## Subject Index

### Alkaline soluble lignins

Biobleaching of pulp with dioxygen in the laccase-mediator system — reaction mechanisms for degradation of residual lignin 1

### Amine oxidase

Catalysis by amine oxidases in nonaqueous media 69

### Arthrobacter

A new enzymatic method of stereoselective oxidation of racemic 1,2-indandiols 27

### *Bacillus* megaterium.

Biocatalytic preparation of (S)-phenyl glycidyl ether using newly isolated *Bacillus* megaterium. ECU1001 61

### Biobleaching

Biobleaching of pulp with dioxygen in the laccase-mediator system — reaction mechanisms for degradation of residual lignin 1

### Bioreactor

The enantioselective catalytic hydrolysis of racemic 1,2-epoxyoctane in a batch and a continuous process 37

### Biotransformation

Biotransformations by *Botrytis* species 77

### Biphasic system

Catalysis by amine oxidases in nonaqueous media 69

### *Botrytis*

Biotransformations by *Botrytis* species 77

### Carbohydrate

Specificity and kinetic parameters of recombinant *Microdochium nivale* carbohydrate oxidase 95

### Carbohydrate oxidase

Specificity and kinetic parameters of recombinant *Microdochium nivale* carbohydrate oxidase 95

### Cation radical

Specificity and kinetic parameters of recombinant *Microdochium nivale* carbohydrate oxidase 95

### Changes in structures of lignins

Biobleaching of pulp with dioxygen in the laccase-mediator system — reaction mechanisms for degradation of residual lignin 1

### CTAB

The dependence of a halophilic malate dehydrogenase on  $\sigma$  and surfactant concentration in reverse micelles 49

### Dioxygen

Biobleaching of pulp with dioxygen in the laccase-mediator system — reaction mechanisms for degradation of residual lignin 1

### Enantioselective catalysis

The enantioselective catalytic hydrolysis of racemic 1,2-epoxyoctane in a batch and a continuous process 37

### Enantioselective hydrolysis

Biocatalytic preparation of (S)-phenyl glycidyl ether using newly isolated *Bacillus* megaterium. ECU1001 61

### Enzyme kinetics

Inhibition of urease by  $Ni^{2+}$  ions. Analysis of reaction progress curves 103

### Epoxide hydrolase

Biocatalytic preparation of (S)-phenyl glycidyl ether using newly isolated *Bacillus* megaterium. ECU1001 61

### Epoxide hydrolysis

The enantioselective catalytic hydrolysis of racemic 1,2-epoxyoctane in a batch and a continuous process 37

### Fungus

Biotransformations by *Botrytis* species 77

### Halophilic enzyme

The dependence of a halophilic malate dehydrogenase on  $\sigma$  and surfactant concentration in reverse micelles 49

### Heavy metal ions

Inhibition of urease by  $Ni^{2+}$  ions. Analysis of reaction progress curves 103

### HMDH

The dependence of a halophilic malate dehydrogenase on  $\sigma$  and surfactant concentration in reverse micelles 49

### 2-Hydroxy-1-indanone

A new enzymatic method of stereoselective oxidation of racemic 1,2-indandiols 27

### Immobilized enzyme

Catalysis by amine oxidases in nonaqueous media 69

### Indandiol

A new enzymatic method of stereoselective oxidation of racemic 1,2-indandiols 27

### Inhibition

Inhibition of urease by  $Ni^{2+}$  ions. Analysis of reaction progress curves 103

- Isopenicillin N synthase**  
 Construction of *Streptomyces jumonjinensis* isopenicillin N synthase double mutants, Ser119Ala/Glu120Gly and Thr308Ala/Thr309Val, overcomes insoluble expression in *Escherichia coli* 17
- Kinetic resolution**  
 Biocatalytic preparation of (S)-phenyl glycidyl ether using newly isolated *Bacillus megaterium*. ECU1001 61
- Kinetics**  
 Specificity and kinetic parameters of recombinant *Microdochium nivale* carbohydrate oxidase 95
- Laccase-mediator system (LMS)**  
 Bleaching of pulp with dioxygen in the laccase-mediator system — reaction mechanisms for degradation of residual lignin 1
- Membrane**  
 The enantioselective catalytic hydrolysis of racemic 1,2-epoxyoctane in a batch and a continuous process 37
- Microdochium nivale***  
 Specificity and kinetic parameters of recombinant *Microdochium nivale* carbohydrate oxidase 95
- Microorganism**  
 A new enzymatic method of stereoselective oxidation of racemic 1,2-indandiols 27
- Ni<sup>2+</sup> ions**  
 Inhibition of urease by Ni<sup>2+</sup> ions. Analysis of reaction progress curves 103
- o**  
 The dependence of a halophilic malate dehydrogenase on  $\sigma$  and surfactant concentration in reverse micelles 49
- Optically active**  
 A new enzymatic method of stereoselective oxidation of racemic 1,2-indandiols 27
- Organic solvent**  
 Catalysis by amine oxidases in nonaqueous media 69
- Oxygen**  
 Specificity and kinetic parameters of recombinant *Microdochium nivale* carbohydrate oxidase 95
- Phenyl glycidyl ether**  
 Biocatalytic preparation of (S)-phenyl glycidyl ether using newly isolated *Bacillus megaterium*. ECU1001 61
- Phytopathogen**  
 Biotransformations by *Botrytis* species 77
- Pine Kraft-AQ pulp**  
 Bleaching of pulp with dioxygen in the laccase-mediator system — reaction mechanisms for degradation of residual lignin 1
- Pseudomonas***  
 A new enzymatic method of stereoselective oxidation of racemic 1,2-indandiols 27
- Reaction mechanisms**  
 Bleaching of pulp with dioxygen in the laccase-mediator system — reaction mechanisms for degradation of residual lignin 1
- Residual lignin**  
 Bleaching of pulp with dioxygen in the laccase-mediator system — reaction mechanisms for degradation of residual lignin 1
- Reverse micelles**  
 The dependence of a halophilic malate dehydrogenase on  $\sigma$  and surfactant concentration in reverse micelles 49
- Screening**  
 A new enzymatic method of stereoselective oxidation of racemic 1,2-indandiols 27
- Site-directed mutagenesis**  
 Construction of *Streptomyces jumonjinensis* isopenicillin N synthase double mutants, Ser119Ala/Glu120Gly and Thr308Ala/Thr309Val, overcomes insoluble expression in *Escherichia coli* 17
- Solubility**  
 Construction of *Streptomyces jumonjinensis* isopenicillin N synthase double mutants, Ser119Ala/Glu120Gly and Thr308Ala/Thr309Val, overcomes insoluble expression in *Escherichia coli* 17  
 The enantioselective catalytic hydrolysis of racemic 1,2-epoxyoctane in a batch and a continuous process 37
- Stereoselective oxidation**  
 A new enzymatic method of stereoselective oxidation of racemic 1,2-indandiols 27
- Streptomyces jumonjinensis***  
 Construction of *Streptomyces jumonjinensis* isopenicillin N synthase double mutants, Ser119Ala/Glu120Gly and Thr308Ala/Thr309Val, overcomes insoluble expression in *Escherichia coli* 17
- Terpene**  
 Biotransformations by *Botrytis* species 77
- Urease**  
 Inhibition of urease by Ni<sup>2+</sup> ions. Analysis of reaction progress curves 103
- Water activity**  
 Catalysis by amine oxidases in nonaqueous media 69
