

Subject Index

Acinetobacter calcoaceticus

A novel dihydrocoumarin hydrolase from *Acinetobacter calcoaceticus*: application to the production of useful compounds 231

Acrylonitrile biotransformation

Influence of initial glucose concentration on nitrile hydratase production in *Brevibacterium imperialis* CBS 498-74 405

Activation enthalpy

How does active site water affect enzymatic stereorecognition? 103

Activation entropy

How does active site water affect enzymatic stereorecognition? 103

Activation in organic solvent

Activation of *Mucor circinelloides* lipase in organic medium 287

Activity

Lipase activity and conformation in neat organic solvents 93

Acylation

Biocatalysis applied to chemoselective transformations on Vitamin D and nucleoside derivatives 21

Lipase-catalyzed transformations as key-steps in the large-scale preparation of vitamins 67

Adsorption

Catalytic activity of *Burkholderia (Pseudomonas) cepacia* encapsulated in silica aerogels in esterification and hydrolysis as a function of the gel and solvent hydrophobicities 269

Alcalase

Chemo-enzymatic approaches for the creation of novel chiral building blocks and reagents for pharmaceutical applications 55

Alcohol dehydrogenase

How does active site water affect enzymatic stereorecognition? 103

Kinetic modelling of coupled redox enzymatic systems for in situ regeneration of NADPH 459

Alginate

Encapsulation of chlorophyllase in hydrophobically modified hydrogel 319

Aliphatic ω -hydroxycyanohydrins

(*R*)-Oxynitrilase-catalyzed transformation of ω -hydroxyalkanes 223

Alkoxyacylation

Biocatalysis applied to chemoselective transformations on Vitamin D and nucleoside derivatives 21

Aminoalcohols

Online NMR for monitoring biocatalysed reactions—the use of lipases in organic solvents 149

Aroma

Biogenesis of 2-(1-hydroxyethyl)-4,5-dihydrothiazole as precursor of roasted and popcorn-like aroma for bakery products 473

Aspergillus terreus

Aspergillus terreus CCT 3320 immobilized on chrysotile or cellulose/TiO₂ for sulfide oxidation 327

Bacillus subtilis

Cloning, expression and characterization of a new 2-Cl-propionic acid ester hydrolase from *B. subtilis* 237

Biocatalytic peroxy acid formation for disinfection 499

Baker's yeast

Biogenesis of 2-(1-hydroxyethyl)-4,5-dihydrothiazole as precursor of roasted and popcorn-like aroma for bakery products 473

Bakery

Biogenesis of 2-(1-hydroxyethyl)-4,5-dihydrothiazole as precursor of roasted and popcorn-like aroma for bakery products 473

Biocatalysis

Metagenome—a challenging source of enzyme discovery 13

Online NMR for monitoring biocatalysed reactions—the use of lipases in organic solvents 149

Biocatalysis by immobilized lipoxigenase in a ternary micellar system 305

Characterization of the biocatalysis of tyrosinase in selected organic solvent media using model phenolic substrates 335

Biocatalysis in organic solvent

Computational analysis of the aminic subsite of PGA explains the influence of amine structure on enantioselectivity 423

Biocatalyst

Use of free and immobilized *Pseudomonas putida* cells for the reduction of a thiophene derivative in organic media 353

Biotransformation

β -Diketone hydrolases 73

Enhanced production of *R*-phenylacetylcarbinol (*R*-PAC) through enzymatic biotransformation 109

Lactones 13. Biotransformation of iodolactones 203

Influence of reactor configuration on the production of carvone from carveol by whole cells of *Rhodococcus erythropolis* DCL14 377

- Maintenance of cell viability in the biotransformation of (–)-carveol with whole cells of *Rhodococcus erythropolis* 389
- Biotransformations**
- Clean-chemistry synthesis of biodegradable tertiary α -substituted carboxylic acids from the corresponding esters through enzymatic processes 143
- Biphasic media**
- Co-oxidation of β -carotene in biphasic media 197
- (+)-Bornyl diphosphate synthase
- Mechanism of monoterpene cyclization: stereochemistry of the transformation of noncyclizable substrate analogs by recombinant (–)-limonene synthase, (+)-bornyl diphosphate synthase, and (–)-pinene synthase 415
- Botrytis cinerea*
- Lactones 13. Biotransformation of iodolactones 203
- Breeding**
- Molecular breeding of genes, pathways and genomes by DNA shuffling 3
- Brevibacterium imperialis* growth
- Influence of initial glucose concentration on nitrile hydratase production in *Brevibacterium imperialis* CBS 498-74 405
- β -Carotene**
- Co-oxidation of β -carotene in biphasic media 197
- (–)-Carveol
- Influence of reactor configuration on the production of carveone from carveol by whole cells of *Rhodococcus erythropolis* DCL14 377
- Maintenance of cell viability in the biotransformation of (–)-carveol with whole cells of *Rhodococcus erythropolis* 389
- (–)-Carvone
- Influence of reactor configuration on the production of carveone from carveol by whole cells of *Rhodococcus erythropolis* DCL14 377
- Maintenance of cell viability in the biotransformation of (–)-carveol with whole cells of *Rhodococcus erythropolis* 389
- Catalase**
- Minimization of by-product formation during D-amino acid oxidase catalyzed racemate resolution of D/L-amino acids 189
- Cellulose/TiO₂**
- Aspergillus terreus* CCT 3320 immobilized on chrysotile or cellulose/TiO₂ for sulfide oxidation 327
- Characterization**
- Production of flavor compounds by hydroperoxide lyase from enzymatic extracts of *Penicillium* sp. 479
- Chemical modification**
- Chemical modification of heme group improves hemoglobin affinity for hydrophobic substrates in organic media 437
- Chemoenzymatic synthesis**
- Enzymatic and chemoenzymatic synthesis of arene *trans*-dihydrodiols 31
- Chiral amines**
- Chemo-enzymatic approaches for the creation of novel chiral building blocks and reagents for pharmaceutical applications 55
- Chlorophyllase**
- Encapsulation of chlorophyllase in hydrophobically modified hydrogel 319
- Chrysotile**
- Aspergillus terreus* CCT 3320 immobilized on chrysotile or cellulose/TiO₂ for sulfide oxidation 327
- Coenzyme regeneration**
- [Cp*Rh(bpy)(H₂O)]²⁺: a versatile tool for efficient and non-enzymatic regeneration of nicotinamide and flavin coenzymes 167
- Kinetic modelling of coupled redox enzymatic systems for in situ regeneration of NADPH 459
- Conformation**
- Lipase activity and conformation in neat organic solvents 93
- D- and L-tert-leucine**
- Chemo-enzymatic approaches for the creation of novel chiral building blocks and reagents for pharmaceutical applications 55
- D-Amino acid oxidase**
- Minimization of by-product formation during D-amino acid oxidase catalyzed racemate resolution of D/L-amino acids 189
- γ -Decalactone**
- Optimization of *Yarrowia lipolytica*'s β -oxidation pathway for γ -decalactone production 347
- Decenolide**
- Optimization of *Yarrowia lipolytica*'s β -oxidation pathway for γ -decalactone production 347
- Degree of hydrolysis**
- Production of tuna waste hydrolysates by a commercial neutral protease preparation 489
- Dehalogenation**
- Lactones 13. Biotransformation of iodolactones 203
- 1-Deoxy sugars**
- Fructose 6-phosphate aldolase and 1-deoxy-D-xylulose 5-phosphate synthase from *Escherichia coli* as tools in enzymatic synthesis of 1-deoxysugars 247
- Desymmetrisation**
- Desymmetrisation of prochiral ketones using lipases 83
- Diastereomeric resolution**
- Influence of reactor configuration on the production of carveone from carveol by whole cells of *Rhodococcus erythropolis* DCL14 377
- Maintenance of cell viability in the biotransformation of (–)-carveol with whole cells of *Rhodococcus erythropolis* 389
- Differential spectrophotometry**
- Activation of *Mucor circinelloides* lipase in organic medium 287
- Dihydrocoumarin hydrolase**
- A novel dihydrocoumarin hydrolase from *Acinetobacter calcoaceticus*: application to the production of useful compounds 231
- Dihydroxyacetone**
- Fructose 6-phosphate aldolase and 1-deoxy-D-xylulose 5-phosphate synthase from *Escherichia coli* as tools in enzymatic synthesis of 1-deoxysugars 247
- Dihydroxyacetone phosphate**
- Enzymic routes to dihydroxyacetone phosphate or immediate precursors 215
- β -Diketone**
- β -Diketone hydrolases 73

- Dimethylformamide
Inactivation and reactivation kinetics of horseradish peroxidase in phosphate buffer and buffer–dimethylformamide solutions 451
- Dioxygenase
Enzymatic and chemoenzymatic synthesis of arene *trans*-dihydrodiols 31
- Disinfectants
Biocatalytic peroxy acid formation for disinfection 499
- DNA shuffling
Molecular breeding of genes, pathways and genomes by DNA shuffling 3
- E. coli*
Cloning, expression and characterization of a new 2-Cl-propionic acid ester hydrolase from *B. subtilis* 237
- Electrochemistry
[Cp^{*}Rh(bpy)(H₂O)]²⁺: a versatile tool for efficient and non-enzymatic regeneration of nicotinamide and flavin coenzymes 167
- Enantioselective amidohydrolases
Chemo-enzymatic approaches for the creation of novel chiral building blocks and reagents for pharmaceutical applications 55
- Enantioselective oxidation
Aspergillus terreus CCT 3320 immobilized on chrysotile or cellulose/TiO₂ for sulfide oxidation 327
- Enantioselectivity
Substrate specificity of the γ -isoenzyme of recombinant pig liver esterase towards acetates of secondary alcohols 129
Computational analysis of the aminic subsite of PGA explains the influence of amine structure on enantioselectivity 423
- Encapsulation
Catalytic activity of *Burkholderia (Pseudomonas) cepacia* encapsulated in silica aerogels in esterification and hydrolysis as a function of the gel and solvent hydrophobicities 269
- Enol ester
Desymmetrisation of prochiral ketones using lipases 83
- Enthalpy–entropy compensation
How does active site water affect enzymatic stereorecognition? 103
- Entrapment
Encapsulation of chlorophyllase in hydrophobically modified hydrogel 319
- Enzymatic hydrolysis
Clean-chemistry synthesis of biodegradable tertiary α -substituted carboxylic acids from the corresponding esters through enzymatic processes 143
- Enzymatic polymerization
Enzyme-catalyzed polymerization to functional polymers 117
- Enzymatic synthesis
Enzymatic and chemoenzymatic synthesis of arene *trans*-dihydrodiols 31
Enzymatic synthesis of galactosyl–xylose by *Aspergillus oryzae* β -galactosidase 159
- Enzyme
Metagenome—a challenging source of enzyme discovery 13
Enzymatic modification of the sugar moieties of natural glycosides 43
Enzyme catalysis
Substrate specificity of the γ -isoenzyme of recombinant pig liver esterase towards acetates of secondary alcohols 129
Enzyme inactivation
Modelling of the kinetics of thermal inactivation of glucoamylase from *Aspergillus niger* 443
Enzyme kinetics
Influence of initial glucose concentration on nitrile hydratase production in *Brevibacterium imperialis* CBS 498-74 405
Enzymes in organic solvents
Preparation of artificial hyper-hydrophilic micro-environments (polymeric salts) surrounding enzyme molecules. New enzyme derivatives to be used in any reaction medium 295
Ephedrine/pseudoephedrine
Enhanced production of *R*-phenylacetylcarbinol (*R*-PAC) through enzymatic biotransformation 109
Est4B1
Cloning, expression and characterization of a new 2-Cl-propionic acid ester hydrolase from *B. subtilis* 237
Ester synthesis
Catalytic properties of membrane-bound *Mucor* lipase immobilized in a hydrophilic carrier 261
Esterases
Clean-chemistry synthesis of biodegradable tertiary α -substituted carboxylic acids from the corresponding esters through enzymatic processes 143
Esterification
Catalytic activity of *Burkholderia (Pseudomonas) cepacia* encapsulated in silica aerogels in esterification and hydrolysis as a function of the gel and solvent hydrophobicities 269
Esterification kinetics
Characterisation of pancreatic lipase substrate specificity in organic reaction media by a kinetic method 467
Expanded bed adsorption chromatography
Preparative application of 2-hydroxybiphenyl 3-monooxygenase with enzymatic cofactor regeneration in organic-aqueous reaction media 177
- Famoxate[®]
Clean-chemistry synthesis of biodegradable tertiary α -substituted carboxylic acids from the corresponding esters through enzymatic processes 143
Farnesyl diphosphate synthase
Dramatic changes in the substrate specificities of prenyltransferase by a single amino acid substitution 431
Fluorescence microscopy
Maintenance of cell viability in the biotransformation of (–)-carveol with whole cells of *Rhodococcus erythropolis* 389
- β -Galactosidase
Enzymatic synthesis of galactosyl–xylose by *Aspergillus oryzae* β -galactosidase 159
Galactosides
Enzymatic synthesis of galactosyl–xylose by *Aspergillus oryzae* β -galactosidase 159

- Galactosyl–xylose
Enzymatic synthesis of galactosyl–xylose by *Aspergillus oryzae* β -galactosidase 159
- Genomes
Molecular breeding of genes, pathways and genomes by DNA shuffling 3
- Geranyl diphosphate
Mechanism of monoterpene cyclization: stereochemistry of the transformation of noncyclizable substrate analogs by recombinant (–)-limonene synthase, (+)-bornyl diphosphate synthase, and (–)-pinene synthase 415
- Glucoamylase
Modelling of the kinetics of thermal inactivation of glucoamylase from *Aspergillus niger* 443
- Glutaryl-7-ACA acylase
Glutaryl-7-ACA acylase catalyses the synthesis of amide bond in heterogeneous substrate mixtures 135
- Glycerol kinase
Enzymic routes to dihydroxyacetone phosphate or immediate precursors 215
- Glycosylation
Microbial transformation of mycophenolic acid. Part II 209
- Glycosyltransferases
Enzymatic modification of the sugar moieties of natural glycosides 43
- GRID
Computational analysis of the aminic subsite of PGA explains the influence of amine structure on enantioselectivity 423
- Heme
Chemical modification of heme group improves hemoglobin affinity for hydrophobic substrates in organic media 437
- Hemoglobin
Chemical modification of heme group improves hemoglobin affinity for hydrophobic substrates in organic media 437
- Heterogeneous substrate mixture
Glutaryl-7-ACA acylase catalyses the synthesis of amide bond in heterogeneous substrate mixtures 135
- Homogeneous lipase
Activation of *Mucor circinelloides* lipase in organic medium 287
- Horseradish peroxidase
Inactivation and reactivation kinetics of horseradish peroxidase in phosphate buffer and buffer–dimethylformamide solutions 451
- Hydrolases
 β -Diketone hydrolases 73
Substrate specificity of the γ -isoenzyme of recombinant pig liver esterase towards acetates of secondary alcohols 129
- Hydrolysis
Lipase-catalyzed transformations as key-steps in the large-scale preparation of vitamins 67
Catalytic activity of *Burkholderia (Pseudomonas) cepacia* encapsulated in silica aerogels in esterification and hydrolysis as a function of the gel and solvent hydrophobicities 269
- Hydroperoxide lyase
Effect of linoleic acid induction on the production of 1-octen-3-ol by the lipoxygenase and hydroperoxide lyase activities of *Penicillium camemberti* 363
Production of flavor compounds by hydroperoxide lyase from enzymatic extracts of *Penicillium* sp. 479
- Hydrophilization of enzyme environments
Preparation of artificial hyper-hydrophilic micro-environments (polymeric salts) surrounding enzyme molecules. New enzyme derivatives to be used in any reaction medium 295
- Hydrophobic
Catalytic activity of *Burkholderia (Pseudomonas) cepacia* encapsulated in silica aerogels in esterification and hydrolysis as a function of the gel and solvent hydrophobicities 269
- Hydrophobicity
Chemical modification of heme group improves hemoglobin affinity for hydrophobic substrates in organic media 437
- Hydroxyacetone
Fructose 6-phosphate aldolase and 1-deoxy-D-xylulose 5-phosphate synthase from *Escherichia coli* as tools in enzymatic synthesis of 1-deoxysugars 247
- 4-Hydroxybutanal
(R)-Oxynitrilase-catalyzed transformation of ω -hydroxyalkenals 223
- 3-Hydroxy- γ -decalactone
Optimization of *Yarrowia lipolytica*'s β -oxidation pathway for γ -decalactone production 347
- Hydroxylation
Microbial transformation of mycophenolic acid. Part II 209
- 5-Hydroxypentanal
(R)-Oxynitrilase-catalyzed transformation of ω -hydroxyalkenals 223
- Immobilization
Biocatalysis by immobilized lipoxygenase in a ternary micellar system 305
Aspergillus terreus CCT 3320 immobilized on chrysotile or cellulose/TiO₂ for sulfide oxidation 327
- Immobilized lipase
Catalytic properties of membrane-bound *Mucor* lipase immobilized in a hydrophilic carrier 261
- In vitro
[Cp*Rh(bpy)(H₂O)]²⁺: a versatile tool for efficient and non-enzymatic regeneration of nicotinamide and flavin coenzymes 167
- In vitro biotransformation
Preparative application of 2-hydroxybiphenyl 3-monooxygenase with enzymatic cofactor regeneration in organic-aqueous reaction media 177
- Industrial application
Lipase-catalyzed transformations as key-steps in the large-scale preparation of vitamins 67
- Inositol phosphates
Chemo-enzymatic approaches for the creation of novel chiral building blocks and reagents for pharmaceutical applications 55
- Interfacial immobilization
Interfacial adsorption of lipases on very hydrophobic support (octadecyl–Sepabeads): immobilization, hyperactivation and stabilization of the open form of lipases 279
- δ -Iodo- γ -lactone
Lactones 13. Biotransformation of iodolactones 203

- γ -Iodo- δ -lactone
Lactones 13. Biotransformation of iodolactones 203
- α -Keto acid
Minimization of by-product formation during D-amino acid oxidase catalyzed racemate resolution of D/L-amino acids 189
- Ketones
Substrate characterization of a NAD-dependent secondary alcohol dehydrogenase from *Rhodococcus* sp. GK1 (CIP 105335) 253
- Kinetic parameters
Inactivation and reactivation kinetics of horseradish peroxidase in phosphate buffer and buffer–dimethylformamide solutions 451
- Kinetic resolution
Lipase-catalyzed transformations as key-steps in the large-scale preparation of vitamins 67
Substrate specificity of the γ -isoenzyme of recombinant pig liver esterase towards acetates of secondary alcohols 129
Aspergillus terreus CCT 3320 immobilized on chrysotile or cellulose/TiO₂ for sulfide oxidation 327
- Kinetic study
Kinetic modelling of coupled redox enzymatic systems for in situ regeneration of NADPH 459
- Kinetics
Modelling of the kinetics of thermal inactivation of glucoamylase from *Aspergillus niger* 443
- Lactate
Lactate as an alternative to pyruvate in the yeast mediated preparation of PAC 399
- Lactonase
A novel dihydrocoumarin hydrolase from *Acinetobacter calcoaceticus*: application to the production of useful compounds 231
- L-Glycerol-3-phosphate
Enzymic routes to dihydroxyacetone phosphate or immediate precursors 215
- (–)-4S-Limonene synthase
Mechanism of monoterpene cyclization: stereochemistry of the transformation of noncyclizable substrate analogs by recombinant (–)-limonene synthase, (+)-bornyl diphosphate synthase, and (–)-pinene synthase 415
- Linalyl diphosphate
Mechanism of monoterpene cyclization: stereochemistry of the transformation of noncyclizable substrate analogs by recombinant (–)-limonene synthase, (+)-bornyl diphosphate synthase, and (–)-pinene synthase 415
- Lipase
Biocatalysis applied to chemoselective transformations on Vitamin D and nucleoside derivatives 21
Enzymatic modification of the sugar moieties of natural glycosides 43
Chemo-enzymatic approaches for the creation of novel chiral building blocks and reagents for pharmaceutical applications 55
Desymmetrisation of prochiral ketones using lipases 83
Lipase activity and conformation in neat organic solvents 93
Enzyme-catalyzed polymerization to functional polymers 117
Clean-chemistry synthesis of biodegradable tertiary α -substituted carboxylic acids from the corresponding esters through enzymatic processes 143
Biocatalytic peroxy acid formation for disinfection 499
- Lipase immobilization
Interfacial adsorption of lipases on very hydrophobic support (octadecyl-Sepabeads): immobilization, hyperactivation and stabilization of the open form of lipases 279
- Lipases in organic solvents
Online NMR for monitoring biocatalysed reactions—the use of lipases in organic solvents 149
- Lipoxygenase
Biocatalysis by immobilized lipoxygenase in a ternary micellar system 305
Effect of linoleic acid induction on the production of 1-octen-3-ol by the lipoxygenase and hydroperoxide lyase activities of *Penicillium camemberti* 363
- Low-water media
Glutaryl-7-ACA acylase catalyses the synthesis of amide bond in heterogeneous substrate mixtures 135
- Lumry–Eyring mechanism
Modelling of the kinetics of thermal inactivation of glucoamylase from *Aspergillus niger* 443
- Mathematical modelling
Modelling of the kinetics of thermal inactivation of glucoamylase from *Aspergillus niger* 443
- Metagenome
Metagenome—a challenging source of enzyme discovery 13
- Methyl ricinoleate
Optimization of *Yarrowia lipolytica*'s β -oxidation pathway for γ -decalactone production 347
- Microbial transformation
Microbial transformation of mycophenolic acid. Part II 209
- Microorganism
Metagenome—a challenging source of enzyme discovery 13
- Molecular modelling
Computational analysis of the aminic subsite of PGA explains the influence of amine structure on enantioselectivity 423
- Monooxygenase
Enzymatic and chemoenzymatic synthesis of arene *trans*-dihydrodiols 31
Preparative application of 2-hydroxybiphenyl 3-monooxygenase with enzymatic cofactor regeneration in organic-aqueous reaction media 177
- Mucor*
Catalytic properties of membrane-bound *Mucor* lipase immobilized in a hydrophilic carrier 261
Activation of *Mucor circinelloides* lipase in organic medium 287
- Mutant
Dramatic changes in the substrate specificities of prenyltransferase by a single amino acid substitution 431
- Mycelium-bound lipase
Activation of *Mucor circinelloides* lipase in organic medium 287
- Mycobacterium* sp
Effect of phase composition on the whole-cell bioconversion of β -sitosterol in biphasic media 371

- Mycophenolic acid
Microbial transformation of mycophenolic acid. Part II 209
- NAD-dependent dehydrogenase
Substrate characterization of a NAD-dependent secondary alcohol dehydrogenase from *Rhodococcus* sp. GK1 (CIP 105335) 253
- NADH regeneration
Preparative application of 2-hydroxybiphenyl 3-monooxygenase with enzymatic cofactor regeneration in organic-aqueous reaction media 177
- Natural glycosides
Enzymatic modification of the sugar moieties of natural glycosides 43
- Nitrile hydratase
Influence of initial glucose concentration on nitrile hydratase production in *Brevibacterium imperialis* CBS 498-74 405
- NK-2 antagonist
Desymmetrisation of prochiral ketones using lipases 83
- NMR
Online NMR for monitoring biocatalysed reactions—the use of lipases in organic solvents 149
- Non-heme haloperoxidase
A novel dihydrocoumarin hydrolase from *Acinetobacter calcoaceticus*: application to the production of useful compounds 231
- Novel class I aldolase
Fructose 6-phosphate aldolase and 1-deoxy-D-xylulose 5-phosphate synthase from *Escherichia coli* as tools in enzymatic synthesis of 1-deoxysugars 247
- Nucleosides
Biocatalysis applied to chemoselective transformations on Vitamin D and nucleoside derivatives 21
- 1-Octen-3-ol
Effect of linoleic acid induction on the production of 1-octen-3-ol by the lipoxygenase and hydroperoxide lyase activities of *Penicillium camemberti* 363
- Open structure of lipases
Interfacial adsorption of lipases on very hydrophobic support (octadecyl-Sepabeads): immobilization, hyperactivation and stabilization of the open form of lipases 279
- Organic solvent
Lipase activity and conformation in neat organic solvents 93
Glutaryl-7-ACA acylase catalyses the synthesis of amide bond in heterogeneous substrate mixtures 135
Effect of phase composition on the whole-cell bioconversion of β -sitosterol in biphasic media 371
Lactate as an alternative to pyruvate in the yeast mediated preparation of PAC 399
Chemical modification of heme group improves hemoglobin affinity for hydrophobic substrates in organic media 437
- Organic solvent media
Biocatalysis by immobilized lipoxygenase in a ternary micellar system 305
Characterization of the biocatalysis of tyrosinase in selected organic solvent media using model phenolic substrates 335
- Organic solvent tolerance
Preparative application of 2-hydroxybiphenyl 3-monooxygenase with enzymatic cofactor regeneration in organic-aqueous reaction media 177
- Oxidation products
Characterization of the biocatalysis of tyrosinase in selected organic solvent media using model phenolic substrates 335
- Oxidoreductase
[Cp*Rh(bpy)(H₂O)]²⁺: a versatile tool for efficient and non-enzymatic regeneration of nicotinamide and flavin coenzymes 167
- (R)-Oxynitrilase
(R)-Oxynitrilase-catalyzed transformation of ω -hydroxyalkals 223
- P. camemberti*
Effect of linoleic acid induction on the production of 1-octen-3-ol by the lipoxygenase and hydroperoxide lyase activities of *Penicillium camemberti* 363
- Partition coefficient
Encapsulation of chlorophyllase in hydrophobically modified hydrogel 319
- Penicillin G acylase
Computational analysis of the aminic subsite of PGA explains the influence of amine structure on enantioselectivity 423
- Penicillium* sp.
Production of flavor compounds by hydroperoxide lyase from enzymatic extracts of *Penicillium* sp. 479
- Peptides
Production of tuna waste hydrolysates by a commercial neutral protease preparation 489
- Peroxidase
Enzyme-catalyzed polymerization to functional polymers 117
- Peroxy acids
Biocatalytic peroxy acid formation for disinfection 499
- R*-phenylacetylcarbinol
Enhanced production of *R*-phenylacetylcarbinol (*R*-PAC) through enzymatic biotransformation 109
- Phosphoenolpyruvate
Enzymic routes to dihydroxyacetone phosphate or immediate precursors 215
- Pig liver esterase
Substrate specificity of the γ -isoenzyme of recombinant pig liver esterase towards acetates of secondary alcohols 129
- (-)-Pinene synthase
Mechanism of monoterpene cyclization: stereochemistry of the transformation of noncyclizable substrate analogs by recombinant (-)-limonene synthase, (+)-bornyl diphosphate synthase, and (-)-pinene synthase 415
- Polyester
Enzyme-catalyzed polymerization to functional polymers 117
- Polymeric salts
Preparation of artificial hyper-hydrophilic micro-environments (polymeric salts) surrounding enzyme molecules. New enzyme derivatives to be used in any reaction medium 295
- Polyphenol
Enzyme-catalyzed polymerization to functional polymers 117

- Porcine pancreatic lipase
 Online NMR for monitoring biocatalysed reactions—the use of lipases in organic solvents 149
 Characterisation of pancreatic lipase substrate specificity in organic reaction media by a kinetic method 467
- Precursor
 Biogenesis of 2-(1-hydroxyethyl)-4,5-dihydrothiazole as precursor of roasted and popcorn-like aroma for bakery products 473
- Prenyltransferase
 Dramatic changes in the substrate specificities of prenyltransferase by a single amino acid substitution 431
- Preparation of PAC
 Lactate as an alternative to pyruvate in the yeast mediated preparation of PAC 399
- Prochiral ketone
 Desymmetrisation of prochiral ketones using lipases 83
- Protease
 Enzymatic modification of the sugar moieties of natural glycosides 43
 Production of tuna waste hydrolysates by a commercial neutral protease preparation 489
- Pseudomonas putida*
 Use of free and immobilized *Pseudomonas putida* cells for the reduction of a thiophene derivative in organic media 353
- PVA-cryogel
 Catalytic properties of membrane-bound *Mucor* lipase immobilized in a hydrophilic carrier 261
- Pyruvate decarboxylase
 Enhanced production of *R*-phenylacetylcarbinol (*R*-PAC) through enzymatic biotransformation 109
- Pyruvate kinase
 Enzymic routes to dihydroxyacetone phosphate or immediate precursors 215
- Racemate resolution
 Minimization of by-product formation during D-amino acid oxidase catalyzed racemate resolution of D/L-amino acids 189
- Reactivation
 Inactivation and reactivation kinetics of horseradish peroxidase in phosphate buffer and buffer–dimethylformamide solutions 451
- Reactor configuration
 Influence of reactor configuration on the production of carvone from carveol by whole cells of *Rhodococcus erythropolis* DCL14 377
- Redoxpotential
 Minimization of by-product formation during D-amino acid oxidase catalyzed racemate resolution of D/L-amino acids 189
- Regioselectivity
 Enzymatic modification of the sugar moieties of natural glycosides 43
 Lipase-catalyzed transformations as key-steps in the large-scale preparation of vitamins 67
- Reverse micellar system
 Encapsulation of chlorophyllase in hydrophobically modified hydrogel 319
- Rhodium
 [Cp*Rh(bpy)(H₂O)]²⁺: a versatile tool for efficient and non-enzymatic regeneration of nicotinamide and flavin coenzymes 167
- Rhodococcus*
 Substrate characterization of a NAD-dependent secondary alcohol dehydrogenase from *Rhodococcus* sp. GK1 (CIP 105335) 253
- Roasted
 Biogenesis of 2-(1-hydroxyethyl)-4,5-dihydrothiazole as precursor of roasted and popcorn-like aroma for bakery products 473
- Secondary alcohols
 Substrate characterization of a NAD-dependent secondary alcohol dehydrogenase from *Rhodococcus* sp. GK1 (CIP 105335) 253
- Sepabeads
 Interfacial adsorption of lipases on very hydrophobic support (octadecyl–Sepabeads): immobilization, hyperactivation and stabilization of the open form of lipases 279
- β-Sitosterol
 Effect of phase composition on the whole-cell bioconversion of β-sitosterol in biphasic media 371
- Spores
 Biocatalytic peroxy acid formation for disinfection 499
- Stabilization of enzymes
 Preparation of artificial hyper-hydrophilic micro-environments (polymeric salts) surrounding enzyme molecules. New enzyme derivatives to be used in any reaction medium 295
- Stereoselectivity
 How does active site water affect enzymatic stereorecognition? 103
- Substrate analog of geranyl diphosphate
 Dramatic changes in the substrate specificities of prenyltransferase by a single amino acid substitution 431
- Substrate characterization
 Substrate characterization of a NAD-dependent secondary alcohol dehydrogenase from *Rhodococcus* sp. GK1 (CIP 105335) 253
- Substrate specificity
 Dramatic changes in the substrate specificities of prenyltransferase by a single amino acid substitution 431
 Characterisation of pancreatic lipase substrate specificity in organic reaction media by a kinetic method 467
- Sulcatone
 Kinetic modelling of coupled redox enzymatic systems for in situ regeneration of NADPH 459
- Sulfide oxidation
Aspergillus terreus CCT 3320 immobilized on chrysotile or cellulose/TiO₂ for sulfide oxidation 327
- Synthesis of amide bond
 Glutaryl-7-ACA acylase catalyses the synthesis of amide bond in heterogeneous substrate mixtures 135
- 5'-TAMRA-labeled (P1-tethered) D-PIP₃
 Chemo-enzymatic approaches for the creation of novel chiral building blocks and reagents for pharmaceutical applications 55

- Ternary micellar system
 Encapsulation of chlorophyllase in hydrophobically modified hydrogel 319
- Theorell–Chance BiBi mechanism
 Kinetic modelling of coupled redox enzymatic systems for in situ regeneration of NADPH 459
- Thermal inactivation
 Inactivation and reactivation kinetics of horseradish peroxidase in phosphate buffer and buffer–dimethylformamide solutions 451
- Thiamine diphosphate
 Fructose 6-phosphate aldolase and 1-deoxy-D-xylulose 5-phosphate synthase from *Escherichia coli* as tools in enzymatic synthesis of 1-deoxysugars 247
- Thiophene derivative
 Use of free and immobilized *Pseudomonas putida* cells for the reduction of a thiophene derivative in organic media 353
- Transcyanation
 (*R*)-Oxynitrilase-catalyzed transformation of ω -hydroxyalkanales 223
- trans*-Dihydrodiols
 Enzymatic and chemoenzymatic synthesis of arene *trans*-dihydrodiols 31
- Transesterification kinetics
 Characterisation of pancreatic lipase substrate specificity in organic reaction media by a kinetic method 467
- Tuna waste hydrolysates
 Production of tuna waste hydrolysates by a commercial neutral protease preparation 489
- Two-phase process
 Enhanced production of *R*-phenylacetylcarbinol (*R*-PAC) through enzymatic biotransformation 109
- Two-phase systems
 Effect of phase composition on the whole-cell bioconversion of β -sitosterol in biphasic media 371
- Tyrosinase
 Characterization of the biocatalysis of tyrosinase in selected organic solvent media using model phenolic substrates 335
- Umamizyme
 Production of tuna waste hydrolysates by a commercial neutral protease preparation 489
- Uncultivated biodiversity
 Metagenome—a challenging source of enzyme discovery 13
- Viability
 Influence of reactor configuration on the production of carvone from carveol by whole cells of *Rhodococcus erythropolis* DCL14 377
 Maintenance of cell viability in the biotransformation of (–)-carveol with whole cells of *Rhodococcus erythropolis* 389
- Vitamin D
 Biocatalysis applied to chemoselective transformations on Vitamin D and nucleoside derivatives 21
- Whole-cell bioconversion
 Effect of phase composition on the whole-cell bioconversion of β -sitosterol in biphasic media 371
- Xanthine oxidase
 Co-oxidation of β -carotene in biphasic media 197
- Yarrowia lipolytica*
 Optimization of *Yarrowia lipolytica*'s β -oxidation pathway for γ -decalactone production 347
- Yeast
 Lactate as an alternative to pyruvate in the yeast mediated preparation of PAC 399
