

## HEAT AND MASS TRANSFER BIBLIOGRAPHY—SOVIET WORKS

R. I. SOLOUKHIN and O. G. MARTYNEKO

Heat and Mass Transfer Institute, 220728, Minsk, U.S.S.R.

(Received 3 March 1982)

### BOOKS

- B. I. Alshin (Editor), *Investigations in the Field of Low-Temperature Thermometry and Thermal Physics, Collected Papers*. Izd. VNIIFTRI, Moscow (1981).
- V. S. Andreev and E. P. Popechitelev, *Laboratory Instruments for the Investigation of Liquid Media*. Izd. Mashinostroenie, Leningrad (1981).
- E. E. Bibik, *Rheology of Dispersed Systems*. Izd. LGU, Leningrad (1981).
- E. D. Fedorovich (Editor), *Increase of the Efficiency of Heat Transfer in Power Engineering Equipment*. Izd. Nauka, Leningrad (1981).
- N. I. Gelperin, *Basic Processes and Apparatus of Chemical Technology*, Book 1. Izd. Khimiya, Moscow (1981).
- L. V. Komarovskiy and O. N. Shablovskiy, *Analytical Study of Some Internal Problems of Nonstationary Gasdynamics and Heat Transfer*. Izd. Tomsk. Univ., Tomsk (1981).
- G. A. Krestov et al. (Editors), *Thermodynamics and Composition of Solutions, Collected Papers*. Izd. Ivanov. Khim.-Tekhnol. Inst., Ivanovo (1980).
- F. M. Kuni, *Statistical Physics and Thermodynamics*. Izd. Nauka, Moscow (1981).
- Yu. A. Lebedev and E. A. Miroshnichenko, *Thermal Chemistry of Vapour Generation by Organic Substances: Evaporation and Sublimation Heats and Saturated Vapour Pressure*. Izd. Nauka, Moscow (1981).
- A. T. Lukiyarov, L. Yu. Artyukh and P. G. Itskova, *Mathematical Simulation of the Combustion Theory Problems*. Izd. Nauka, Alma-Ata (1981).
- A. S. Martsenyuk and V. N. Stabnikov, *Film Heat and Mass Exchangers in Food Industry*. Izd. Lyogk. Pishch. Prom., Moscow (1981).
- N. A. Rubtsov (Editor), *Radiative and Combined Heat Transfer, Collected Papers*. Izd. Inst. Teplofiz., Novosibirsk (1981).
- Yu. M. Smirnov et al. (Editors), *Physics of Crystallization, Collected Papers*. Izd. KGU, Kalinin (1981).
- R. I. Soloukhin and I. G. Gurevich (Editors), *Heat and Mass Transfer - VI: Topical Papers of the 6th All-Union Heat and Mass Transfer Conf.* Izd. ITMO AN BSSR, Minsk (1981).

### PAPERS

#### GENERAL

- N. A. Begalishvili, N. D. Dzharparidze and G. A. Robitashvili, Numerical modelling of the process of precipitation in a convective cloud, *Trudy Zakavkaz. Region. NII* No. 73, 19-29 (1981).
- V. L. Dragun, On the basic aspects in the activity of the Luikov Heat and Mass Transfer Institute of the Byelorussian Academy of Sciences for the year 1981 pp. 3-7, in *Heat and Mass Transfer: Investigations and Developments*. Minsk (1981).
- V. B. Kuntyshev and L. M. Fedotova, Comparison between the methods of modelling heat transfer in finned tubular bundles, *Kholod. Tekh.* No. 12, 25-28 (1981).
- O. S. Rabinovich, Numerical modelling of exothermal reaction waves in forced oxidant percolation through a porous

medium pp. 53-57, in *Heat and Mass Transfer: Investigations and Developments*. Minsk (1981).

V. V. Vlasov, On a certain method of the construction of mathematical models for the processes of conductive and convective mass transfer pp. 74-81, in *Some Points Concerning the Differential Equations in the Solution of Applied Problems*. Tula (1981).

### THERMODYNAMICS

- S. D. Barsuk, Calculation of the thermodynamic properties of a natural gas. *Izv. Akad. Nauk SSSR, Energet. Transp.* No. 6, 124-132 (1981).
- Yu. A. Bucvich and G. P. Yasnikov, On application of the non-equilibrium thermodynamic methods to the description of relaxation effects in the processes of production, transport and processing of oil, *Izv. VUZov, Neft Gaz* No. 10, 54-59 (1981).
- B. R. Gelchinsky, A. A. Yuriev, N. A. Vatolin and V. F. Ukhov, A non-local model potential satisfying the condition of thermodynamic equilibrium, *Dokl. Akad. Nauk SSSR* 261(3), 663-665 (1981).
- P. A. Glubish, Thermodynamic foundations of mud removal, *Khim. Tekhnol.* No. 6, 6-9 (1981).
- L. N. Gorokhov, V. K. Smirnov and Yu. S. Khodeev, Thermodynamics of sublimation and disproportionation of uranium trifluoride, *Dokl. Akad. Nauk SSSR* 261(2), 397-399 (1981).
- A. B. Koltsov, Thermodynamic analysis of the conditions for low-temperature metasomatite formation in black shales, *Dokl. Akad. Nauk SSSR* 261(6), 1413-1417 (1981).
- B. Z. Pitirimov, Irreversible thermodynamics of the processes of adsorption and desorption of water and benzole, *Zh. Fiz. Khim.* 55(12), 3116-3119 (1981).
- V. V. Smelov, The principle of iteration on subregions in the problems involving the transport equation, *Zh. Vychisl. Mat. Mat. Fiz.* 21(6), 1493-1504 (1981).
- A. M. Toikka and M. P. Susarev, Application of the thermodynamic stability conditions for estimation and verification of the composition of vapour of ternary liquid-vapour systems from the data on binary subsystems, *Zh. Prikl. Khim.* 54(11), 2564-2566 (1981).
- A. K. Valeev, A method for the numerical solution of a one-dimensional transport equation, *Zh. Vychisl. Mat. Mat. Fiz.* 21(6), 1596-1600 (1981).

### THERMOPHYSICAL (TRANSPORT) PROPERTIES

- V. P. Kozhin, Determination of the thermophysical coefficients and calculation of the kinetics of hydrogen sorption by intermetallic compounds pp. 49-58, in *Heat and Mass Transfer in Electrochemical Energy Generators*. Minsk (1981).
- V. I. Kulagin and A. A. Raskin, A distorting effect of the thermophysical factors on the results of measurements in differential scanning calorimetry, *Prom. Teplotekh.* 4(1), 95-99 (1982).
- V. V. Kurepin and N. V. Nimenskiy, Errors in determination of the heat conduction coefficient for gas interlayers when used to

- protect the side surface of a sample, *Prom. Teplotekh.* **4**(1), 57–62 (1982).
- Kh. Madzhidov, Experimental study of the thermal conductivity of a dibutyl ether as a function of temperature and pressure, *Teplotiz. Vysok. Temp.* **19**(6), 1315–1317 (1981).
- Kh. Madzhidov and S. Zubaidov, Thermal conductivity of dipropyl ether at different temperatures and pressures, *Dokl. Akad. Nauk Tadzh. SSR* **24**(3), 169–172 (1981).
- V. A. Maiorov, Thermal conductivity of porous materials pp. 121–130, in *Heat and Mass Transfer in Systems With Porous Elements*. Minsk (1981).
- L. N. Novichyonok, S. M. Ovchinnikova, V. E. Ivanov and M. B. Smolsky, A digital instrument for measurements of the thermal conductivity of liquid media, *Prom. Teplotekh.* **4**(1), 55–57 (1982).
- A. Omarov, Heat conduction equation in a semi-infinite cone truncated by a sphere, *Vychisl. Prikl. Mat.* No. 44, 121–126 (1981).
- V. N. Pakhomov, V. G. Fyodorov and G. A. Eresko, Thermophysical characteristics of milk fat in the region of phase changes, *Izv. VUZov. Pishch. Tekhnol.* No. 6, 95–99 (1981).
- E. S. Platonov, V. M. Kozin, Yu. V. Levochkin and Yu. V. Grigoriev, A digital proximate meter of the thermophysical properties of substances, *Prom. Teplotekh.* **4**(1), 51–55 (1982).

## HYDROMECHANICS

## 1. Boundary layer

R. A. Pelensky, The equations of potentials of the boundary layer of an electrically conducting medium, *Elektron. Modelirovanie* No. 3, 92–94 (1981).

A. I. Ruban, A special solution of the boundary layer equations which can be continuously extended through the point of zero surface friction, *Izv. Akad. Nauk SSSR, Mekh. Zhidk. Gaza* No. 6, 42–52 (1981).

P. P. Vaitekunas, A. Yu. Bulota and I. I. Zhyugzhda, The effect of variable thermophysical properties of liquid on the cross-flow past a cylinder, *Trudy Akad. Nauk Lit. SSR, Ser. B, Khim., Tekh., Fiz. Geogr.* No. 5, 153 (1981).

## 2. Turbulent flows

I. V. Abdullaev, Some problems of the turbulence of singly directed flows, *Trudy Zakavkaz. Region. NII* No. 78, 80–84 (1981).

R. T. Abramov, Calculation of unsteady-state non-equilibrium turbulent flows pp. 90–107, in *Applied Problems of the Theory of Transfer*. Minsk (1981).

V. A. Baum and I. V. Baum, The diffusional theory of free turbulent flows, *Izv. Akad. Nauk TSSR, Ser. Fiz.-Tekh., Khim. Geol. Nauk* No. 3, 15–27 (1981).

V. V. Kolesov, Occurrence of Taylor vortices between heated rotating cylinders, *Prikl. Mat. Tekh. Fiz.* No. 6, 87–93 (1981).

Yu. I. Kopilevich, A. S. Tibilov and V. A. Yakovlev, Linear approximations in calculations of the statistical characteristics for the signals of optical meters of turbulence, *Optika Spektrosk.* 51(5), 915–923 (1981).

A. M. Krigel, On the non-conservation of velocity circulation in a turbulent rotating fluid, *Pisma v ZhTF* 7(21), 1300–1303 (1981).

V. A. Pavlovsky, Systematization of the experimental data on resistance for a turbulent flow between rotating cylinders (Couette flow), *Dokl. Akad. Nauk SSSR* 261(2), 305–309 (1981).

V. A. Sosinovich, A system of equations for the description of mixing of reagents in an isotropic turbulent flow pp. 61–64, in *Heat and Mass Transfer: Investigations and Developments*. Minsk (1981).

## 3. Kinetic theory of gases and liquids

A. V. Bobylev, Asymptotic properties of the solutions of Boltzmann equation, *Dokl. Akad. Nauk SSSR* 261(5), 1099–1104 (1981).

A. V. Bobylev, Concerning the Chapman–Enskog and Grad methods for the solution of Boltzmann equation, *Dokl. Akad. Nauk SSSR* 262(1), 71–75 (1982).

G. A. Nadibaidze, G. A. Robitashvili and I. I. Rukhadze, On the algorithm of a numerical solution for the non-linear kinetic equation of coagulation (of droplets), *Trudy Zakavkaz. Region. NII* No. 73, 60–62 (1981).

V. Ya. Rudyak, On derivation of the kinetic equation for a strongly non-equilibrium slightly non-ideal gas, *Zh. Tekh. Fiz.* 51(11), 2236–2241 (1981).

## NATURAL CONVECTION

M. A. Andreev, Laminar heat transfer on a vertical cylinder in the presence of free convection pp. 152–157, in *Heat and Mass Transfer in Electrochemical Energy Generators*. Minsk (1981).

V. E. Fertman, An experimental study of the pyromagnetic coefficient of a magnetic liquid within the temperature range 298–361 K pp. 69–71, in *Heat and Mass Transfer: Investigations and Developments*. Minsk (1981).

L. A. Gulabyants, L. I. Rybalov and A. N. Kachalov, Natural convection heat transfer of air in channels of different orientation pp. 47–51, in *Heat-Shielding Properties of Protecting Constructions of Buildings*. Moscow (1980).

V. V. Kolesov, Incipience of a plane secondary regime between heated rotating cylinders, *Izv. Akad. Nauk SSSR, Mekh. Zhidk. Gaza* No. 6, 22–27 (1981).

A. A. Kovkova, Singular perturbations in the problem of free

convection on an inclined isothermal surface pp. 69–74, in *Applied Problems of the Theory of Transfer*. Minsk (1981).

V. K. Polevikov, Concerning a certain algorithm for calculation of the Nusselt number in the problems of convection pp. 66–75, in *Problems of the Mechanics of Magnetic Liquids*. Minsk (1981).

A. G. Semyonov and Yu. A. Sokovishin, Two-dimensional universal equations of the free-convective boundary layer pp. 63–68, in *Applied Problems of the Theory of Transfer*. Minsk (1981).

A. A. Varfolomeev and G. G. Sutyurin, Laboratory modelling of free non-stationary penetrating convection, *Dokl. Akad. Nauk SSSR* 261(1), 55–59 (1981).

## FORCED CONVECTION

V. B. Ankudinov and V. A. Kurganov, Enhancement of a deteriorated heat transfer in heated tubes at supercritical pressures, *Teplofiz. Vysok. Temp.* 19(6), 1208–1212 (1981).

I. A. Bassina, V. L. Dorot and M. Kh. Strelets, Calculation of the resistance and heat transfer in a flow of multicomponent chemically non-equilibrium mixture of gases in a supersonic nozzle with penetrable walls in the presence of injection, *Teplofiz. Vysok. Temp.* 19(6), 1203–1207 (1981).

I. V. Belov, Yu. D. Postnikov and A. V. Nekrasov, Hydrodynamics and heat transfer in the vicinity of a nozzle on gas jet discharge into a liquid, *Communic. 1, Izv. VUZov, Chyorn. Metallurgiya* No. 6, 115–117 (1981).

L. B. Gdalevich, Conjugate heat transfer of a porous wall with a flow of viscous incompressible weakly conducting liquid pp. 59–65, in *Problems of the Mechanics of Magnetic Liquids*. Minsk (1981).

Yu. P. Gupalo, A. D. Polyandin and Yu. S. Ryazantsev, Certain general invariance relationships in the problems of convective heat and mass transfer at large Peclet numbers, *Izv. Akad. Nauk SSSR, Mekh. Zhidk. Gaza* No. 6, 92–97 (1981).

Yu. G. Kapatsyna, K. N. Semyonov and M. K. Bologa, Heat transfer and hydraulic resistance of tubes with circular turbulizers, *Izv. Akad. Nauk MSSR, Ser. Fiz.-Tekh. Mat. Nauk* No. 1, 62–73 (1981).

M. P. Kuzmin, V. V. Vetrov and S. I. Strelyaev, An electric RC-model for the study of unsteady-state heat transfer in bodies of spherical form, *Elektron. Modelirovanie* No. 3, 50–52 (1981).
