Effect of Fillers on the Compatibility of Polymer Blends

NIKOS K. KALFOGLOU, *Department of Chemistry, University of Patra 26110 Patra, Greece*

[article in J. Appl. Polym. Sci., 32, 5247-5259 (1986)]

Instead of talc, calcium carbonate was used as a filler. This was caused by incorrect labeling in the stockroom and does not invalidate in any way the data or the validity of the conclusions of this article.
