

EDITORIAL NOTE

The Editors and publishers of the Journal are anxious to reduce publication times to a minimum and are pleased to announce that, with the advent of desk top publishing facilities, we can now accept MSS in the form of laser printed camera ready copy.

Full details of the preparation of these copies can be obtained from the Editorial Office. MSS submitted as camera ready copy, but not in the correct format, will be typeset in the usual manner. An example of a paper prepared as camera ready copy can be found on page 389 of this issue.
