

# LITERATURE AVAILABLE

**Aluminum Heat Exchangers.** This booklet presents the complete story on aluminum heat exchanger tubes, with emphasis on the factors which make these tubes attractive to industry. Applications of aluminum heat exchanger tubes to various chemical and related industries are discussed. ALUMINUM Co. OF AMERICA **L1**

**Bread Emulsifiers.** The physical chemistry and properties of various bread emulsifiers are described in this booklet. HACHMEISTER INC. **L2**

**Calcium Lignosulfonate.** A de-sugared calcium lignosulfonate is described in this folder. Physical and chemical characteristics are included. LAKE STATES YEAST CORP. **L3**

**Can Handling.** Catalog covers the application of materials handling of cans and similar containers. Complete can handling systems are available and described. The company will also design custom equipment for difficult can handling problems. BARKER Co. **L4**

**Chemical Porcelain Equipment.** The usefulness of porcelain as a material of construction is described with specifications of chemical and physical characteristics of a line of porcelain equipment. There is a discussion of installation and operating practices. LAPP INSULATOR Co. **L5**

**Electron Microscopes.** A number of typical applications together with design and operating information on two types of electron microscopes are listed in this 4-page folder. Technical data on accelerating potential, electron diffraction, and resolution are also included. NORTH AMERICAN PHILLIPS Co. **L6**

**Electrophoresis Apparatus.** Bulletin gives information about a paper strip electrophoresis apparatus with a safety switch which breaks the current to both electrodes when removable cover is lifted. ARTHUR H. THOMAS & Co. **L7**

**Excitation Unit.** All-in-one excitation

unit for precision spectrochemical analysis is described in this catalog. Includes tables which give relative qualities and parameter specifications of the 5 types of excitation units available. JARRELL-ASH Co. **L8**

**Grain Dryer.** Features and operation of a grain dryer with a capacity from 200 to 500 bushels of grain per hour are described in this bulletin. ARID-AIRE MANUFACTURING Co. **L9**

**Laboratory Clamps.** A number of different types and sizes of aluminum alloy laboratory clamps are illustrated in this catalog. The clamps feature: corrosion resistance, lightness, flexibility, and improved gripping action. LABLINE INC. **L10**

**Magnetic Stirring Apparatus.** Bulletin describes a magnetic stirrer available with enclosed or separate rheostat control. ARTHUR H. THOMAS & Co. **L11**

**Packaging Machinery.** A combination packer for setting up filling and packing cartons with dry material at rates up to 300 per minute is described in this illustrated bulletin. A check weighing device is incorporated in the packer. PNEUMATIC SCALE CORP. **L12**

**Peptides.** Price list of 50 peptides available in research quantities. MANN RESEARCH LABORATORIES **L13**

**Process Filters.** Bulletin illustrates rubber and lead lined equipment as well as special metal equipment for process filtering. Both types of filters are designed to handle liquids which are toxic or dangerous to handle by conventional filtration equipment. R. P. ADAMS Co. **L14**

**Sodium Phosphates.** Catalog of data on various sodium phosphates and other chemicals. Includes a section on classification of sodium phosphates which should prove helpful in selecting the right material for different requirements. Tables, scales and technical data are included. BLOCKSON CHEMICAL Co. **L15**

## first flight

*Without trust in Daddy's strong arms, fear would blot out the fun of first flight. But because Daddy's smiling, loving face is below, life adds a thrilling new dimension, founded in love and trust.*

*All our adventures begin in and come home to the security we cannot do without.*

To give and to get security is the main business of living. It is a privilege and a responsibility. It provides us life's finest rewards.

Have you ever thought that this security is possible only in a democracy? We continue to grow stronger as a nation when more and more secure homes are bulwarked together. The security of your country depends on your security.

**Saving for security is easy!** Here's a savings system that really works—the Payroll Savings Plan for investing in United States Savings Bonds.

Go to your company's pay office, choose the amount you want to save. That money will be set aside for you before you even draw your pay. And invested in Bonds which are turned over to you.

If you can save only \$3.75 a week on the Plan, in 9 years and 8 months you will have \$2,137.30.

U. S. Series "E" Savings Bonds earn interest at an average of 3% per year, compounded semiannually, when held to maturity! And they can go on earning interest for as long as 19 years and 8 months if you wish, giving you back 80% more than you put in!

For your sake, and your family's, too, how about signing up today? Or join the Bond-A-Month Plan where you bank.

The U. S. Government does not pay for this advertisement. It is donated by this publication in cooperation with the Advertising Council and the Magazine Publishers of America.
