# INTERNATIONAL JOURNAL OF HEAT AND MASS TRANSFER

## BOARD OF EDITORS

- E. A. BRUN, 8 place du Commerce, Paris 15<sup>ème</sup>, France
- A. J. EDE, Mechanical Engineering Dept., University of Aston, Gosta Green, Birmingham 4, England
- CARL GAZLEY, JR., Dept. of Geophysics and Astronomy, The RAND Corporation,  
1700 Main Street, Santa Monica, California 90406, U.S.A.
- J. GOSSE (Associate Editor), C.N.A.M., 292 rue Saint-Martin, 75141—Paris Cedex 03, France
- U. GRIGULL, Technische Universität, Arcisstrasse 21, München, Germany
- E. HAHNE (Associate Editor), Technische Universität, Arcisstrasse 21, München, Germany
- J. P. HARTNETT, Energy Engineering Dept., University of Illinois, Box 4348, Chicago, Illinois 60680, U.S.A.
- ✱A. V. LUIKOV, Heat and Mass Transfer Institute, Academy of Science, 25 Podlesnaya, Minsk, B.S.S.R., U.S.S.R.
- O. G. MARTYENKO (Associate Editor), Heat and Mass Transfer Institute, Byelorussian Academy of Sciences,  
25 Podlesnaya, Minsk, B.S.S.R., U.S.S.R.
- W. J. MINKOWYCZ (Associate Editor), Energy Engineering Dept.,  
University of Illinois, Box 4348, Chicago, Illinois 60680, U.S.A.
- Y. MORI, Faculty of Engineering, Tokyo Institute of Technology, Meguro-ku, Tokyo, Japan
- D. B. SPALDING, Mechanical Engineering Dept., Imperial College of Science & Technology,  
Exhibition Road, London S.W.7, England
- J. H. WHITELOW (Associate Editor), Mechanical Engineering Dept., Imperial College of Science & Technology,  
Exhibition Road, London S.W.7, England

## HONORARY EDITORIAL ADVISORY BOARD

Chairman: E. R. G. ECKERT, *University of Minnesota, Minneapolis, Minnesota 55455, U.S.A.*

Past-chairman: Sir OWEN SAUNDERS, *F.R.S., Imperial College, London, England*

- |                                                  |                                                    |                                                        |

## Annual Subscription Rates

For libraries, research establishments, and all other multiple-reader institutions: £54 (\$135). Private individuals whose departmental libraries subscribe may obtain this Journal for their personal use at a reduced rate of £8 (\$20) per annum.

## Microform Subscriptions and Back Issues

Current subscriptions and back files on microfilm as well as back issues in the regular editions of all previously published volumes are available from our sole distributors, Microforms International Marketing Corporation Inc. (MicroMark) at the most convenient address:  
380 Saw Mill River Road, Elmsford,  
New York 10523, U.S.A.

# LIST OF CONTENTS

## JANUARY

|                                                                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| V. N. Vedamurthy and V. M. K. Sastri: An analysis of the conductive and radiative heat transfer of the walls of fluidized bed combustors . . . . .                                                       | 1   |
| D. R. Jones: Convective effects in enclosed, exothermically reacting gases . . . . .                                                                                                                     | 11  |
| J. C. Bratis and J. L. Novotny: Radiation-convection interaction in the boundary layer regime of an enclosure . . . . .                                                                                  | 23  |
| M. F. Modest and C. L. Tien: Thermal analysis of cyclic cryogenic regenerators . . . . .                                                                                                                 | 37  |
| C. F. Chen and M. W. Skok: Cellular convection in a salinity gradient along a heated inclined wall . . . . .                                                                                             | 51  |
| C. L. Tien and A. R. Rohani: Analysis of the effects of vapor pressure drop on heat pipe performance . . . . .                                                                                           | 61  |
| Ian F. Davenport and C. Judson King: The onset of natural convection from time-dependent profiles . . . . .                                                                                              | 69  |
| Ian F. Davenport and C. Judson King: Natural convection from time-dependent profiles at a gas-liquid surface . . . . .                                                                                   | 77  |
| V. M. Soundalgekar and Ioan Pop: Viscous dissipation effects on unsteady free convective flow past an infinite vertical porous plate with variable suction . . . . .                                     | 85  |
| Francis Godaux and Benjamin Gebhart: An experimental study of the transition of natural convection flow adjacent to a vertical surface . . . . .                                                         | 93  |
| M. P. Escudier: Heat transfer to a near-separating laminar boundary layer . . . . .                                                                                                                      | 109 |
| L. E. Hochreiter and Alexander Sesonske: Turbulent structure of isothermal and non-isothermal liquid metal pipe flow . . . . .                                                                           | 113 |
| Chien-Cheng Shih and J. W. Westwater: Spheres, hemispheres and discs as high-performance fins for boiling heat transfer . . . . .                                                                        | 125 |
| Francisco Restrepo and Leon R. Glicksman: The effect of edge conditions on natural convection from a horizontal plate . . . . .                                                                          | 135 |
| Alan Quarmby and Richard Quirk: Axisymmetric and non-axisymmetric turbulent diffusion in a plain circular tube at high Schmidt number . . . . .                                                          | 143 |
| Tetsu Fujii, Osamu Miyatake, Motoo Fujii, Hiroshi Tanaka and Kentaro Murakami: Natural convective heat-transfer from a vertical surface of uniform heat flux to a non-Newtonian Sutterby fluid . . . . . | 149 |
| Shorter Communication:                                                                                                                                                                                   |     |
| J. D. Felske and C. L. Tien: A theoretical closed form expression for the total band absorptance of infrared-radiating gases . . . . .                                                                   | 155 |
| Letter to the Editors:                                                                                                                                                                                   |     |
| T. Z. Fahidy: On the flat plate approximation to laminar free convection from the outer face of a vertical cylinder . . . . .                                                                            | 159 |

## FEBRUARY

|                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Demosthenes D. Papailiou and Paul S. Lykoudis: Turbulent free convection flow . . . . .                                                                                | 161 |
| Ivan Catton, P. S. Ayyaswamy and R. M. Clever: Natural convection flow in a finite, rectangular slot arbitrarily oriented with respect to the gravity vector . . . . . | 173 |
| S. H. P. Chen and S. C. Saxena: Interface heat transfer and thermal accommodation coefficients: heated tungsten wire in nitrogen environment . . . . .                 | 185 |
| Ajay Kumar and A. C. Jain: Hypersonic radiating merged shock layer near the blunt-body stagnation region . . . . .                                                     | 197 |

## FEBRUARY—continued

|                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| B. B. Mikić: Thermal contact conductance; theoretical considerations . . . . .                                                                                            | 205 |
| Seppo A. Korpela: A study of the effect of Prandtl number on the stability of the conduction regime of natural convection in an inclined slot . . . . .                   | 215 |
| B. T. Chao and R. O. Fagbenle: On Merk's method of calculating boundary layer transfer . . . . .                                                                          | 223 |
| Jan Erik Weber: Convection in a porous medium with horizontal and vertical temperature gradients . . . . .                                                                | 241 |
| W. F. Calus and D. J. Leonidopoulos: Pool boiling—binary liquid mixtures . . . . .                                                                                        | 249 |
| A. V. Luikov: Conjugate convective heat transfer problems . . . . .                                                                                                       | 257 |
| E. Hahne and U. Grigull: A shape factor scheme for point source configurations . . . . .                                                                                  | 267 |
| R. J. Baker and B. E. Launder: The turbulent boundary layer with foreign gas injection—I. Measurements in zero pressure gradient . . . . .                                | 275 |
| R. J. Baker and B. E. Launder: The turbulent boundary layer with foreign gas injection—II. Predictions and measurements in severe streamwise pressure gradients . . . . . | 293 |
| Robert D. Haberstroh and Richard D. Reinders: Conducting-sheet model for natural convection through a density-stratified interface . . . . .                              | 307 |
