

## ANNOUNCEMENT

### XXth INTERNATIONAL CONGRESS OF THE IAHR

5–9 September 1983

*Moscow, USSR*

The XXth International Congress of the IAHR will be held in Moscow, USSR in September 1983 on the theme *Hydraulic Research for Water Resources Development and Energy Production*. The invitation from the Committee for the USSR Participation in International Power Conferences, the USSE National Committee of the IAHR and the USSR Ministry of Power and Electricity to hold the XXth Congress in Moscow was accepted with much pleasure by the IAHR Council in its meeting held in Taormina, Italy in 1978.

The Council and the Organizing Committee will invite leading scientists to hold lectures on the special subjects. In collaboration with the Technical Divisions the following subjects for discussions at the technical sessions of the congress have been selected:

Hydraulic structures, hydroelectric plants and environmental problems

Experimental and mathematical fluid mechanics in hydraulic structures and equipment

Fluid mechanics and thermohydraulics for energy production.
