

Subject Index

A

- Acetic acid. Vapor phase carbonylation of methanol to, ROBERT G. SCHULTZ AND PHILLIP D. MONTGOMERY, 105
- Acid site concentrations in fluorided alumina from the infrared spectra of adsorbed pyridine species. THOMAS R. HUGHES, HARRY M. WHITE, and ROBERT J. WHITE, 58
- Acidity on silica-alumina catalysts by infrared spectroscopy-pyridine chemisorption. JOHN W. WARD AND ROWLAND C. HANSFORD, 159
- Activation energies derived by the least-squares treatment of kinetic data. The interpretation of apparent, J. BAGG, 271
- Active sites of aluminosilicate catalysts. Nature of, K. G. MIESSEROV, 169
- Adsorbed species in the nickel-catalyzed ethylene hydrogenation. Catalyst surface coverages of, ISAO MATSUZAKI AND AKIO TADA, 215
- Adsorption function of isopropyl alcohol on a zinc oxide catalyst. STEIN KOLBOE, 193, 199
- Aerosil discs. Porous structure of self-supporting pressed, A. J. TYLER, F. H. HAMBLETON, AND J. A. HOCKEY, 35
- Alcohols to high molecular weight ketones. Group VIII metal-catalyzed condensation of, B. H. DAVIS AND P. B. VENUTO, 100
- Alkylbenzenes using homogeneous platinum catalysts. Isotopic hydrogen exchange in the, R. J. HODGES AND J. L. GARNETT, 83
- Alumina. Brönsted and Lewis acid site concentrations in fluorided, THOMAS R. HUGHES, HARRY M. WHITE, and ROBERT J. WHITE, 58
- Alumina. Exchange of D₂ with noncyclic olefins over, JOE W. HIGHTOWER AND KEITH HALL, 161
- Aluminosilicate catalysts. Nature of active sites of, K. G. MIESSEROV, 169
- Ammonia in adsorbed phase. On the state of, V. I. KVLIVDZE, R. A. BRANTS, V. F. KISSELEV, AND G. M. BLIZNAKOV, 255
- Ammonia synthesis over an unpromoted iron catalyst. Kinetics and isotope effect of, KEN-ICHI AIKA AND ATSUMU OZAKI, 232
- Apparent activation energies derived by the least-squares treatment of kinetic data. The interpretation of, J. BAGG, 271
- Aromatization of tri-methylpentanes over chromia-alumina and platinum-alumina catalyst. Different mechanisms of, GEORGE R. LESTER, 187

B

- Benzene to phenylcyclohexane over supported transition metal catalysts. Hydrodimerization of, LYNN H. SLAUGH AND JOHN A. LEONARD, 385

- Bliznakov, Angelov, Mehandjiev. Reply to, E. R. S. WINTER, 340
- Book review. "Experimental Methods in Catalytic Research" edited by R. B. Anderson. Reviewed by JOHN WARD
- 2-Bromobutane on Ni and Pt. Deutero-genolysis and dehydrobromination of, ISAO MATSUZAKI, ROBERT L. BURWELL, JR., AND TSUYOSHI NAKAJIMA, 404
- 2-Bromopropane on Ni and Pd. Deutero-genolysis of, ISAO MATSUZAKI, ROBERT L. BURWELL, JR., AND TSUYOSHI NAKAJIMA, 404
- Brönsted and Lewis acid site concentrations in fluorided alumina from the infrared spectra of adsorbed pyridine species. THOMAS R. HUGHES, HARRY M. WHITE, AND ROBERT J. WHITE, 58
- 1-Butane hydrogenation on supported palladium. Kinetic study of, V. RAGAINI, G. SOMENZI, AND S. CARRA, 20
- 2-Butanol and methyl ethyl ketone. Adsorbed CO₂ and. Infrared studies of hydroxyapatite catalysts. J. A. S. BETT, L. G. CHRISTNER, AND W. K. HALL, 332
- Butanol catalyzed by a cationic-exchange resin. Esterification of oleic acid with, R. TARTARELLI, G. STOPPATO, F. MORELLI, A. LUCCHESI, AND M. GIORGINI, 108
- Butene catalyzed by noble metals and their alloys. Isomerization and dehydrogenation of, S. HENRY INAMI, BERNARD J. WOOD, AND HENRY WISE, 397

C

- Cage effect on product distribution from cracking over crystalline aluminosilicate zeolites. N. Y. CHEN, S. J. LUCKI, AND E. B. MOWER, 329
- Carbon monoxide-¹⁴C from platinum/silica impregnated catalysts. Desorption of, D. CORMACK AND R. L. MOSS, 1
- Carbon monoxide chemisorption on the effective thickness of thin copper films. Influence of oxygen and, I. G. MURGULESCU, N. I. IONESCU, AND G. H. COMSA, 328
- Carbonylation of methanol to acetic acid. Vapor phase, ROBERT G. SCHULTZ AND PHILLIP D. MONTGOMERY, 105
- Cationic-exchange resin. Esterification of oleic acid with butanol catalyzed by a, R. TARTARELLI, G. STOPPATO, F. MORELLI, A. LUCCHESI, AND M. GIORGINI, 108
- Chromia-alumina and platinum-alumina catalysts. Different mechanisms of aromatization of tri-methylpentanes over, GEORGE R. LESTER, 187
- CO₂, 2-butanol and methyl ethyl ketone. Adsorbed. Infrared studies of hydroxyapatite catalysts.

- J. A. S. BETT, L. G. CHRISTNER, AND W. K. HALL, 332
- Cobalt and iron. The reaction of ethylacetylene with hydrogen catalyzed by nickel, R. S. MANN AND K. C. KHULBE, 25
- Condensation of alcohols to high molecular weight ketones. Group VIII metal-catalyzed, B. H. DAVIS AND P. B. VENUTO, 100
- Conjugated polymers. Heterogeneous catalysis on, J. GALLARD-NECHTSCHEN, A. PERCHER-REBOUL, AND PH. TRAYNARD, 261
- Copper films. Influence of oxygen and carbon monoxide chemisorption on the effective thickness of thin, I. G. MURGULESCU, N. I. IONESCU, AND G. H. COMSA, 328
- Copper oxide on alumina. ESR investigations of, HORST LUMBECK AND JÜRGEN VOITLANDER, 117
- Copper powders. On the hyperfine deuterium distribution of the catalytic reaction of propene with deuterium on, KOZO HIROTA, NORITETSU YOSHIDA, SHOUSUKE TERATANI, AND TOYOKI KITAYAMA, 306
- Crystal structure of the zeolite hydrogen faujasite. D. H. OLSON AND E. DEMPSEY, 221
- Cyclohexene catalyzed by ions and oxides of transition metals. Homogeneous vs. heterogeneous catalysis oxidation of liquid, EDWIN S. GOULD AND MADELINE RADO, 238
- D**
- Dehydrogenation of butene catalyzed by noble metals and their alloys. Isomerization and, S. HENRY INAMI, BERNARD J. WOOD, AND HENRY WISE, 397
- Dehydrogenation of isopropyl alcohol over a zinc oxide catalyst. Kinetics of, STEIN KOLBOE, 208
- Deuterium distribution of the catalytic reaction of propene with deuterium on copper powders. On the hyperfine, KOZO HIROTA, NORITETSU YOSHIDA, SHOUSUKE TERATANI, AND TOYOKI KITAYAMA, 306
- Deuteroanalysis of 2-bromopropane on Ni and Pd deuteroanalysis and dehydrobromination of 2-bromobutane on Ni and Pt. ISAO MATSUZAKI, ROBERT L. BURWELL, JR., AND TSUYOSHI NAKAJIMA, 404
- Diene disproportionation reactions. L. F. HECKELSBURG, R. L. BANKS AND G. C. BAILEY, 99
- E**
- ESR investigations of copper oxide on alumina. HORST LUMBECK AND JÜRGEN VOITLANDER, 117
- Esterification of oleic acid with butanol catalyzed by a cationic-exchange resin. R. TARTARELLI, G. STOPPATO, F. MORELLI, A. LUCCHESI, AND M. GIORGINI, 108
- Ethylacetylene with hydrogen catalyzed by nickel, cobalt and iron. The reaction of, R. S. MANN AND K. C. KHULBE, 25
- Ethylene hydrogenation. Catalyst surface coverages of adsorbed species in the nickel-catalyzed, ISAO MATSUZAKI AND AKIO TADA, 215
- Exchange of D₂ with noncyclic olefins over alumina. JOE W. HIGHTOWER AND W. KEITH HALL, 161
- F**
- Faujasite. The crystal structure of the zeolite hydrogen. D. H. OLSON AND E. DEMPSEY, 221
- Fixed-bed catalytic reactors with poison in the feed. Performance of, A. WHEELER AND A. J. ROBELL, 299
- Fluorided alumina. Acid site concentrations in, THOMAS R. HUGHES, HARRY M. WHITE, AND ROBERT J. WHITE, 58
- Formic acid and formate ion dehydrogenation on platinum. Mechanisms and kinetics of aqueous, SIGMUND SCHULDINER AND BERNARD J. PIERSMA, 413
- Formic acid in acetic acid solution. Palladium (II)-catalyzed oxidation of, A. AGUILO, 283
- G**
- Group metal-catalyzed condensation of alcohols to high molecular weight ketones, B. H. DAVIS AND P. B. VENUTO, 100
- H**
- Homogeneous vs. heterogeneous catalysis oxidation of liquid cyclohexene catalyzed by ions and oxides of transition metals. EDWIN S. GOULD AND MADELINE RADO, 238
- Hydrodimerization of benzene to phenylcyclohexane over supported transition metal catalysts. LYNN H. SLAUGH AND JOHN A. LEONARD, 385
- Hydrogen adsorption on nickel face-centered cubic crystal. Quantum chemical estimation of, D. SHOPTOV, A. ANDREEV, AND D. PETKOV, 123
- Hydrogen exchange in the alkylbenzenes using homogeneous platinum catalysts. Isotopic, R. J. HODGES AND J. L. GARNETT, 83
- Hydrogen held by solids XVI. Studies of the. Infrared spectroscopy of X- and Y-type zeolites. J. B. UYTTERHOEVEN, R. SCHOONHEYDT, B. V. LIENGME, AND W. KEITH HALL, 425
- Hydrogen sulfide with unsupported and supported nickel oxide. Kinetics of the reaction of, FRED H. DORER, 65
- Hydrogen uptake on evaporated metal films. Enhanced, M. H. SHERIDAN AND K. C. CAMPBELL, 245
- Hydroxyapatite catalysts. Infrared studies of. Adsorbed CO₂, 2-butanol and methyl ethyl ketone, J. A. S. BETT, L. G. CHRISTNER, AND W. K. HALL, 332

Hyperfine deuterium distribution of the catalytic reaction of propene with deuterium on copper powders. On the, KOZO HIROTA, NORITETSU YOSHIDA, SHOUSUKE TERATANI, AND TOYOKI KITAYAMA, 306

I

Infrared spectra of adsorbed pyridine species in fluorided alumina. THOMAS R. HUGHES, HARRY M. WHITE, AND ROBERT J. WHITE, 58

Infrared spectroscopic studies. The porous structure of self-supporting pressed aerosil discs Part I. A. J. TYLER, F. H. HAMBLETON, AND J. A. HOCKEY, 35

Infrared spectroscopy-pyridine chemisorption The detection of acidity on silica-alumina catalysts by, JOHN W. WARD AND ROWLAND C. HANSFORD, 154

Infrared studies of hydroxyapatite catalysts. Adsorbed CO₂, 2-butanol and methyl ethyl ketone. J. A. S. BETT, L. G. CHRISTNER, AND W. K. HALL, 332

Iron. The reaction of ethylacetylene with hydrogen catalyzed by nickel, cobalt and, R. S. MANN AND K. C. KHULBE, 25

Iron catalyst. Kinetics and isotope effect of ammonia synthesis over an unpromoted, KEN-ICHI AIKA AND ATSUMU OZAKI, 232

Iron oxide in catalyst preparation. Effect of potassium promoter on sintering of, K. SHIBATA AND T. KIYOURA, 103

Isomerization and dehydrogenation of butene catalyzed by noble metals and their alloys. S. HENRY INAMI, BERNARD J. WOOD, AND HENRY WISE, 397

Isopropyl alcohol on a zinc oxide catalyst. Study of the adsorption function of, STEIN KOLBOE, 193, 199

Isotope effect of ammonia synthesis over an unpromoted iron catalyst. Kinetics and, KEN-ICHI AIKA AND ATSUMU OZAKI, 232

Isotopic hydrogen exchange in the alkylbenzenes using homogeneous platinum catalysts. R. J. HODGES AND J. L. GARNETT, 83

K

Kerr, Cattanaach, and Wu. In answer to, SHAO E. TUNG AND EDWARD MCININCH, 115

Ketones. Group VIII metal-catalyzed condensation of alcohols to high molecular weight, B. H. DAVIS AND P. B. VENUTO, 100

Kinetics and isotope effect of ammonia synthesis over an unpromoted iron catalyst. KEN-ICHI AIKA AND ATSUMU OZAKI, 232

Kinetics of dehydrogenation of isopropyl alcohol over a zinc oxide catalyst. STEIN KOLBOE, 208

Kinetics of the reaction of hydrogen sulfide with unsupported and supported nickel oxide. FRED H. DORER, 65

Kinetic study of 1-butene hydrogenation on supported palladium. V. RAGAINI, G. SOMENZI, AND S. CARRA, 20

L

Lewis acid site concentrations in fluorided alumina from the infrared spectra of adsorbed pyridine species. Brönsted and, THOMAS R. HUGHES, HARRY M. WHITE, AND ROBERT J. WHITE, 58

M

Magnetic, adsorption, and catalytic properties of some oxide catalysts. On the correlation between, G. BLIZNAKOV, S. ANGELOV, D. MEHANDJIEV, AND B. DYAKOVA, 337

Mechanisms of aromatization of tri-methylpentanes over chromia-alumina and platinum-alumina catalysts. GEORGE R. LESTER, 187

Mechanism of olefin disproportionation. D. L. CRAIN, 110

Mechanism of the synthesis $\text{CO} + 2\text{H}_2 \rightarrow \text{CH}_3\text{OH}$. J. L. BOROWITZ, 106

Mercury adsorption, catalyst poisoning and reactivation phenomena on metal catalysts. K. C. CAMPBELL AND J. S. HISLOP, 12

Metal catalysts. Hydrodimerization of benzene to phenylcyclohexane over supported transition, LYNN H. SLAUGH AND JOHN A. LEONARD, 385

Metal catalysts. Mercury adsorption, catalyst poisoning and reactivation phenomena on, K. C. CAMPBELL AND J. S. HISLOP, 12

Metal-catalyzed condensation of alcohols to high molecular weight ketones. Group VIII, B. H. DAVIS AND P. B. VENUTO, 100

Metal films. Enhanced hydrogen uptake on evaporated, M. H. SHERIDAN AND K. C. CAMPBELL, 245

Metal films. Relation between catalytic properties and structure of. I. Deuterium exchange of methane, ethane, and propane over nickel. J. R. ANDERSON AND R. J. MACDONALD, 345

Methanol. On the mechanism of the synthesis. J. L. BOROWITZ, 106

Methanol to acetic acid. Vapor phase carbonylation of ethanol to, ROBERT G. SCHULTZ AND PHILLIP D. MONTGOMERY, 105

Method for study of the adsorption function of an adsorbate on an adsorbent, applied to the study of the adsorption function of isopropyl alcohol on a zinc oxide catalyst. STEIN KOLBOE, 193, 199

Methyl ethyl ketone. Adsorbed CO₂, 2-butanol and. Infrared studies of hydroxyapatite catalysts. S. BETT, L. G. CHRISTNER, AND W. K. HALL, 332

MoO₃-Bi₂O₃ catalysts. Influence of the degree of crystallinity and of the composition on the activity of, P. BOUTRY, R. MONTARNAL, AND WRZYSZCZ, 75

N

Nickel. Deuterium exchange of methane, ethane, and propane over. Relation between catalytic properties and structure of metal films. I. J. R. ANDERSON AND R. J. MACDONALD, 345

Nickel-catalyzed ethylene hydrogenation. Catalyst surface coverages of adsorbed species in the, ISAO MATSUZAKI AND AKIO TADA, 215

Nickel, cobalt and iron. The reaction of ethylacetylene with hydrogen catalyzed by, R. S. MANN AND K. C. KHULBE, 25

Nickel face-centered cubic crystal. Quantum chemical estimation of hydrogen adsorption on, D. SHOPOV, A. ANDREEV, AND D. PETKOV, 123

Nickel oxide. Kinetics of the reaction of hydrogen sulfide with unsupported and supported, FRED H. DORER, 65

Nitrogen adsorption studies. The porous structure of self-supporting pressed silica discs II. A. J. TYLER, F. H. HAMBLETON, AND J. A. HOCKEY, 43

Noble metals and their alloys. Isomerization and dehydrogenation of butene catalyzed by, S. HENRY INAMI, BERNARD J. WOOD, AND HENRY WISE, 397

Nonlinear evaluation of kinetic data of heterogeneous catalytic reactions. Application to the hydrogenation of phenol and of cyclohexanone. V. HANČIL, P. MITSCHKA, AND L. BERÁNEK, 435

O

Olefin disproportionation. C. T. ADAMS AND STANLEY G. BRANDERBERGER, 360

Olefin disproportionation. The mechanism of, D. L. CRAIN, 110

Olefins over alumina. Exchange of D₂ with noncyclic, JOE W. HIGHTOWER AND W. KEITH HALL, 161

Olefins with palladium by competitive reaction method. Study of interaction of, Y. MORO-OKA, T. KITAMURA, AND A. OZAKI, 53

Oleic acid with butanol catalyzed by a cationic-exchange resin. Esterification of, R. TARTARELLI, G. STOPPATO, F. MORELLI, A. LUCCHESI, AND M. GIORGINI, 108

Organic conjugated polymers. II. Heterogeneous catalysis on. Electron spin resonance on structural factor. J. GALLARD-NECHTSCHIEIN, A. PERCHER-REBOUL, AND PH. TRAYNARD, 261

Organic polymers: structure and catalytic activity in heterogeneous systems. I. MANASSEN AND SH. KHALIF, 290

Oxidation of liquid cyclohexene catalyzed by ions and oxides of transition metals. Homogeneous vs. heterogeneous catalysis, EDWIN S. GOULD AND MADELINE RADO, 238

Oxidation of propylene by means of SnO₂-MoO₃ catalysts II. J. BUITEN, 373

Oxide catalysts. On the correlation between magnetic, adsorption, and catalytic properties of, G. BLIZNAKOV, S. ANGELOV, D. MEHANDJIEV, AND B. DYAKOVA, 337

Oxygen and carbon monoxide chemisorption on the effective thickness of thin copper films. Influence of, I. G. MURGULESCU, N. I. IONESCU, AND G. H. COMSA, 328

P

Palladium. Kinetic study of 1-butane hydrogenation on supported, V. RAGAINI, G. SOMENZI, AND S. CARRA, 20

Palladium by competitive reaction method. Study of interaction of olefins with, Y. MORO-OKA, T. KITAMURA, AND A. OZAKI, 53

Palladium (II)-catalyzed oxidation of formic acid in acetic acid solution. A. AGUILO, 283

Paraffins on a silica-alumina catalyst. Influence of added-back water vapor on the chemisorption and on the rate of catalytic cracking of, KUN-ICHI MATSUSHITA AND PAUL H. EMMETT, 128

Platinum-alumina catalysts. Different mechanisms of aromatization of tri-methylpentanes over chromia-alumina and, GEORGE R. LESTER, 187

Platinum catalysts. Isotopic hydrogen exchange in the alkylbenzenes using homogeneous, R. J. HODGES AND J. L. GARNETT, 83

Platinum/silica impregnated catalysts. Desorption of carbon monoxide-¹⁴C from D. CORMACK AND R. L. MOSS, 1

Polymers. Heterogeneous catalysis on organic conjugated, J. GALLARD-NECHTSCHIEIN, A. PERCHER-REBOUL, AND PH. TRAYNARD, 261

Potassium promoter on sintering of iron oxide in catalysts preparation. K. SHIBATA AND T. KIYOURA, 103

Propene with deuterium on copper powders. On the hyperfine deuterium distribution of the catalytic reaction of, KŌZO HIROTA, NORITETSU YOSHIDA, SHOUSUKE TERATANI, AND TOYOKI KITAYAMA, 306

Propylene by means of SnO₂-MoO₃ catalysts II. Oxidation of, J. BUITEN, 373

Propylene polymerization. The nature of the sites on silica alumina for, J. N. FINCH AND ALFRED CLARKE, 147

Pyridine species. Infrared spectra of adsorbed in fluorided alumina. THOMAS R. HUGHES, HARRY M. WHITE, AND ROBERT J. WHITE, 58

Q

- Quantum chemical estimation of hydrogen adsorption on nickel face-centered cubic crystal. D. SHOPOV, A. ANDREEV, AND D. PETKOV, 123

S

- Sintering of iron oxide in catalyst preparation. Effect of potassium promoter on, K. SHIBATA AND T. KIYOURA, 103
- Silica-alumina catalyst. Influence of added-back water vapor on the chemisorption and on the rate of catalytic cracking of paraffins on a, KUN-ICHI MATSUSHITA AND PAUL H. EMMETT, 128
- Silica-alumina catalysts by infrared spectroscopy-pyridine chemisorption. The detection of acidity on, JOHN W. WARD AND ROWLAND C. HANSFORD, 154
- Silica-alumina for propylene polymerization. The nature of the sites on, J. N. FINCH AND ALFRED CLARK, 147
- Silica discs II. The porous structure of self-supporting pressed, A. J. TYLER, F. H. HAMBLETON, AND J. A. HOCKEY, 43
- Sites on silica-alumina for propylene polymerization. The nature of the, J. N. FINCH AND ALFRED CLARK, 147
- SnO₂-MoO₃ catalysts II. Oxidation of propylene by means of, J. BUITEN, 373

T

- Tri-methylpentanes over chromia-alumina and platinum-alumina catalyst. Different mechanisms of aromatization of, GEORGE R. LESTER, 187
- Tung and McIninch's "Decationized" Y Zeolite,

A comment on the nature of, G. T. KERR, J. CATTANACH, AND E. L. WU, 114

V

- Vapor phase carbonylation of methanol to acetic acid, ROBERT G. SCHULTZ AND PHILLIP D. MONTGOMERY, 105

W

- Water vapor on the chemisorption and on the rate of catalytic cracking of paraffins on a silica-alumina catalyst. Influence of added-back, KUN-ICHI MATSUSHITA AND PAUL H. EMMETT, 128

Z

- Zinc oxide catalyst. Kinetics of dehydrogenation of isopropyl alcohol over a, STEIN KOLBOE, 208
- Zinc oxide catalyst. Study of the adsorption function of isopropyl alcohol on a, STEIN KOLBOE, 193, 199
- Zeolites. Cage effect on product distribution from cracking over crystalline aluminosilicate, N. Y. CHEN, S. J. LUCKI, AND E. B. MOWER, 329
- Zeolites. VII. The nature of active sites on, ROWLAND C. HANSFORD AND JOHN W. WARD, 316
- Zeolites. VIII. The nature of active sites on. Rare earth Y zeolite. JOHN W. WARD, 321
- Zeolites IX. The nature of active sites on. Sodium hydrogen zeolite. JOHN W. WARD AND ROWLAND C. HANSFORD, 364
- Zeolites containing univalent and divalent cations. Infrared spectroscopy of X- and Y-type, J. B. UYTTERHOEVEN, R. SCHOONHEYDT, B. V. LIENGME, AND W. KEITH HALL, 425
- Zeolite hydrogen faujasite. Crystal structure of the, D. H. OLSON AND E. DEMPSEY, 221
