

HEAT TRANSFER BIBLIOGRAPHY—JAPANESE WORKS

TAKASHI SATŌ

Department of Mechanical Engineering, Kyoto University, Kyoto, Japan

(Received 21 June 1972)

APPLICATION AND OUTLOOK

- K. INOUE and T. KAWAI, Thermal resistance between hexagonally arrayed channels, *J. Nucl. Sci. Tech.* **9** (2), 116 (1972).
- S. KIMURA and A. KANAGAWA, Effect of spacers on hot wire temperature in thermal diffusion column and separation efficiency, *J. Atomic Energy Soc. Japan* **14** (2), 52 (1972).
- S. KOBAYASHI and A. MIYANO, Study of the heat transfer coefficient, Part I, *Bull. Nagoya Inst. Tech.* **23**, 435 (1971).
- M. KUNUGI and H. MURAKAMI, Temperature distribution and heat transfer in container glass during forming operations, *Mem. Fac. Engng. Kyoto Univ.* **33** (4), 369 (1971).
- Y. MIYAMOTO, Method of core thermal calculation for multichannel on sodium cooled FBR, *J. Nucl. Sci. Tech.* **9** (3), 186 (1972).
- M. NISHIMURA, Y. INABA, M. HASATANI and S. SUGIYAMA, Heat transfer in static packed beds—The effects of radiation on the temperature distributions—*Chem. Engng. Japan* **35** (12), 1354 (1971).
- K. OKADA, M. ONO, T. TOMIMURA, T. OHKUMA, H. KONNO and S. OHTANI, Designs of the new type plate heat exchangers and their heat transfer characteristics, *Chem. Engng. Japan* **35** (5), 587 (1971).
- Y. OKAMOTO and N. AKINO, Some aspects on heat transfer and fluid dynamics of high temperature gas cooled reactor, *J. Atomic Energy Soc. Japan* **13** (8), 456 (1971).
- I. TANASAWA, On the heat-transfer characteristics of periodic-flow type heat exchangers, *Trans. Japan Soc. Mech. Engrs* **37** (296), 765 (1971).
- I. TANASAWA, Heat, momentum and mass transfer in biological systems, *J. Japan Soc. Mech. Engrs* **75** (636), 94 (1972).
- A. YAOITA, A consideration for the analysis of the internal distribution of temperature in axially symmetric flame—On a method to solve the integral equations—, *The Japan Soc. App. Phys.* **40** (11), 1221 (1971).

CHANGE OF PHASE AND TWO PHASE FLOW

- K. AKAGAWA and T. SAKAGUCHI, Frictional pressure drop in steam generating tubes (3rd Report, Experimental investigation of the dynamic characteristics), *Trans. Japan Soc. Mech. Engrs* **37** (298), 1212 (1971).
- M. AKIYAMA, Dynamics of an isolated vapor bubble in saturated nucleate boiling (Part 3. Effect of thermal factors of a heater), *Trans. Japan Soc. Mech. Engrs* **37** (296), 757 (1971).
- S. AOKI and T. TAKAHASHI, A study on hydrodynamics and heat transfer of spray flow (1st Report, Liquid-dispersed flow in an annular channel), *Trans. Japan Soc. Mech. Engrs* **37** (296), 742 (1971).
- S. HINATA, A study on the measurement of the local void fraction by the optical fiber glass probe (1st Report, On the method for measurement of the local void fraction in a liquid metal two phase flow), *Trans. Japan Soc. Mech. Engrs* **38** (306), 351 (1972).
- H. HONDA and K. NISHIKAWA, Experimental study on the mechanism of transition boiling heat transfer (2nd Report, The relation between the behavior of growing vapor bubble and the mechanism of heat transfer), *Trans. Japan Soc. Mech. Engrs* **38** (305), 177 (1972).
- K. INAGAKI, A. DOI, H. YAMAMOTO and H. KITAGUCHI, Boiling of water during HTR pulse operation, *J. Nucl. Sci. Tech.* **9** (1), 64 (1972).
- S. ISIGAI, S. NAKANISI, T. KOIZUMI and Z. OYABU, Hydrodynamics and heat transfer of vertical falling liquid films (Part 1, Classification of flow regimes), *Trans. Japan Soc. Mech. Engrs* **37** (301), 1708 (1971).
- N. ISSHIKI and I. NIKAI, Boiling of binary liquid mixtures, *Trans. Japan Soc. Mech. Engrs* **38** (307), 597 (1972).
- K. KATAYAMA and Y. HAYASHI, Researches on vacuum freeze-drying, *Trans. Japan Soc. Mech. Engrs* **37** (299), 1387 (1971).
- T. KAWAI and T. KAMEOKA, Behavior of the condensate drop on a long vertical cooling surface, *Trans. Japan Soc. Mech. Engrs* **37** (302), 2004 (1971).
- J. KAWASAKI, T. HAYAKAWA and S. FUJITA, Condensation of binary mixture of vapor of immiscible liquids, *Chem. Engng. Japan* **35** (4), 431 (1971).
- S. KOTAKE, Heat transfer of liquid–gas interface in laminar flows, *Trans. Japan Soc. Mech. Engrs* **38** (306), 358 (1972).
- M. MATSUOKA, T. HAYAKAWA and S. FUJITA, Fundamental study on fractional solidification—Effect of heat transfer rate on crystal growth rate, *Chem. Engng. Japan* **35** (7), 754 (1971).
- K. MIYAZAKI, Y. FUSII-E and T. SUITA, Preparation of plutonium metal, (II) *J. Nucl. Sci. Tech.* **8** (12), 673 (1971).
- K. MIWA, S. MORI, T. KATO and I. MUCHI, Behavior of bubbles in gaseous fluidized bed, *Chem. Engng. Japan* **35** (7), 770 (1971).
- Y. MORI and K. HIRAKATA, Free convective condensation heat transfer with noncondensable gas on a vertical surface, *Trans. Japan Soc. Mech. Engrs* **38** (306), 418 (1972).
- S. MOROOKA, K. TAJIMA and T. MIYAUCHI, Behavior of gas bubbles in fluid beds, *Chem. Engng. Japan* **35** (6), 680 (1971).

- T. MUNAKATA, H. NAGASUE and K. YOKOYAMA, Overall coefficient of heat transfer between vapor and cooling water under film-type condensation, *Mem. Fac. Engng Kyushu Univ.* **31** (3), 99 (1972).
- K. NISHIKAWA, T. FUJII and H. HONDA, Experimental study on the mechanism of transition boiling heat transfer (1st Report, Measurements of local solid-liquid contact and temperature fluctuation on the heating surface), *Trans. Japan Soc. Mech. Engrs* **37** (297), 1018 (1971).
- M. OCHIAI, T. KUROYANAGI, K. KOBAYASHI and K. FURUKAWA, Void fraction and heat transfer coefficient of sodium-argon two-phase flow in vertical channel, *J. Atomic Energy Soc. Japan* **13** (10), 566 (1971).
- T. SATO, T. MINAMIYAMA, M. YANAI, Y. ITO and S. TAKEMURA, Studies on the two-phase annular dispersed flow with heating (1st Report, On the flow construction), *Trans. Japan Soc. Mech. Engrs* **37** (300), 1569 (1971).
