

ERRATUM

Volume **167**, Number 1 (1997), in the letter to the editor (Article No. CA971597) "Reply to the Comments of Dan Fărcașiu in 'Solid Acids and Acids in Solution: The Reversible Transfer of Hydrons to Carbonyl Groups,'" by R. J. Gorte, David White, A. I. Biaglow, W. E. Farneth, and J. Šepa, pages 300–302: On page 301, in the left column, lines 19–23 should read "One cannot use solution-phase acidity scales and the ability of the zeolite to protonate a particular base, including conjugated ketones like mesityl oxide to infer anything about the ability of the zeolite to protonate another base (13)" instead of "One cannot use solution-phase acidity scales and the ability of the zeolite to protonate a particular base, including corrugated ketones like methyl oxide to infer anything about the ability of the zeolite to protonate another base (13)."

This erratum is Article No. CA971790.
