

HEAT AND MASS TRANSFER BIBLIOGRAPHY—SOVIET WORKS

R. I. SOLOUKHIN and O. G. MARTYSENKO

Heat and Mass Transfer Institute, 220728, Minsk, U.S.S.R.

(Received 3 November 1982)

BOOKS

- A. A. Aleksashenko, Yu. A. Koshmarov and I. S. Molchadsky, *Heat and Mass Transfer in Fire*. Stroizdat, Moscow (1982).
A. I. Burshtein and S. I. Tyomkin, *The Spectroscopy of Molecular Rotation in Gases and Liquids*. Izd. Nauka, Novosibirsk (1982).
V. A. Grigoriev and Yu. I. Krokhin, *Heat and Mass Transfer Equipment of Cryogenic Engineering*. Energoizdat, Moscow (1982).
V. M. Ivchenko *et al.* (Editors), *The Hydrodynamics of High Velocities*. Izd. KPI, Krasnoyarsk (1981).
V. N. Kiselnikov, G. Arkhangelsky and T. M. Verenina, *The Basic Designs of Mass Exchangers and the Methods of their Calculation*. Izd. IKhTI, Ivanovo (1981).
E. V. Korovkin and A. A. Koryagin (Editors), *Dryers and Furnaces for Chemical Industry*. Izd. NIIKhim mash, Moscow (1981).
A. I. Leontiev *et al.* (Editors), *Heat Transfer Problems*. Izd. MLTI, Moscow (1981).
V. G. Litvinov, *The Motion of Nonlinear-Viscous Liquid*. Izd. Nauka, Moscow (1982).
B. P. Mironov (Editor), *The Hydrodynamics and Acoustics of the Wall and Free Streams*. Izd. ITF, Novosibirsk (1981).
D. I. Polishchuk *et al.* (Editors), *The Physics of Aerodispersed Systems, Collected Papers No. 21*. Izd. Vishcha Shkola, Kiev-Odessa (1982).
B. M. Ryzhov, *The Tables of Thermodynamic Functions, Handbook*. Izd. Mashinostroenie, Moscow (1982).
G. T. Sergeyev, *Transfer Processes in a Reacting Boundary Layer*. Izd. ITMO, Minsk (1981).
A. N. Sherstyuk, *Two-Dimensional Problems of Hydrogasdynamics*. Izd. MIKhM, Moscow (1982).
V. A. Shvab and M. I. Shilyaev (Editors), *The Problems of Aerohydrodynamics and Heat and Mass Transfer as Applied to Some Technological Processes, Collected Papers*. Izd. Tomsk. Univ., Tomsk (1981).
A. V. Temnikov, V. I. Igonin and V. A. Kudinov, *Approximate Methods for the Solution of Heat Conduction Problems*. Izd. Aviats. Inst., Kuibyshev (1982).
Yu. V. Vidin *et al.* (Editors), *Heat Transfer and Hydrodynamics*. Izd. KPI, Krasnoyarsk (1981).
V. V. Volberg, *The Arrangement and Operation of Painting-and-Drying Units in Mechanical Engineering*. Izd. Vyssh. Shkola, Moscow (1982).
V. G. Voronov and Z. N. Mikhailetskii, *The Automatic Control of Drying Processes*. Izd. Tekhnika, Kiev (1982).
V. I. Zhidko, V. A. Rezhnikov and V. S. Ukolov, *Grain Drying and Grain Dryers*. Izd. Kolos, Moscow (1982).

PAPERS

THERMODYNAMICS

- Yu. P. Firsov, G. P. Popov and G. I. Chufarov, The calculation of the thermodynamic functions of solid solutions on the basis of structure characteristics, *Dokl. Akad. Nauk SSSR* 265(3), 678-680 (1982).

- V. I. Gorgoraki, The calculation of ionization cross-sections in the thermodynamic theory of shock ionization, *Dokl. Akad. Nauk SSSR* 265(3), 642-646 (1982).
A. N. Kolesnikov, V. M. Stepanov and A. R. Fidelman, The statistical thermodynamics of the crystal-liquid phase equilibrium in extremely diluted solutions of non-electrolytes. III. Application of the deformed cell method to the calculation of distribution coefficients for the admixtures of complex-shape molecules, *Zh. Fiz. Khim.* 56(9), 2186-2189 (1982).
A. M. Kutepov and N. V. Sokolov, The generalized thermodynamic criterion of the course of chemical engineering processes, *Dokl. Akad. Nauk SSSR* 265(4), 925-927 (1982).
A. P. Kuznetsov and D. N. Eryomenko, The thermodynamic properties of the R-12-R-C318 mixture, *Kholod. Tekh. Tekhnol.* No. 32, 40-46 (1981).
S. N. Lvov, The calculations of standard thermodynamic characteristics of nonpolar gas dissolutions in water at high temperatures and pressures, *Zh. Fiz. Khim.* 56(9), 2171-2174 (1982).
A. A. Miroshnichenko, The calculation of the general and local thermodynamics similarity constants for the excessive functions of mixing of hydrocarbons in non-aqueous solutions and their use in gas-liquid chromatography, *Zh. Fiz. Khim.* 56(9), 2175-2179 (1982).
V. B. Nesterenko, V. P. Bubnov, E. N. Bunin *et al.*, The technical and economic optimization of the thermodynamic parameters characterizing the cycle and equipment of atomic power station with a fast dissociating-gas reactor, *Vestsi Akad. Navuk BSSR, Ser. Fiz.-Energ. Navuk* No. 3, 34-38 (1982).
G. I. Novikov, B. A. Butylin and A. L. Kuzmenko, The thermodynamic criterion of the feasibility of hydrogen sulphide cycles, *Dokl. Akad. Nauk BSSR* 26(10), 921-924 (1982).
A. N. Prusov, A. G. Zakharov, V. I. Krasukhin and G. A. Krestov, The thermodynamics of the process of acid orange dye dissolution in water, *Zh. Fiz. Khim.* 56(9), 2167-2170 (1982).
A. N. Pryakhin, New methods in the statistical-thermodynamic theory of chemical and biochemical equilibria, *Zh. Fiz. Khim.* 56(9), 2124-2135 (1982).
