
FORTHCOMING REGULAR ARTICLES

Electrophilic properties of common MALDI matrix molecules

T.P. Lippa, S.N. Eustis, D. Wang and K.H. Bowen (United States)

Evolution of the electronic structure and properties of neutral and charged cobalt-doped aluminum clusters

Ling Guo (China)

Effects of pre-treatments and organic matter on oxygen and carbon isotope analyses of skeletal and inorganic calcium carbonate

Hubert Wierzbowski (Poland)

A sensitive and specific liquid chromatography mass spectrometry method for simultaneous determination of berberine, palmatine, coptisine, epiberberine and jatrorrhizine from *Coptidis Rhizoma* in rat plasma

S. Yu, X. Pang, Y. Deng, L. Liu, Y. Liang, X. Liu, L. Xie, G. Wang and X. Wang (PR China)

GeoVOC: A SIFT-MS method for the analysis of small linear hydrocarbons of relevance to oil exploration

G.J. Francis, M.J. McEwan, P.F. Wilson, D.B. Milligan and V.S. Langford (New Zealand)

Study of factors governing negative molecular ion yields of amino acid and peptide in FAB, MALDI and ESI mass spectrometry

T. Nishikaze and M. Takayama (Japan)
