

Subject index

Alcohol oxidation

The catalysed synthesis of symmetrical ketones from alcohols (Plint, N.D. (165) 275)

Alkylation

Regioselective C–C bond formation between ethylene and α -naphthylcarbaldimines catalyzed by $\text{Ru}_3(\text{Co})_{12}$: NMR spectroscopic investigations on the proceeding of the reaction (Berger, D. (165) 37)

Direct immobilization of chiral auxiliaries on mineral supports and heterogeneous enantioselective alkylation of benzaldehyde with diethylzinc (Abramson, S. (165) 231)

α -Alkylthioacetamides

Iron(II) ion-catalysed synthesis of α -aryl and α -alkylthioacetamides (Murguía, M.C. (165) 113)

Alumina

Photo-oxidation of cyclohexane over alumina-supported vanadium oxide catalyst (Teramura, K. (165) 299)

Aluminum

Palladium-catalyzed cross-methylation of aryl triflates by intramolecularly stabilized dialkyl-aluminum, -gallium and -indium reagents (Blum, J. (165) 97)

Amino acid esters

Shape- and stereo-selective esterase activities of cross-linked polymers imprinted with a transition-state analogue for the hydrolysis of amino acid esters (Ohkubo, K. (165) 1)

Ammonia synthesis

The effect of Co and Ir on the activity of the $\text{K}_2[\text{Fe}_2(\text{CO})_8]$ - and $\text{K}_2[\text{Ru}_4(\text{CO})_{13}]$ -based systems in ammonia synthesis.. The synergistic acceleration of the ammonia synthesis over the $\text{K}_2[\text{Fe}_2(\text{CO})_8] + \text{K}$ catalysts by iridium (Yunusov, S.M. (165) 141)

Amorphous alloy

Preparation and characterization of MCM-41 and silica supported nickel boride catalysts (Wong, S.-T. (165) 159)

Anionic iron and ruthenium carbonyl clusters

The effect of Co and Ir on the activity of the $\text{K}_2[\text{Fe}_2(\text{CO})_8]$ - and $\text{K}_2[\text{Ru}_4(\text{CO})_{13}]$ -based systems in ammonia synthesis.. The synergistic acceleration of the ammonia synthesis over the $\text{K}_2[\text{Fe}_2(\text{CO})_8] + \text{K}$ catalysts by iridium (Yunusov, S.M. (165) 141)

Artificial enzymes

Remarkable cooperative action of two zinc centers in the hydrolysis of plasmid DNA (Nihan Aka, F. (165) 291)

α -Arylthioacetamides

Iron(II) ion-catalysed synthesis of α -aryl and α -alkylthioacetamides (Murguía, M.C. (165) 113)

Aryl triflates

Palladium-catalyzed cross-methylation of aryl triflates by intramolecularly stabilized dialkyl-aluminum, -gallium and -indium reagents (Blum, J. (165) 97)

Asymmetric catalysis

Asymmetric cyclopropanation catalyzed by copper–Schiff's base complexes (Li, Z. (165) 67)

Asymmetric reactions

Asymmetric Mn(III)-salen catalyzed epoxidation of unfunctionalized alkenes with in situ generated peroxycarboxylic acids (Pietikäinen, P. (165) 73)

Base catalysis

The catalysed synthesis of symmetrical ketones from alcohols (Plint, N.D. (165) 275)

Benzene hydrogenation

Preparation and characterization of MCM-41 and silica supported nickel boride catalysts (Wong, S.-T. (165) 159)

Benzene

Oxidation of benzene with *tert*-butylhydroperoxide catalyzed by a novel $[\text{Ru}^{\text{III}}(\text{amp})(\text{bipy})(\text{H}_2\text{O})]^+$ complex: first report of homogeneously catalyzed oxo-transfer reaction in benzene oxidation (Chatterjee, D. (165) 295)

Benzil

$\text{H}_{3+n}\text{PMo}_{12-n}\text{V}_n\text{O}_{40}$ -catalyzed selective oxidation of benzoin to benzils or aldehydes and esters by dioxygen (El Ali, B. (165) 283)

Benzoin

$\text{H}_{3+n}\text{PMo}_{12-n}\text{V}_n\text{O}_{40}$ -catalyzed selective oxidation of benzoin to benzils or aldehydes and esters by dioxygen (El Ali, B. (165) 283)

Benzoquinones

Aerobic oxidation of substituted phenols catalysed by metal acetylacetonates in the presence of 3-methylbutanal (Mastrorilli, P. (165) 81)

Benzylic alcohols

Homogeneous and heterogeneous catalytic oxidation of benzylic and secondary alcohols with a metal dioxigenato complex in the presence of 2-methylpropanal and dioxygen (Cicco, S.R. (165) 135)

Binuclear metal complexes

Remarkable cooperative action of two zinc centers in the hydrolysis of plasmid DNA (Nihan Aka, F. (165) 291)

Biphenols

Aerobic oxidation of substituted phenols catalysed by metal acetylacetonates in the presence of 3-methylbutanal (Mastrorilli, P. (165) 81)

Bis(oxazoline)

Bis(oxazoline)-metal complexes immobilised by electrostatic interactions as heterogeneous catalysts for enantioselective Diels–Alder reactions (Fraile, J.M. (165) 211)

t-BuOOH

Oxidation of benzene with *tert*-butylhydroperoxide catalyzed by a novel $[\text{Ru}^{\text{III}}(\text{amp})(\text{bipy})(\text{H}_2\text{O})]^+$ complex: first report of homogeneously catalyzed oxo-transfer reaction in benzene oxidation (Chatterjee, D. (165) 295)

tert-Butyl hydroperoxide

Activity, selectivity and stability of metallosilicates containing molybdenum for the epoxidation of alkenes (Arnold, U. (165) 149)

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

C–C bond formation

Regioselective C–C bond formation between ethylene and α -naphthylcarbaldimines catalyzed by $\text{Ru}_3(\text{Co})_{12}$: NMR spectroscopic investigations on the proceeding of the reaction (Berger, D. (165) 37)

C–H activation

Regioselective C–C bond formation between ethylene and α -naphthylcarbaldimines catalyzed by $\text{Ru}_3(\text{Co})_{12}$: NMR spectroscopic investigations on the proceeding of the reaction (Berger, D. (165) 37)

Carbon dioxide

Application of the impulse oscillation model for modelling the formation of peroxocarbonates via carbon dioxide reaction with dioxygen transition metal complexes. A comparison with the experimental results obtained for $\text{Rh}(\eta^2\text{-O}_2)\text{ClP}_3$ [P = phosphane ligand] (Borowiak, M.A. (165) 45)

Carbon

Effect of HCl acid on the hydrodechlorination of chlorobenzene over palladium supported catalysts (Angel, G. Del (165) 9)

Catalysis

Catalysis of lanthanides deposited on oxide from Eu or Yb metal solutions in liquid ammonia (Imamura, H. (165) 189)

Catalyst

Ionic liquid as a green catalytic reaction medium for esterifications (Deng, Y. (165) 33)

Asymmetric Mn(III)-salen catalyzed epoxidation of unfunctionalized alkenes with in situ generated peroxycarboxylic acids (Pietikäinen, P. (165) 73)

Bis(oxazoline)-metal complexes immobilised by electrostatic interactions as heterogeneous catalysts for enantioselective Diels–Alder reactions (Fraile, J.M. (165) 211)

Catalytic oxidation

Aerobic oxidation of substituted phenols catalysed by metal acetylacetonates in the presence of 3-methylbutanal (Mastrorilli, P. (165) 81)

Catalytic synthesis (of)

Iron(II) ion-catalysed synthesis of α -aryl and α -alkylthioacetyl amides (Murguía, M.C. (165) 113)

Cerium oxide

The catalysed synthesis of symmetrical ketones from alcohols (Plint, N.D. (165) 275)

Chemically modified electrodes

Electrochemical behavior of lead–ruthenium oxide pyrochlore catalyst: redox characteristics in comparison with that of ruthenium dioxide (Zen, J.-M. (165) 177)

Chlorobenzene

Effect of HCl acid on the hydrodechlorination of chlorobenzene over palladium supported catalysts (Angel, G. Del (165) 9)

Cis–trans isomerization

Hydrogenation of palm olein catalyzed by polymer stabilized Pt colloids (Choo, H.P. (165) 127)

CO hydrogenation

Hydrogenation of CO over $\text{Rh/SiO}_2\text{–CeO}_2$ catalysts: kinetic evidences (Mazzocchia, C. (165) 219)

Cobalt

The effect of Co and Ir on the activity of the $\text{K}_2[\text{Fe}_2(\text{CO})_8]$ - and $\text{K}_2[\text{Ru}_4(\text{CO})_{13}]$ -based systems in ammonia synthesis.. The synergistic acceleration of the ammonia synthesis over the $\text{K}_2[\text{Fe}_2(\text{CO})_8] + \text{K}$ catalysts by iridium (Yunusov, S.M. (165) 141)

Colloidal CdS–TiO₂

Photophysics and photochemistry of colloidal CdS–TiO₂ coupled semiconductors — photocatalytic oxidation of indole (Kumar, A. (165) 265)

Cooperativity

Remarkable cooperative action of two zinc centers in the hydrolysis of plasmid DNA (Nihan Aka, F. (165) 291)

Cross-coupling

Palladium-catalyzed cross-methylation of aryl triflates by intramolecularly stabilized dialkyl-aluminum, -gallium and -indium reagents (Blum, J. (165) 97)

Crotyl alcohol oxidation

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

Cyanide bridged transition metal complex

Application of $\{(\text{DMF})_{10}\text{Ln}_2[\text{Pd}(\text{CN})_4]_3\}_\infty$ (Ln = Yb, Sm) as lanthanide–palladium catalyst precursors dispersed on sol–gel–TiO₂ in the reduction of NO by methane in the presence of oxygen (Rath, A. (165) 103)

Cycloaddition

Consecutive Stille-coupling–hydrosilylation–Diels–Alder reaction of 17-iodo-5 α -androst-16-ene (Jeges, G. (165) 89)

Cyclohexane

Photo-oxidation of cyclohexane over alumina-supported vanadium oxide catalyst (Teramura, K. (165) 299)

Cyclopropanation

Asymmetric cyclopropanation catalyzed by copper–Schiff's base complexes (Li, Z. (165) 67)

Diastereoselectivity

Diastereoselective hydroalkoxycarbonylation of terpenes and vinyl-estrone (Benedek, C. (165) 15)

Diazoacetate

Asymmetric cyclopropanation catalyzed by copper–Schiff's base complexes (Li, Z. (165) 67)

Diels–Alder

Bis(oxazoline)-metal complexes immobilised by electrostatic interactions as heterogeneous catalysts for enantioselective Diels–Alder reactions (Fraile, J.M. (165) 211)

Dioxygen complexes

Application of the impulse oscillation model for modelling the formation of peroxocarbonates via carbon dioxide reaction with dioxygen transition metal complexes. A comparison with the experimental results obtained for $\text{Rh}(\eta^2\text{-O}_2)\text{ClP}_3$ [P = phosphane ligand] (Borowiak, M.A. (165) 45)

Diphenoquinones

Aerobic oxidation of substituted phenols catalysed by metal acetylacetonates in the presence of 3-methylbutanal (Mastrorilli, P. (165) 81)

DNA hydrolysis

Remarkable cooperative action of two zinc centers in the hydrolysis of plasmid DNA (Nihan Aka, F. (165) 291)

DRIFT

Synthesis, characterization and ethanol partial oxidation studies of V_2O_5 catalysts supported on $\text{TiO}_2\text{-SiO}_2$ and $\text{TiO}_2\text{-ZrO}_2$ sol-gel mixed oxides (Lakshmi, J.L. (165) 199)

Electrocatalytic hydrazine oxidation

Electrocatalytic oxidation of hydrazine at polymeric iron-tetraaminophthalocyanine modified electrodes (Ardiles, P. (165) 169)

Electrocatalytic mechanism

Electrocatalytic oxidation of hydrazine at polymeric iron-tetraaminophthalocyanine modified electrodes (Ardiles, P. (165) 169)

Epoxidation

Asymmetric Mn(III)-salen catalyzed epoxidation of unfunctionalized alkenes with in situ generated peroxycarboxylic acids (Pietikäinen, P. (165) 73)

Activity, selectivity and stability of metallosilicates containing molybdenum for the epoxidation of alkenes (Arnold, U. (165) 149)

Esterase

Shape- and stereo-selective esterase activities of cross-linked polymers imprinted with a transition-state analogue for the hydrolysis of amino acid esters (Ohkubo, K. (165) 1)

Esterification

Ionic liquid as a green catalytic reaction medium for esterifications (Deng, Y. (165) 33)

Ethanol oxidation

Synthesis, characterization and ethanol partial oxidation studies of V_2O_5 catalysts supported on $\text{TiO}_2\text{-SiO}_2$ and $\text{TiO}_2\text{-ZrO}_2$ sol-gel mixed oxides (Lakshmi, J.L. (165) 199)

Ethylene polymerization

Heterogeneous metallocene catalysts for ethylene polymerization (Köpl, A. (165) 23)

Europium

Catalysis of lanthanides deposited on oxide from Eu or Yb metal solutions in liquid ammonia (Imamura, H. (165) 189)

Ferrous ion catalysts

Iron(II) ion-catalysed synthesis of α -aryl and α -alkylthioacetyl amides (Murguía, M.C. (165) 113)

FTIR spectroscopy

A transient FTIR study of species formed during NO_x storage in the Pt/BaO/ Al_2O_3 system (Westerberg, B. (165) 249)

Gallium

Palladium-catalyzed cross-methylation of aryl triflates by intramolecularly stabilized dialkyl-aluminum, -gallium and -indium reagents (Blum, J. (165) 97)

HCl effect

Effect of HCl acid on the hydrodechlorination of chlorobenzene over palladium supported catalysts (Angel, G. Del (165) 9)

Heck reaction

Functionalised microgels: novel stabilisers for catalytically active metal colloids (Biffis, A. (165) 303)

Heterogeneous enantioselective catalysis

Direct immobilization of chiral auxiliaries on mineral supports and heterogeneous enantioselective alkylation of benzaldehyde with diethylzinc (Abramson, S. (165) 231)

Heteropolyacids

$\text{H}_{3+n}\text{PMo}_{12-n}\text{V}_n\text{O}_{40}$ -catalyzed selective oxidation of benzoin to benzils or aldehydes and esters by dioxygen (El Ali, B. (165) 283)

High activity

Heterogeneous metallocene catalysts for ethylene polymerization (Köpl, A. (165) 23)

High dispersion

Photo-oxidation of cyclohexane over alumina-supported vanadium oxide catalyst (Teramura, K. (165) 299)

Histidine

Shape- and stereo-selective esterase activities of cross-linked polymers imprinted with a transition-state analogue for the hydrolysis of amino acid esters (Ohkubo, K. (165) 1)

Homogeneous reaction

$\text{H}_{3+n}\text{PMo}_{12-n}\text{V}_n\text{O}_{40}$ -catalyzed selective oxidation of benzoin to benzils or aldehydes and esters by dioxygen (El Ali, B. (165) 283)

Hydroalkoxycarbonylation

Diastereoselective hydroalkoxycarbonylation of terpenes and vinyl-estrone (Benedek, C. (165) 15)

Hydrodechlorination

Effect of HCl acid on the hydrodechlorination of chlorobenzene over palladium supported catalysts (Angel, G. Del (165) 9)

Hydrogen peroxide

Asymmetric Mn(III)-salen catalyzed epoxidation of unfunctionalized alkenes with in situ generated peroxycarboxylic acids (Pietikäinen, P. (165) 73)

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

Hydrogenation

Hydrogenation of palm olein catalyzed by polymer stabilized Pt colloids (Choo, H.P. (165) 127)

Hydrosilylation

Consecutive Stille-coupling-hydrosilylation-Diels-Alder reaction of 17-iodo-5 α -androst-16-ene (Jeges, G. (165) 89)

Impulse oscillation model (IOM)

Application of the impulse oscillation model for modelling the formation of peroxocarbonates via carbon dioxide reaction with dioxygen transition metal complexes. A comparison with the experimental results obtained for $\text{Rh}(\eta^2\text{-O}_2)\text{ClP}_3$ [P = phosphane ligand] (Borowiak, M.A. (165) 45)

Indium

Palladium-catalyzed cross-methylation of aryl triflates by intramolecularly stabilized dialkyl-aluminum, -gallium and -indium reagents (Blum, J. (165) 97)

Ionic liquid

Ionic liquid as a green catalytic reaction medium for esterifications (Deng, Y. (165) 33)

Iridium

The effect of Co and Ir on the activity of the $K_2[Fe_2(CO)_8]$ - and $K_2[Ru_4(CO)_{13}]$ -based systems in ammonia synthesis.. The synergistic acceleration of the ammonia synthesis over the $K_2[Fe_2(CO)_8] + K$ catalysts by iridium (Yunusov, S.M. (165) 141)

Iron-thioamide enolate complexes

Iron(II) ion-catalysed synthesis of α -aryl and α -alkylthioacylamides (Murguía, M.C. (165) 113)

Isomerization

Consecutive Stille-coupling-hydrosilylation-Diels-Alder reaction of 17-iodo-5 α -androst-16-ene (Jeges, G. (165) 89)

Ketone

The catalysed synthesis of symmetrical ketones from alcohols (Plint, N.D. (165) 275)

Kinetic

Kinetic investigation of ethylene polymerization catalyzed by nickel-diimine catalysts (Simon, L.C. (165) 55)

Hydrogenation of CO over Rh/SiO₂-CeO₂ catalysts: kinetic evidences (Mazzocchi, C. (165) 219)

Lanthanide

Catalysis of lanthanides deposited on oxide from Eu or Yb metal solutions in liquid ammonia (Imamura, H. (165) 189)

Lanthanide-palladium

Application of $\{(DMF)_{10}Ln_2[Pd(CN)_4]_3\}_\infty$ (Ln = Yb, Sm) as lanthanide-palladium catalyst precursors dispersed on sol-gel-TiO₂ in the reduction of NO by methane in the presence of oxygen (Rath, A. (165) 103)

Lead-ruthenium oxide pyrochlore

Electrochemical behavior of lead-ruthenium oxide pyrochlore catalyst: redox characteristics in comparison with that of ruthenium dioxide (Zen, J.-M. (165) 177)

Liquid ammonia

Catalysis of lanthanides deposited on oxide from Eu or Yb metal solutions in liquid ammonia (Imamura, H. (165) 189)

Magnesium oxide

The catalysed synthesis of symmetrical ketones from alcohols (Plint, N.D. (165) 275)

MCM-41

Preparation and characterization of MCM-41 and silica supported nickel boride catalysts (Wong, S.-T. (165) 159)

Mesoporous silica

Direct immobilization of chiral auxiliaries on mineral supports and heterogeneous enantioselective alkylation of benzaldehyde with diethylzinc (Abramson, S. (165) 231)

Metal β -diketonates

Homogeneous and heterogeneous catalytic oxidation of benzylic and secondary alcohols with a metal dioxygenato complex in the presence of 2-methylpropanal and dioxygen (Cicco, S.R. (165) 135)

Metal colloids

Functionalised microgels: novel stabilisers for catalytically active metal colloids (Biffis, A. (165) 303)

Metallocene catalysts

Heterogeneous metallocene catalysts for ethylene polymerization (Köpl, A. (165) 23)

Metallasilicates

Activity, selectivity and stability of metallasilicates containing molybdenum for the epoxidation of alkenes (Arnold, U. (165) 149)

Methane

Application of $\{(DMF)_{10}Ln_2[Pd(CN)_4]_3\}_\infty$ (Ln = Yb, Sm) as lanthanide-palladium catalyst precursors dispersed on sol-gel-TiO₂ in the reduction of NO by methane in the presence of oxygen (Rath, A. (165) 103)

Microgels

Functionalised microgels: novel stabilisers for catalytically active metal colloids (Biffis, A. (165) 303)

MnO

Catalysis of lanthanides deposited on oxide from Eu or Yb metal solutions in liquid ammonia (Imamura, H. (165) 189)

Modified electrodes

Electrocatalytic oxidation of hydrazine at polymeric iron-tetraaminophthalocyanine modified electrodes (Ardiles, P. (165) 169)

Molecularly imprinted polymer

Shape- and stereo-selective esterase activities of cross-linked polymers imprinted with a transition-state analogue for the hydrolysis of amino acid esters (Ohkubo, K. (165) 1)

Molybdenum

Activity, selectivity and stability of metallasilicates containing molybdenum for the epoxidation of alkenes (Arnold, U. (165) 149)

Monoterpenes

Diastereoselective hydroalkoxycarbonylation of terpenes and vinyl-estrone (Benedek, C. (165) 15)

NH₄OH effect

Effect of HCl acid on the hydrodechlorination of chlorobenzene over palladium supported catalysts (Angel, G. Del (165) 9)

Nickel boride

Preparation and characterization of MCM-41 and silica supported nickel boride catalysts (Wong, S.-T. (165) 159)

Nickel-diimine

Kinetic investigation of ethylene polymerization catalyzed by nickel-diimine catalysts (Simon, L.C. (165) 55)

NO reduction

Application of $\{(DMF)_{10}Ln_2[Pd(CN)_4]_3\}_\infty$ (Ln = Yb, Sm) as lanthanide-palladium catalyst precursors dispersed on sol-gel-TiO₂ in the reduction of NO by methane in the presence of oxygen (Rath, A. (165) 103)

NO_x reduction

A transient FTIR study of species formed during NO_x storage in the Pt/BaO/Al₂O₃ system (Westerberg, B. (165) 249)

NO_x storage

A transient FTIR study of species formed during NO_x storage in the Pt/BaO/Al₂O₃ system (Westerberg, B. (165) 249)

Olefin insertion

Regioselective C–C bond formation between ethylene and α -naphthylcarbaldimines catalyzed by Ru₃(CO)₁₂: NMR spectroscopic investigations on the proceeding of the reaction (Berger, D. (165) 37)

Oxidation

Homogeneous and heterogeneous catalytic oxidation of benzylic and secondary alcohols with a metal dioxygenato complex in the presence of 2-methylpropanal and dioxygen (Cicco, S.R. (165) 135)

H_{3+n}PMo_{12-n}V_nO₄₀-catalyzed selective oxidation of benzoin to benzils or aldehydes and esters by dioxygen (El Ali, B. (165) 283)

Oxidative cleavage

H_{3+n}PMo_{12-n}V_nO₄₀-catalyzed selective oxidation of benzoin to benzils or aldehydes and esters by dioxygen (El Ali, B. (165) 283)

Oxo transfer catalysis

Oxidation of benzene with *tert*-butylhydroperoxide catalyzed by a novel [Ru^{III}(amp)(bipy)(H₂O)]⁺ complex: first report of homogeneously catalyzed oxo-transfer reaction in benzene oxidation (Chatterjee, D. (165) 295)

Palladium catalysts

Palladium-catalyzed cross-methylation of aryl triflates by intramolecularly stabilized dialkyl-aluminum, -gallium and -indium reagents (Blum, J. (165) 97)

Palladium

Diastereoselective hydroalkoxycarbonylation of terpenes and vinyl-estrone (Benedek, C. (165) 15)
Functionalised microgels: novel stabilisers for catalytically active metal colloids (Biffis, A. (165) 303)

Palm olein

Hydrogenation of palm olein catalyzed by polymer stabilized Pt colloids (Choo, H.P. (165) 127)

Pd catalysts

Effect of HCl acid on the hydrodechlorination of chlorobenzene over palladium supported catalysts (Angel, G. Del (165) 9)

Peroxocarbonato-complexes

Application of the impulse oscillation model for modelling the formation of peroxocarbonates via carbon dioxide reaction with dioxygen transition metal complexes. A comparison with the experimental results obtained for Rh(η^2 -O₂)CIP₃ [P = phosphane ligand] (Borowiak, M.A. (165) 45)

Peroxyacids

Asymmetric Mn(III)-salen catalyzed epoxidation of unfunctionalized alkenes with in situ generated peroxycarboxylic acids (Pietikäinen, P. (165) 73)

Phase transfer catalysis

Halogenation of terminal acetylenes by perhalogenoalkanes under phase transfer catalysis conditions (Abele, E. (165) 121)

Phenol

Oxidation of benzene with *tert*-butylhydroperoxide catalyzed by a novel [Ru^{III}(amp)(bipy)(H₂O)]⁺ complex: first report of homogeneously catalyzed oxo-transfer reaction in benzene oxidation (Chatterjee, D. (165) 295)

Photocatalyst

Photo-oxidation of cyclohexane over alumina-supported vanadium oxide catalyst (Teramura, K. (165) 299)

Photocatalytic oxidation of indole

Photophysics and photochemistry of colloidal CdS–TiO₂ coupled semiconductors — photocatalytic oxidation of indole (Kumar, A. (165) 265)

Photophysics of Q-CdS–TiO₂

Photophysics and photochemistry of colloidal CdS–TiO₂ coupled semiconductors — photocatalytic oxidation of indole (Kumar, A. (165) 265)

PHT

Heterogeneous metallocene catalysts for ethylene polymerization (Köpl, A. (165) 23)

Poly-Fe-tetraaminophthalocyanine

Electrocatalytic oxidation of hydrazine at polymeric iron-tetraaminophthalocyanine modified electrodes (Ardiles, P. (165) 169)

Polyethylene

Kinetic investigation of ethylene polymerization catalyzed by nickel-diimine catalysts (Simon, L.C. (165) 55)

Polymerization

Kinetic investigation of ethylene polymerization catalyzed by nickel-diimine catalysts (Simon, L.C. (165) 55)

Promoter

Hydrogenation of CO over Rh/SiO₂–CeO₂ catalysts: kinetic evidences (Mazzocchia, C. (165) 219)

Pt nano-cluster

Hydrogenation of palm olein catalyzed by polymer stabilized Pt colloids (Choo, H.P. (165) 127)

Pt/BaO/Al₂O₃ system

A transient FTIR study of species formed during NO_x storage in the Pt/BaO/Al₂O₃ system (Westerberg, B. (165) 249)

Rh/SiO₂–CeO₂ catalysts

Hydrogenation of CO over Rh/SiO₂–CeO₂ catalysts: kinetic evidences (Mazzocchia, C. (165) 219)

Rhodium-complexes

Application of the impulse oscillation model for modelling the formation of peroxocarbonates via carbon dioxide reaction with dioxygen transition metal complexes. A comparison with the experimental results obtained for Rh(η^2 -O₂)CIP₃ [P = phosphane ligand] (Borowiak, M.A. (165) 45)

Ruthenium complex

Oxidation of benzene with *tert*-butylhydroperoxide catalyzed by a novel [Ru^{III}(amp)(bipy)(H₂O)]⁺ complex: first report of homogeneously catalyzed oxo-transfer reaction in benzene oxidation (Chatterjee, D. (165) 295)

Ruthenium dioxide

Electrochemical behavior of lead–ruthenium oxide pyrochlore catalyst: redox characteristics in comparison with that of ruthenium dioxide (Zen, J.-M. (165) 177)

Ruthenium

Regioselective C–C bond formation between ethylene and α -naphthylcarbaldimines catalyzed by $\text{Ru}_3(\text{Co})_{12}$: NMR spectroscopic investigations on the proceeding of the reaction (Berger, D. (165) 37)

Schiff base Cu(II) complex

Asymmetric cyclopropanation catalyzed by copper–Schiff's base complexes (Li, Z. (165) 67)

Secondary alcohols

Homogeneous and heterogeneous catalytic oxidation of benzylic and secondary alcohols with a metal dioxygenato complex in the presence of 2-methylpropanal and dioxygen (Cicco, S.R. (165) 135)

Semiempirical AM1 method

Halogenation of terminal acetylenes by perhalogenoalkanes under phase transfer catalysis conditions (Abele, E. (165) 121)

Sodium borohydride

Preparation and characterization of MCM-41 and silica supported nickel boride catalysts (Wong, S.-T. (165) 159)

Sol–gel mixed oxides

Synthesis, characterization and ethanol partial oxidation studies of V_2O_5 catalysts supported on TiO_2 – SiO_2 and TiO_2 – ZrO_2 sol–gel mixed oxides (Lakshmi, J.L. (165) 199)

Sol–gel process

Activity, selectivity and stability of metallosilicates containing molybdenum for the epoxidation of alkenes (Arnold, U. (165) 149)

Sol–gel

Application of $\{(\text{DMF})_{10}\text{Ln}_2[\text{Pd}(\text{CN})_4]_3\}_\infty$ ($\text{Ln} = \text{Yb}, \text{Sm}$) as lanthanide–palladium catalyst precursors dispersed on sol–gel– TiO_2 in the reduction of NO by methane in the presence of oxygen (Rath, A. (165) 103)

Solid-state NMR

Synthesis, characterization and ethanol partial oxidation studies of V_2O_5 catalysts supported on TiO_2 – SiO_2 and TiO_2 – ZrO_2 sol–gel mixed oxides (Lakshmi, J.L. (165) 199)

Steroid

Diastereoselective hydroalkoxycarbonylation of terpenes and vinyl-estrone (Benedek, C. (165) 15)
Consecutive Stille-coupling–hydrosilylation–Diels–Alder reaction of 17-iodo-5 α -androst-16-ene (Jeges, G. (165) 89)

Styrene

Asymmetric cyclopropanation catalyzed by copper–Schiff's base complexes (Li, Z. (165) 67)

Substituted phenols

Aerobic oxidation of substituted phenols catalysed by metal acetylacetonates in the presence of 3-methylbutanal (Mastrorilli, P. (165) 81)

Supported aminoalcohols

Direct immobilization of chiral auxiliaries on mineral supports

and heterogeneous enantioselective alkylation of benzaldehyde with diethylzinc (Abramson, S. (165) 231)

Supported catalysts

The effect of Co and Ir on the activity of the $\text{K}_2[\text{Fe}_2(\text{CO})_8]$ - and $\text{K}_2[\text{Ru}_4(\text{CO})_{13}]$ -based systems in ammonia synthesis.. The synergistic acceleration of the ammonia synthesis over the $\text{K}_2[\text{Fe}_2(\text{CO})_8] + \text{K}$ catalysts by iridium (Yunusov, S.M. (165) 141)

Supported metals

Homogeneous and heterogeneous catalytic oxidation of benzylic and secondary alcohols with a metal dioxygenato complex in the presence of 2-methylpropanal and dioxygen (Cicco, S.R. (165) 135)

Supported vanadium oxide

Photo-oxidation of cyclohexane over alumina-supported vanadium oxide catalyst (Teramura, K. (165) 299)

Surface nitrates

A transient FTIR study of species formed during NO_x storage in the $\text{Pt/BaO/Al}_2\text{O}_3$ system (Westerberg, B. (165) 249)

Surface nitrites

A transient FTIR study of species formed during NO_x storage in the $\text{Pt/BaO/Al}_2\text{O}_3$ system (Westerberg, B. (165) 249)

Synergism

The effect of Co and Ir on the activity of the $\text{K}_2[\text{Fe}_2(\text{CO})_8]$ - and $\text{K}_2[\text{Ru}_4(\text{CO})_{13}]$ -based systems in ammonia synthesis.. The synergistic acceleration of the ammonia synthesis over the $\text{K}_2[\text{Fe}_2(\text{CO})_8] + \text{K}$ catalysts by iridium (Yunusov, S.M. (165) 141)

Tandem reactions

Consecutive Stille-coupling–hydrosilylation–Diels–Alder reaction of 17-iodo-5 α -androst-16-ene (Jeges, G. (165) 89)

Terminal acetylenes

Halogenation of terminal acetylenes by perhalogenoalkanes under phase transfer catalysis conditions (Abele, E. (165) 121)

Ti- β

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

Ti-Al β

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

Ti-Al-MCM- 41

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

Ti-grafted- MCM-41

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

Ti-leaching

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

Ti-MCM-41

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts (Davies, L.J. (165) 243)

Transition state analogue

Shape- and stereo-selective esterase activities of cross-linked polymers imprinted with a transition-state analogue for the hydrolysis of amino acid esters (Ohkubo, K. (165) 1)

TS-1

Oxidation of crotyl alcohol using Ti- β and Ti-MCM-41 catalysts
(Davies, L.J. (165) 243)

Vanadia catalysts

Synthesis, characterization and ethanol partial oxidation studies
of V_2O_5 catalysts supported on TiO_2 - SiO_2 and TiO_2 - ZrO_2 sol-
gel mixed oxides (Lakshmi, J.L. (165) 199)

Vanadium

$H_{3+n}PMo_{12-n}V_nO_{40}$ -catalyzed selective oxidation of benzoin
to benzils or aldehydes and esters by dioxygen (El Ali, B. (165)
283)

Ytterbium

Catalysis of lanthanides deposited on oxide from Eu or Yb metal
solutions in liquid ammonia (Imamura, H. (165) 189)
