHCHII: Particular results on kinetics of separation and mixing of disperse materials   | 583 |
| N. V. ANTONISHIN and L. E. SIMCHENKO: Electric analogy of unsteady heat transfer in a dispersed system  | 592 |
| A. P. BASKAKOV: Effect of discrete structure of "solid" phase upon heat transfer in a fluidized bed   | 599 |
| I. F. PIKUS: On relationship between moisture content and dispersed material temperature during drying in a fluidized bed   | 605 |
| A. AVOZNESENSKII and A. P. FERT: Study of the emissivity of building materials  | 610 |
| YU. G. PRAZHENNIK and A. I. STEZHENSKII: Accounting for fugacity in calculating equilibrium gas-mixture composition   | 615 |
| V. P. MERZLYAKOV: Axisymmetric problem in thermoelasticity for a hollow cylinder  | 620 |
| YA. A. KUMCHENKO and V. F. PRISNYAKOV: Solution of some heat- and mass-transfer problems by the impedance method  | 626 |
| YU. M. RUDOV and V. N. USKOV: Determination of parameters of a supersonic gas jet impinging on an inclined flat obstacle  | 633 |
| A. V. MARTYNOV and V. M. BRODYANSKII: Investigation of vortex flow parameters inside Ranque-Hilsch tube   | 639 |
| V. G. SELIVANOV and S. D. FROLOV: On the flow of a gas-liquid mixture through a geometrical nozzle with constant phase-velocity difference  | 645 |
| V. E. NAKORYAKOV: Combustion of liquid fuel drop in an acoustic field   | 650 |
| P. N. KOSTYUKOVICH: On the determination of the filtration coefficient by test pumping  | 657 |

*Shorter Communications*

|   |     |
|---|-----|
| V. V. DIL'MAN and B. B. BRANDT: Diffusion flow to a moving drop   | 662 |
| O. YA. KAZAKEVICH: Calculation of the temperature field in a channel wall of an MHD-generator with section electrodes employing EGDA-9/60 integrator  | 666 |
| YU. V. VIDIN: Transient temperature distribution in a slab with simultaneous thermal radiation and convection   | 669 |
| V. V. SHAPOVALOV: Heat transfer in laminar flow of incompressible liquid in a circular tube   | 672 |
| B. A. MERISOV, V. I. KHOTKEVICH, G. M. ZLOBINTSEV and V. V. KOZINETS: Thermal conductivity of some metals and alloys in a temperature range 4-2-273°K | 675 |

*Prominent Soviet Scientists*

|  |     |
|--|-----|
| NIKOLAI PAVLOVICH YERUGIN (To his 60th birthday) | 678 |
|--|-----|

*Criticism and Bibliography*

|  |     |
|--|-----|
| K. I. STRAKHOVICH and S. L. LURIE: Review on the book "Boundary Layer of Non-Newtonian Fluids" by Z. P. SHULMAN and B. M. BERKOVSKII | 681 |
|--|-----|

*Reader's Guide*

|   |     |
|---|-----|
| Contents list of the <i>International Journal of Heat and Mass Transfer</i> , Vol. 10, No. 1 (1967) | 683 |
| Heat and Mass Transfer Bibliography   | 685 |

# JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English Abstracts)

Volume XIII, No. 1

July, 1967

|   | <i>Page</i> |
|---|-------------|
| V. K. SHCHUKIN: Developed turbulent flow with large-scale eddies in the annular space with inner revolving cylinder   | 3           |
| L. F. KOZLOV: Transition region in calculation of the plane and axi-symmetric boundary layer  | 9           |
| U. L. RASTORGUEV and V. Z. GELLER: A new hot-wire modification of the thermal-conductivity cell for liquids and gases   | 16          |
| M. G. KAGANER and R. S. SEMENOVA: Study of thermal conductivity and thermal diffusivity of insulating powders at atmospheric pressure and in vacuum                       | 24          |
| V. A. GRUZDEV and A. I. SHUMSKAYA: Simple flow calorimeter for measurements of specific heats of gases  | 31          |
| N. N. MEDVEDEV: Measurement of temperature coefficients of glass-plastics expansion by the unsteady regime method   | 37          |
| B. L. KRIVOSHEIN and L. P. SEMENOV: Experimental study of heat transfer from a pipe-line in the ground  | 44          |
| R. SH. VAINBERG: Convective heat and mass transfer in non-adiabatic evaporation of volatile liquids from a porous system  | 51          |
| G. T. SERGEEV: Transfer processes in a laminar boundary layer involving reaction with the material from the body surface and the injected material                        | 59          |
| L. G. GOLUBEV and YA. G. ANTSILEVICH: Motion of gas and solid particles behind a sloped diaphragm   | 68          |
| V. V. CHUKIN and R. F. KUZNETSOV: Gas distribution in a dense bed   | 74          |
| V. A. KALENDER'YAN, A. E. POGORELOV and V. V. KORNARAKI: Heat transfer of a dense bed of loose material with a vibrating cylinder in a transverse flow                    | 79          |
| G. G. FILIPPOV and M. P. NEKRASOV: On a particular unsteady-state problem of the equation of counter-flow mixture separation in installations with distributed parameters | 86          |
| S. A. ULYBIN and S. P. MALYSHENKO: is-Diagram of normal hydrogen in the temperature range 16–100°K and at pressures to 500 kg/sm <sup>2</sup>                             | 90          |
| G. K. FILONENKO and A. I. CHUPRIN: Equilibrium moisture content of food materials   | 98          |

## Shorter Communications

|   |     |
|---|-----|
| M. NOVAKOVIČ, N. NINIČ and M. STEFANOVIČ: The derivation of the Clausius–Clapeyron equation   | 105 |
| I. M. Y. SHNAID: Conditions for the minimum entropy production rate in a heat-conducting body   | 108 |
| N. I. GEL'PERIN and V. G. AINSHTEIN: On possible methods of determining the interphase heat-transfer coefficient in a fluidized bed of granular materials | 111 |
| L. S. SERDYUK and A. G. TABACHNIKOV: Thermodynamic properties of nitrogen oxide over the temperature range 200–2000°K and at pressures of 1000 bar        | 114 |

## Discussions

|   |     |
|---|-----|
| K. N. SHABALIN: Comments on the paper "On the mechanism of a jet breaking into large drops" | 118 |
| I. KHOMYAK: Comments on the paper "On the mechanism of jet atomization into large drops"    | 119 |

## Obituary

|                                |     |
|--------------------------------|-----|
| ALEKSEI EVGEN'EVICH KLYUCHAREV | 120 |
|--------------------------------|-----|

## Book Reviews

|  |     |
|--|-----|
| A. V. LUIKOV: I. P. Ginzburg's book "Aerogas dynamics" | 122 |
|--|-----|

## Reader's Guide

|                                     |     |
|-------------------------------------|-----|
| Heat and Mass Transfer Bibliography | 124 |
|-------------------------------------|-----|
