## **ANNOUNCEMENT**

**15TH INTERNATIONAL SYMPOSIUM, EXHIBIT, AND  
WORKSHOPS ON PREPARATIVE/PROCESS  
CHROMATOGRAPHY (PREP-2002),  
JUNE 16–19, 2002, RENAISSANCE HOTEL,  
WASHINGTON, DC, USA**

This symposium series, which alternates between Washington, DC, and San Francisco, California, is the premier forum for presenting new advances and applications in the areas of process chromatography; ion exchange processes; bulk adsorption operations; simulated moving bed; and related separation and isolation technologies.

Topics included in the extensive program are manufacturing issues; validation in process chromatography; process economics; industrial applications; recombinant technology; peptide/protein purification; drugs/biopolymers; chiral separations; column technologies; innovative instrumentation; simulated moving bed; displacement & elution chromatography, and other operating modes; low and high pressure applications; process optimization; and case studies.

In addition to the oral presentations, the symposium will include posters, Sunday workshops, vendor workshops, and exhibits. The Sunday workshops will cover process chromatography from economics, to fundamentals, to regulatory issues. Vendors will have an opportunity to present one-hour workshops as part of the program.

Participants will have ample opportunity to meet commercial suppliers who will feature state-of-the-art instrumentation, media, and columns in the closely integrated lecture and poster/trade display areas.
