Call for Papers

ICCE-14: Fourteenth International Conference on Composites or Nano Engineering

Boulder, CO, USA, July 2-8, 2006

The ICCE-14 conference will feature over 400 oral paper presentations. Keeping the same track record of the past five years, at least four or more members of the US National Academy of Engineering (NAE) will present keynote lectures. The ICCE-14 will be among the largest technical composite materials conference in the world. The reputation of this conference is evidenced by the enormous citations in Google search and citations in scientific publications, and it is well attended by engineers and scientists all over the world.

Selected high-quality papers will be reviewed and published in *Composites B*, among other journals. Interested authors should submit tentative paper titles for ICCE-14 immediately; we prefer that the presenter be the first co-author.

For further information, please visit the conference Web site at: http://myweb.polyu.edu.hk/~mmktau/ICCE/ICCE_Main.htm
