

HEAT TRANSFER BIBLIOGRAPHY—JAPANESE WORKS

TAKASHI SATO

Department of Mechanical Engineering, Kyoto University, Japan

APPLICATION AND OUTLOOK

- T. AIHARA, Heat transfer in electronic equipment, *J. Japan Soc. Mech. Engrs* 70(583), 1197 (1967).
- S. FUKUI and M. SAKAMOTO, Some experimental results on heat transfer characteristic of air cooled heat-exchanger for air conditioning device, *J. Japan Soc. Mech. Engrs* 70(583), 1171 (1967).
- A. GOGA and S. ICHIKAWA, Experimental studies and applications of freon turbine driven turbo refrigerator, *J. Japan Soc. Mech. Engrs* 70(583), 1223 (1967).
- M. IMAEDA, S. HASATANI and S. SUGIYAMA, Dynamic response of shell and tube heat exchangers to flow rate change, *Chem. Engng. Japan* 31(8), 812 (1967).
- T. KAGAWA and H. NEI, Boiling heat transfer in the electric field, *J. Japan Soc. Mech. Engrs* 70(583), 1215 (1967).
- S. KAWAHARA and N. SAGAWA, Sodium technology for test loops, *J. Japan Soc. Mech. Engrs* 70(584), 1332 (1967).
- Y. MORI, W. NAKAYAMA and Y. UCHIDA, Convective heat transfer in ducts with secondary flow, *J. Japan Soc. Mech. Engrs* 70(583), 1188 (1967).
- A. NAGASHIMA, Measurement of the transport properties of steam and gases, *J. Japan Soc. Mech. Engrs* 70(583), 1180 (1967).
- Y. OKAMOTO, Thermal control systems and power plants for space vehicles, *J. Japan Soc. Mech. Engrs* 70(587), 1812 (1967).
- T. SUZUKI, The refrigeration system for large skating rinks, *J. Japan Soc. Mech. Engrs* 70(583), 1228 (1967).
- H. TAKAHAMA and S. TANAKA, Studies on vortex tubes (5th Report, The effects of the nozzle angle on the energy separation), *Trans. Japan Soc. Mech. Engrs* 33(253), 1401 (1967).
- K. TORIKAI, Resume of research for burn out heat flux, *J. Japan Soc. Mech. Engrs* 70(583), 1155 (1967).

CHANGE OF PHASE

- S. HASEGAWA and H. SHIMOMURA, Studies on liquid film cooling [Fundamental studies for emergency cooling of reactor fuel elements (1)], *Technology Rep. Fac. Engng Kyushu Univ.* 40(3), 323 (1967).
- M. HIRATA, N. NISHIWAKI and K. TORII, Skin friction in liquid-gas two phase boundary layer, *Trans. Japan Soc. Mech. Engrs* 33(254), 1653 (1967).
- N. SAGAWA, Measurement of transient condensing heat transfer with heat absorption in circular cylinders, *J. Japan Soc. Mech. Engrs* 70(583), 1164 (1967).
- K. SEKOGUCHI, K. NISHIKAWA, Y. SATO and A. KARIYASAKI, Two-phase flow characteristics in the distributed flow

region after mixing air and water (1st Report, Horizontal flow), *Trans. Japan Soc. Mech. Engrs* 33(255), 1809 (1967).

- T. TSUCHIYA, M. OUCHI and T. TAKEYAMA, Experimental study of simultaneous and adjacent existence of different types of boiling on some extended surfaces, *Trans. Japan Soc. Mech. Engrs* 33(253), 1419 (1967).

CONDUCTION

- K. SANOKAWA, Heat transfer between metallic surfaces in contact (1st Report, The conditions of both metals in contact are same), *Trans. Japan Soc. Mech. Engrs* 33(251), 1097 (1967).
- K. SANOKAWA, Heat transfer between metallic surfaces in contact (2nd Report, The effects of the thickness of metals, and the conditions of both metals in contact are different), *Trans. Japan Soc. Mech. Engrs* 33(251), 1108 (1967).
- K. SANOKAWA, Heat transfer between metallic surfaces in contact (3rd Report, The effect of the oxidation of contact surfaces), *Trans. Japan Soc. Mech. Engrs* 33(251), 1120 (1967).
- K. SANOKAWA, Heat transfer between metallic surfaces in contact (4th Report, The effect of both the shape of surface roughness and waviness, and the approximate method of calculating thermal contact resistance), *Trans. Japan Soc. Mech. Engrs* 33(251), 1131 (1967).

CONVECTIVE HEAT TRANSFER

- S. HASEGAWA and Y. FUJITA, Turbulent heat transfer in a tube with axially varying heat flux, *Trans. Japan Soc. Mech. Engrs* 33(256), 1984 (1967).
- S. HASEGAWA and Y. FUJITA, Nusselt numbers for fully developed flow in a tube with exponentially varying heat flux, *Mem. Fac. Engng Kyushu Univ.* 27(2), 1 (1967).
- A. KANZAWA, Heat transfer from plasma to solid walls with potential difference, *Trans. Japan Soc. Mech. Engrs* 33(255), 1847 (1967).
- H. KATO, N. NISHIWAKI and M. HIRATA, Studies on the heat transfer of fluids at a supercritical pressure (1st Report, Experiments of supercritical carbon-dioxide and a proposal of a simple calculation method), *Trans. Japan Soc. Mech. Engrs* 33(255), 1816 (1967).
- K. KATO, K. HATTORI and H. KUBOTA, Heat transfer in packed-fluidized beds, *Chem. Engng. Japan* 31(9), 867 (1967).
- K. KATO, K. IMAFUKU and H. KUBOTA, Fluid behaviour in

- packed-fluidized bed, *Chem. Engng. Japan* 31(10), 967 (1967).
- H. KONNO, K. OKADA, K. SASABAYASHI and S. OHTANI, Fundamental studies on the heat-transfer characteristics of a plate heat exchanger, *Chem. Engng. Japan* 31(9), 872 (1967).
- T. MIZUSHINA, R. ITO and Y. KURIWAKI, Turbulent velocity and temperature distributions in a circular tube, *Chem. Engng. Japan* 31(8), 778 (1967).
- T. MIZUSHINA, R. ITO, T. NAKAGAWA, K. KATAOKA and S. YOKOYAMA, Turbulent momentum and heat transfer in an annulus between rotating coaxial cylinders, *Chem. Engng. Japan* 31(10), 974 (1967).
- T. MIZUSHINA, R. ITO, Y. IKUTA, S. HIRAOKA, Y. KONAKA and J. WATANABE, Transport phenomenon at the wall of agitated vessel-heat transfer, *Chem. Engng. Japan* 31(12), 1208 (1967).
- Y. MORI and W. NAKAYAMA, Convective heat transfer in rotating radial circular pipes (1st Report, Theoretical analysis on laminar region), *Trans. Japan Soc. Mech. Engrs* 33(254), 1669 (1967).
- Y. MORI and S. TOKUDA, The effect of oscillation on local heat transfer in forced convection from a cylinder (2nd Report, Down stream of stagnation), *Trans. Japan Soc. Mech. Engrs* 33(255), 1826 (1967).
- Y. MORI and Y. UCHIDA, Study on convective heat transfer in a curved channel of a square cross-section (1st Report, Analytical results on a laminar region), *Trans. Japan Soc. Mech. Engrs* 33(255), 1836 (1967).
- S. NAGAI and S. TSURUNO, Heat transfer in laminar boundary layer with variable fluid properties, *Mem. Deffence Academy* 7(1), 171 (1967).
- K. NISHIKAWA, T. FUJII, S. YOSHIDA, A. OYAMA and M. OHNO, Forced convective heat transfer in the critical region, *Technology Rep. Fac. Engng Kyushu Univ.* 40(5), 823 (1967).
- in spray tower combined with liquid jets, *Technology Rep. Fac. Engng Kyushu Univ.* 40(5), 846 (1967).
- T. SHIROTSUKA and M. SANO, Unsteady mass transfer with irreversible first-order reaction in a laminar boundary layer *Chem. Engng. Japan* 31(11), 1135 (1967).

RADIANT HEAT TRANSFER

- M. NISHIMURA, M. HASATANI and S. SUGIYAMA, Simultaneous heat transfer by radiation and conduction—high temperature uni-dimensional heat transfer in molten glass, *Chem. Engng. Japan* 31(10), 988 (1967).
- S. SUGIYAMA, M. KITO, M. HASATANI and T. MORISHITA, Drying of porous solids in high temperature radiation furnace, *Chem. Engng. Japan* 31(11), 1081 (1967).

PROPERTIES

- Y. MORI, K. OHTAKE, M. YAMAMOTO and K. INAMI, Thermodynamic and electrical properties of combustion gas and its plasma (1st Report, Theoretical calculation), *Trans. Japan Soc. Mech. Engrs* 33(252), 1239 (1967).
- K. NISHIKAWA and K. MIYABE, Correlation of viscosity for water and water vapor, *Technology Rep. Fac. Engng Kyushu Univ.* 40(4), 607 (1967).
- K. NISHIKAWA and K. MIYABE, Correlation of thermal conductivity for water and water vapor, *Technology Rep. Fac. Engng Kyushu Univ.* 40(4), 614 (1967).
- N. OTOTAKE, Transport properties of suspensions, *Chem. Engng. Japan* 31(10), 980 (1967).
- Y. YAMADA and H. HIRASHIKI, On the thermodynamically consistent properties of steam in the neighbourhood of the critical point, *Trans. Japan Soc. Mech. Engrs* 33(253), 1427 (1967).
- Y. YAMADA and H. HIRASHIKI, Thermodynamically consistent values of properties of steam in the neighbourhood of the critical point (3rd Report), *Mem. Deffence Academy* 7(1), 191 (1967).

MASS TRANSFER

- J. MADA, Estimation of liquid phase mass-transfer coefficient
