

CONTENTS LISTS

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XIV, No. 1

January, 1968

	<i>Page</i>
Ten years of the Journal of Engineering Physics	5
V. P. MOTULEVICH: The method of relative conformity and its application to heat- and mass-transfer problems	8
A. V. LUIKOV, Z. P. SHULMAN and B. I. PURIS: Boundary-layer separation on a circular cylinder in a non-Newtonian elastic viscous fluid flow	17
G. N. DUL'NEV and B. L. MURATOVA: Thermal conductivity of fibre systems	29
YU. V. KOSMODEM'YANSKII, A. P. FOKIN and A. N. PLANOVSKII: The effect of the distribution of droplet sizes in pulverization upon the kinetics of pulverization drying	36
P. P. OLODOVSKII: Interrelation of structural sorption characteristics and water permeability coefficients of some hydrophilic dispersed systems	44
V. I. BALAKHONOVA, P. A. NOVIKOV, B. M. SMOL'SKII, V. V. SELIVANOV and V. N. SHMIGORA: The study of liquid evaporation from porous metal in vacuum	48
V. A. BELYI and O. R. YURKEVICH: The estimation method of the volumetric weight and initial state of a powdery plastic bed	55
N. A. SHAKHOVA: Outflow of turbulent jets into a fluidized bed	61
A. I. TAMARIN and L. V. GORBACHEV: Measurement of maximum intensity of heat transfer between a bed of moving particles and surface	70
V. E. AEROV and B. A. KOLOVANDIN: Calculation of the main turbulent properties of non-linear Stokes fluids with a transversal shift	76
V. G. LEITSINA and N. V. PAVLYUKEVICH: Uniform suction of a boundary layer in slip regime	85
N. I. ZVEREV and S. G. USHAKOV: Solid particle motion in potential rotating flow	90
A. S. BOMKO: Mathematical model of heat and mass transfer in a moving bed of dispersed material	94
V. A. ALEKSASHENKO: The steady conjugated problem of heat transfer in fluid flows in semi-infinite tubes including the effect of viscous dissipation	100
I. YA. KOLESNIK: Some asymptotic solutions of diffusion equations	108
YU. E. BAGDASAROV and I. A. KUZNETSOV: Dynamics of transient heat-transfer processes in mixing chambers	115
D. I. CHEREDNICHENKO, V. K. ALEKSEEV and G. V. DUDKO: Temperature field of a wedged pivot heated with a local periodic surface source	120
D. A. KURTENER and A. F. CHUDNOVSKII: Boundary conditions on the surface of a semi-infinite solid under radiation	124
K. E. DZHAUGASHTIN: Integral solution of some problems of distribution of plane jets of conducting fluid	129
V. F. KOLESOV: On the dynamical stress amplitude in a fast pulse reactor	134
A. A. REPIN: On the role of particles collision	138
M. A. PLOTNIKOV, A. A. ANTANOVICH and A. A. SEMERCHAN: Measurement of a net pulse flow of gas jets	144
R. S. MIKHAL'CHENKO, A. G. GERZHIN, V. T. ARKHIPOV, N. P. PERSHIN and L. V. KLIPACH: Heat transfer by residual gases in vacuum insulators.	148
S. L. LUR'E: Dynamic heat problem for non-Newtonian fluid	156

Shorter Communications

V. F. YUDAEV and D. T. KOKOREV: Particle movement in an acoustic field of stagnant waves	162
E. D. KURTSMAN: On the Rayleigh equation of gas bulb growth under the conditions of finite liquid volume	165
D. I. ZAKS and N. M. NAUMOV: Apropos of erroneous treatment of Langmuir formulae	168

Chronicle

The 3rd All-Union Conference on Heat Transfer and Hydraulic Resistance When a Two-Phase Flow Moves in the Elements of Power Machines and Apparatus	170

JOURNAL OF ENGINEERING PHYSICS

(Published in the U.S.S.R. in Russian with English abstracts)

Volume XIV, No. 3

March, 1968

	<i>Page</i>
A. A. SHOLOKHOV, N. I. BULEEV, YU. I. GRIBANOV and V. E. MINASHIN: Longitudinal laminar fluid flow in a bundle of rods	389
A. V. LUIKOV and G. V. VASILIEVA: Study of heat and mass transfer in liquid evaporation from a capillary-porous body	395
G. V. SHANTYR': Study of temperature boundary layer and heat transfer on isothermal flat disc under the conditions of transverse low-turbulent air flow	407
M. KH. IBRAGIMOV, G. A. PETRISCHCHEVA and G. S. TARANOV: Study of turbulent properties of a free circular incompressible gas jet	415
G. S. NAZAROV: Experimental study of cavitational properties of contracting nozzles	423
I. A. CHEREPENNIKOV: Temperature drop on the interface in bubble boiling	430
E. I. NESIS: Heat transfer in boiling under conditions of individual bubbles	437
YU. I. VOLOVIK: Calculation of drying of a dispersed polyfractional system	444
S. S. ZABRODSKII, I. L. ZAMNIUS, S. A. MALYUKOVICH and A. I. TAMARIN: Heat transfer in a layer of thin-dispersed material fluidized by a gas flow or vibrational superposition	448
YU. A. BUEVICH: Fluctuation of a number of particles in dense dispersed systems	454
V. M. BUZNIK, G. A. ARTEMOV, V. N. BANDURA and A. M. FEDOROVSKII: Study of the effect of wing profile roughness elements on heat transfer intensity	460
P. M. BRDLIK and I. A. TURCHIN: Heat transfer by natural convection from horizontal surfaces with their heat-transfer surfaces downwards	470
A. G. GOLOVEIKO: Elementary and thermal processes on a cathode with powerful pulse discharge	478
B. A. SOLOVIEV: Optimum profile of radiating fin	488
A. A. FLYUKOV: Informational approach to the theory of irreversible quasi-equilibrium processes	493
V. A. BUBNOV: Numerical solution of the problem of a submerged jet in power fluids	500
S. L. LURIE: Thermal boundary layer of non-Fourier power fluid on a plate with variable surface temperature	505
F. R. SHKLYAR and N. M. BABUSHKIN: Heat transfer in a bed with moving heat fluxes	511
P. V. TSOI: Solution to the problem of convective heat transfer by the Bubnov-Galerkin method	520
L. B. DVORKIN: The problem of the correct formulation of problems of convective salt diffusion in porous media	531
E. T. ARTYKPAEV: Transient methods of determining thermal properties of walls	538
R. S. MIKHAL'CHENKO, A. G. GERZHIN and N. P. PERSHIN: Temperature dependence of integral emissivity of some materials below 300°K	545
G. N. DUL'NEV and YU. P. ZARICHNYAK: Thermal conductivity and electric conductivity of binary alloy mixtures	552
P. I. ZARUBIN and L. A. POLUBOYARTSEVA: The study of heat transfer to the fluid from a rotating disc in a laminar flow regime	558
O. I. IL'YARSKII: The method of determination of the Peltier coefficient	564
<i>Book Review</i>	566
