

## Publisher's note

The Publisher would like to announce the retirement of Professor Daniel Resasco from the *Journal of Catalysis* Board of Editors.

Prof. Resasco joined the board in 2001, taking responsibility for editing a large number of manuscripts. He will continue to handle manuscripts already in process until the end of September 2007.

We would like to thank Prof. Resasco sincerely for his contribution to *Journal of Catalysis* over the last six years, in terms of both editorial work and advising the development of the journal. We look forward to continuing our collaboration with Prof. Resasco as an editorial board member of the journal.

We would also like to announce the appointment of Professor S. Ted Oyama to the *Journal of Catalysis* editorial team from July 2007.

Ted is currently Fred W. Bull Professor of Chemical Engineering and Professor of Chemistry at Virginia Polytechnic Institute and State University in Blacksburg. He received a double B.S. degree in Chemistry and Engineering & Applied Science from Yale University in 1976 and obtained his Ph.D. in Chemical Engineering from Stanford University in 1981.

Ted's research interests include surface reactivity and surface science, kinetics, solid state chemistry, and the design, synthesis, and characterization of advanced catalytic materials and inorganic membranes.

Ted has co-authored more than 170 peer-reviewed papers and has presented over 270 invited lectures at universities and industries. He is also an active member of many scientific and professional societies. We wish Ted much success in his new position.
