

Subject Index

Acinetobacter sp

A novel esterase from a psychrotrophic bacterium, *Acinetobacter* sp. strain no. 6, that belongs to the amidase signature family 357

Acylation

Structural aspects of acylated plant pigments: stabilization of flavonoid glucosides and interpretation of their functions 411

N-Acyl-D-amino acid amidohydrolase

Production of D-amino acids by *N*-acyl-D-amino acid amidohydrolase and its structure and function 71

Acyltransferase

Anthocyanin acyltransferases: specificities, mechanism, phylogenetics, and applications 117

Alanine dehydrogenase

Purification and characterization of alanine dehydrogenase from a marine bacterium, *Vibrio proteolyticus* 373

Alanine racemase

Molecular characterization of alanine racemase from *Bifidobacterium bifidum* 213

Conversion of the catalytic specificity of alanine racemase to a D-amino acid aminotransferase activity by a double active-site mutation 311

Improvement in thermostability and psychrophilicity of psychrophilic alanine racemase by site-directed mutagenesis 389

Alcohol dehydrogenase

Discovery of alcohol dehydrogenase from mushrooms and application to alcoholic beverages 133

Alcohol fermentation

Discovery of alcohol dehydrogenase from mushrooms and application to alcoholic beverages 133

Alcoholic beverage

Discovery of alcohol dehydrogenase from mushrooms and application to alcoholic beverages 133

Aldehyde dehydrogenase

Paradoxical thermostable enzymes from psychrophile: molecular characterization and potentiality for biotechnological application 65

Alkaliphilic halophile

Purification and characterization of leucine dehydrogenase from an alkaliphilic halophile, *Natronobacterium magadii* MS-3 231

Amidase

A novel esterase from a psychrotrophic bacterium, *Acinetobacter* sp. strain no. 6, that belongs to the amidase signature family 357

Amidase signature family

A novel esterase from a psychrotrophic bacterium, *Acinetobacter* sp. strain no. 6, that belongs to the amidase signature family 357

Amide ligase

Poly- γ -glutamate synthetase of *Bacillus subtilis* 101

Amidohydrolase

Microbial glutaminase: biochemistry, molecular approaches and applications in the food industry 87

2-Aminobutyrate dehydrogenase

Novel halophilic 2-aminobutyrate dehydrogenase from *Halo-bacterium saccharovororum* DSM 1137 223

Anthocyanin

Anthocyanin acyltransferases: specificities, mechanism, phylogenetics, and applications 117

Antioxidant

Enzymatic synthesis of novel antioxidant flavonoids by *Escherichia coli* cells expressing modified metabolic genes involved in biphenyl catabolism 9

Anti-thrombin substance

Discovery of alcohol dehydrogenase from mushrooms and application to alcoholic beverages 133

Application of the catalytic functions

Earthworm-serine protease: characterization, molecular cloning, and application of the catalytic functions 191

Archaea

A nicotinamide mononucleotide adenylyltransferase with unique adenylyl group donor specificity from a hyperthermophilic archaeon, *Pyrococcus horikoshii* OT-3 273

Arthrobacter simplex ATCC 6946

Factors affecting the biotransformation of chlormadinone acetate to delmadinone acetate 37

2-Arylpropionic acids

High enantioselective resolution of racemic 2-arylpropionic acids in an enzyme membrane reactor 43

Aspartase

Paradoxical thermostable enzymes from psychrophile: molecular characterization and potentiality for biotechnological application 65

Bacillus psychrosaccharolyticus

Improvement in thermostability and psychrophilicity of psychrophilic alanine racemase by site-directed mutagenesis 389

- Bacillus sphaericus*
Cloning and sequencing of the leucine dehydrogenase gene from *Bacillus sphaericus* IFO 3525 and importance of the C-terminal region for the enzyme activity 239
- Bacillus sphaericus* ATCC 13805
Factors affecting the biotransformation of chlormadinone acetate to delmadinone acetate 37
- Bacillus* strains
Stereoselective reduction of keto esters: thermophilic bacteria and microalgae as new biocatalysts 171
- Bacillus subtilis*
Poly- γ -glutamate synthetase of *Bacillus subtilis* 101
Poly- γ -glutamate depolymerase of *Bacillus subtilis*: production, simple purification and substrate selectivity 249
- Barley
Structure and function of a phospholipid hydroperoxide glutathione peroxidase-like protein from barley 397
- 4-Benzoylpyridine
Stereoselective reduction of 4-benzoylpyridine by recombinant pig heart carbonyl reductase 29
- Bifidobacterium bifidum*
Molecular characterization of alanine racemase from *Bifidobacterium bifidum* 213
- Biotransformation
Enzymatic synthesis of novel antioxidant flavonoids by *Escherichia coli* cells expressing modified metabolic genes involved in biphenyl catabolism 9
Factors affecting the biotransformation of chlormadinone acetate to delmadinone acetate 37
Biotransformation using plant cultured cells 145
- Biphenyl dioxygenase
Enzymatic synthesis of novel antioxidant flavonoids by *Escherichia coli* cells expressing modified metabolic genes involved in biphenyl catabolism 9
- Burkholderia* sp
Purification, characterization, and gene cloning of a novel fluoroacetate dehalogenase from *Burkholderia* sp. FA1 347
- Candida rugosa*
Stereoselective esterification of 2,6-dimethyl-1,7-heptanedioic acid, catalysed by *Candida rugosa* lipase 53
- Carbonyl reductase
Stereoselective reduction of 4-benzoylpyridine by recombinant pig heart carbonyl reductase 29
- Chlorella* strains
Stereoselective reduction of keto esters: thermophilic bacteria and microalgae as new biocatalysts 171
- Chlormadinone acetate
Factors affecting the biotransformation of chlormadinone acetate to delmadinone acetate 37
- Complex
Poly- γ -glutamate synthetase of *Bacillus subtilis* 101
- Conserved residues
Conserved structural modules and bonding networks in isopenicillin N synthase related non-haem iron-dependent oxygenases and oxidases 17
- Conserved structural modules
Conserved structural modules and bonding networks in isopenicillin N synthase related non-haem iron-dependent oxygenases and oxidases 17
- Cosynthesis
Cosynthesis of monofluoroacetate and 4-fluorothreonine by resting cells of blocked mutants of *Streptomyces cattleya* NRRL8057 257
- D-Alanine
Molecular characterization of alanine racemase from *Bifidobacterium bifidum* 213
- D-Amino acid
Production of D-amino acids by N-acyl-D-amino acid amidohydrolase and its structure and function 71
Occurrence of a unique amino acid racemase in a basidiomycetous mushroom, *Lentinus edodes* 379
- D-Amino acid aminotransferase
Conversion of the catalytic specificity of alanine racemase to a D-amino acid aminotransferase activity by a double active-site mutation 311
D-Amino acid aminotransferase: fragmentation at a flexible loop is an efficient method to generate mutant enzymes with new substrate specificities and elevated activities 321
- Defluorination
Purification, characterization, and gene cloning of a novel fluoroacetate dehalogenase from *Burkholderia* sp. FA1 347
- Delmadinone acetate
Factors affecting the biotransformation of chlormadinone acetate to delmadinone acetate 37
- Depolymerase
Poly- γ -glutamate depolymerase of *Bacillus subtilis*: production, simple purification and substrate selectivity 249
- Dihydrodiol dehydrogenase
Enzymatic synthesis of novel antioxidant flavonoids by *Escherichia coli* cells expressing modified metabolic genes involved in biphenyl catabolism 9
- 2,6-Dimethyl-1,7-heptanedioic acid
Stereoselective esterification of 2,6-dimethyl-1,7-heptanedioic acid, catalysed by *Candida rugosa* lipase 53
- DL-2-Haloacid dehalogenase
A new DL-2-haloacid dehalogenase acting on 2-haloacid amides: purification, characterization, and mechanism 329
- Earthworm
Earthworm-serine protease: characterization, molecular cloning, and application of the catalytic functions 191
Structure and function of an isozyme of earthworm proteases as a new biocatalyst 405
- Eco-system
Improvement of marine environmental pollution using eco-system: decomposition and recovery of endocrine disrupting chemicals by marine phyto- and zooplanktons 419
- Elastase
Structure and function of an isozyme of earthworm proteases as a new biocatalyst 405

Endocrine disrupting chemicals

Improvement of marine environmental pollution using ecosystem: decomposition and recovery of endocrine disrupting chemicals by marine phyto- and zooplanktons 419

Endopeptidase

Poly- γ -glutamate depolymerase of *Bacillus subtilis*: production, simple purification and substrate selectivity 249

Enzymatic synthesis

Alteration of substrate specificity of leucine dehydrogenase by site-directed mutagenesis 299

Enzyme membrane reactor

High enantioselective resolution of racemic 2-arylpropionic acids in an enzyme membrane reactor 43

Escherichia coli

Enzymatic synthesis of novel antioxidant flavonoids by *Escherichia coli* cells expressing modified metabolic genes involved in biphenyl catabolism 9

Esterase

A novel esterase from a psychrotrophic bacterium, *Acinetobacter* sp. strain no. 6, that belongs to the amidase signature family 357

Esterase-like activity

Structure and function of an isozyme of earthworm proteases as a new biocatalyst 405

Esterification

Enzymatic synthesis of partial glycerol caprate in solvent-free media 3

High enantioselective resolution of racemic 2-arylpropionic acids in an enzyme membrane reactor 43

Stereoselective esterification of 2,6-dimethyl-1,7-heptanedioic acid, catalysed by *Candida rugosa* lipase 53

Fibrinolytic enzyme

Earthworm-serine protease: characterization, molecular cloning, and application of the catalytic functions 191

Flavonoid

Enzymatic synthesis of novel antioxidant flavonoids by *Escherichia coli* cells expressing modified metabolic genes involved in biphenyl catabolism 9

Flavonoid glucoside

Structural aspects of acylated plant pigments: stabilization of flavonoid glucosides and interpretation of their functions 411

Flower color

Anthocyanin acyltransferases: specificities, mechanism, phylogenetics, and applications 117

Fluorinase

Cosynthesis of monofluoroacetate and 4-fluorothreonine by resting cells of blocked mutants of *Streptomyces cattleya* NRRL8057 257

Fluoroacetate dehalogenase

Purification, characterization, and gene cloning of a novel fluoroacetate dehalogenase from *Burkholderia* sp. FA1 347

4-Fluorothreonine

Cosynthesis of monofluoroacetate and 4-fluorothreonine by resting cells of blocked mutants of *Streptomyces cattleya* NRRL8057 257

Folding

D-Amino acid aminotransferase: fragmentation at a flexible loop is an efficient method to generate mutant enzymes with new substrate specificities and elevated activities 321

Fragmentary enzyme

D-Amino acid aminotransferase: fragmentation at a flexible loop is an efficient method to generate mutant enzymes with new substrate specificities and elevated activities 321

Glutamic acid

Microbial glutaminase: biochemistry, molecular approaches and applications in the food industry 87

Glutaminase

Microbial glutaminase: biochemistry, molecular approaches and applications in the food industry 87

Glutamine

Microbial glutaminase: biochemistry, molecular approaches and applications in the food industry 87

Glyceride

Enzymatic synthesis of partial glycerol caprate in solvent-free media 3

Glycosylation

Biotransformation using plant cultured cells 145

Haloacetate

Purification, characterization, and gene cloning of a novel fluoroacetate dehalogenase from *Burkholderia* sp. FA1 347

2-Haloacid amide

A new DL-2-haloacid dehalogenase acting on 2-haloacid amides: purification, characterization, and mechanism 329

Haloalkane dehalogenase

Purification, characterization, and gene cloning of a novel fluoroacetate dehalogenase from *Burkholderia* sp. FA1 347

Halobacterium saccharovorum

Novel halophilic 2-aminobutyrate dehydrogenase from *Halobacterium saccharovorum* DSM 1137 223

Halophilic dehydrogenase

Novel halophilic 2-aminobutyrate dehydrogenase from *Halobacterium saccharovorum* DSM 1137 223

Purification and characterization of leucine dehydrogenase from an alkaliphilic halophile, *Natronobacterium magadii* MS-3 231

Hydrogen bonding network

Conserved structural modules and bonding networks in isopenicillin N synthase related non-haem iron-dependent oxygenases and oxidases 17

Hydrogenation

Biotransformation using plant cultured cells 145

Hydrolysis

High enantioselective resolution of racemic 2-arylpropionic acids in an enzyme membrane reactor 43

Phospholipase D from *Streptovorticillium cinnamomeum*: protein engineering and application for phospholipid production 107

Biotransformation using plant cultured cells 145

Hydroxycinnamoyl-CoA

Anthocyanin acyltransferases: specificities, mechanism, phylogenetics, and applications 117

- Hydroxylation
 Biotransformation using plant cultured cells 145
- β -Hydroxypyruvate
 Purification and characterization of alanine dehydrogenase from a marine bacterium, *Vibrio proteolyticus* 373
- Hyperthermophile
 A nicotinamide mononucleotide adenylyltransferase with unique adenylyl group donor specificity from a hyperthermophilic archaeon, *Pyrococcus horikoshii* OT-3 273
- Keto ester
 Stereoselective reduction of keto esters: thermophilic bacteria and microalgae as new biocatalysts 171
- α -Ketobutyrate
 Purification and substrate characterization of α -ketobutyrate decarboxylase from *Pseudomonas putida* 265
- α -Ketobutyrate decarboxylase
 Purification and substrate characterization of α -ketobutyrate decarboxylase from *Pseudomonas putida* 265
- 2-Ketogalactonate reductase
 Enzymatic synthesis of 2-keto-D-gluconate and 2-keto-D-galactonate from D-glucose and D-galactose with cell culture of *Pseudomonas fluorescens* and 2-keto-galactonate from D-galactono 1,4-lactone with partially purified 2-ketogalactonate reductase 291
- 2-Ketogluconate
 Enzymatic synthesis of 2-keto-D-gluconate and 2-keto-D-galactonate from D-glucose and D-galactose with cell culture of *Pseudomonas fluorescens* and 2-keto-galactonate from D-galactono 1,4-lactone with partially purified 2-ketogalactonate reductase 291
- Kinetic resolution
 High enantioselective resolution of racemic 2-arylpropionic acids in an enzyme membrane reactor 43
- Lactamide
 A new DL-2-haloacid dehalogenase acting on 2-haloacid amides: purification, characterization, and mechanism 329
- L-Alanine
 Novel halophilic 2-aminobutyrate dehydrogenase from *Halo-bacterium saccharovorum* DSM 1137 223
- L-2-Aminobutyrate
 Novel halophilic 2-aminobutyrate dehydrogenase from *Halo-bacterium saccharovorum* DSM 1137 223
- Lentinus edodes* (Shiitake)
 Occurrence of a unique amino acid racemase in a basidiomycetous mushroom, *Lentinus edodes* 379
- Leucine dehydrogenase
 Cloning and sequencing of the leucine dehydrogenase gene from *Bacillus sphaericus* IFO 3525 and importance of the C-terminal region for the enzyme activity 239
 Alteration of substrate specificity of leucine dehydrogenase by site-directed mutagenesis 299
- L-2-Haloacid dehalogenase
 Mass spectrometric analysis of the reactions catalyzed by L-2-haloacid dehalogenase mutants and implications for the roles of the catalytic amino acid residues 337
- Light-resistivity
 Structural aspects of acylated plant pigments: stabilization of flavonoid glucosides and interpretation of their functions 411
- Lipase
 Enzymatic synthesis of partial glycerol caprate in solvent-free media 3
- L-Leucine
 Purification and characterization of leucine dehydrogenase from an alkaliphilic halophile, *Natronobacterium magadii* MS-3 231
- L-Leucine dehydrogenase
 Purification and characterization of leucine dehydrogenase from an alkaliphilic halophile, *Natronobacterium magadii* MS-3 231
- L-Serine
 Purification and characterization of alanine dehydrogenase from a marine bacterium, *Vibrio proteolyticus* 373
- Major urinary protein
 A novel regulatory function of selenocysteine lyase, a unique catalyst to modulate major urinary protein 367
- Malonyl-CoA
 Anthocyanin acyltransferases: specificities, mechanism, phylogenetics, and applications 117
- Marine algae
 Stereoselective reduction of keto esters: thermophilic bacteria and microalgae as new biocatalysts 171
- Marine pollution
 Improvement of marine environmental pollution using ecosystem: decomposition and recovery of endocrine disrupting chemicals by marine phyto- and zooplanktons 419
- Mass spectrometry
 A new DL-2-haloacid dehalogenase acting on 2-haloacid amides: purification, characterization, and mechanism 329
 Mass spectrometric analysis of the reactions catalyzed by L-2-haloacid dehalogenase mutants and implications for the roles of the catalytic amino acid residues 337
- Membranous enzyme
 Poly- γ -glutamate synthetase of *Bacillus subtilis* 101
- Microaqueous
 Enzymatic synthesis of partial glycerol caprate in solvent-free media 3
- Modified Entner-Doudoroff pathway
 The *Sulfolobus tokodaii* gene ST1704 codes highly thermostable glucose dehydrogenase 281
- Monofluoroacetate
 Cosynthesis of monofluoroacetate and 4-fluorothreonine by resting cells of blocked mutants of *Streptomyces cattleya* NRRL8057 257
- Mushroom
 Discovery of alcohol dehydrogenase from mushrooms and application to alcoholic beverages 133
 Occurrence of a unique amino acid racemase in a basidiomycetous mushroom, *Lentinus edodes* 379
- NAD biosynthesis
 A nicotinamide mononucleotide adenylyltransferase with unique adenylyl group donor specificity from a hyperthermophilic archaeon, *Pyrococcus horikoshii* OT-3 273

NAD(P)-dependent glucose-1-dehydrogenase

The *Sulfolobus tokodaii* gene ST1704 codes highly thermostable glucose dehydrogenase 281

NADP

Enzymatic synthesis of 2-keto-D-gluconate and 2-keto-D-galactonate from D-glucose and D-galactose with cell culture of *Pseudomonas fluorescens* and 2-keto-galactonate from D-galactono 1,4-lactone with partially purified 2-ketogalactonate reductase 291

NADPH

Enzymatic synthesis of 2-keto-D-gluconate and 2-keto-D-galactonate from D-glucose and D-galactose with cell culture of *Pseudomonas fluorescens* and 2-keto-galactonate from D-galactono 1,4-lactone with partially purified 2-ketogalactonate reductase 291

Natronobacterium magadii

Purification and characterization of leucine dehydrogenase from an alkaliphilic halophile, *Natronobacterium magadii* MS-3 231

Naturally plant pigment

Structural aspects of acylated plant pigments: stabilization of flavonoid glucosides and interpretation of their functions 411

Nicotinamide mononucleotide adenyltransferase

A nicotinamide mononucleotide adenyltransferase with unique adenyl group donor specificity from a hyperthermophilic archaeon, *Pyrococcus horikoshii* OT-3 273

Non-haem iron-dependent oxygenases and oxidases

Conserved structural modules and bonding networks in isopenicillin N synthase related non-haem iron-dependent oxygenases and oxidases 17

Nucleotide sequence

Cloning and sequencing of the leucine dehydrogenase gene from *Bacillus sphaericus* IFO 3525 and importance of the C-terminal region for the enzyme activity 239

Optical resolution enzymes for D-amino acids

Production of D-amino acids by N-acyl-D-amino acid amidohydrolase and its structure and function 71

Optically active alcohol metabolite

Stereoselective reduction of 4-benzoylpyridine by recombinant pig heart carbonyl reductase 29

Oxido-reduction

Biotransformation using plant cultured cells 145

Peptidoglycan

Molecular characterization of alanine racemase from *Bifidobacterium bifidum* 213

Phospholipase D

Phospholipase D from *Streptovorticillium cinnamoneum*: protein engineering and application for phospholipid production 107

Phospholipid hydroperoxide glutathione peroxidase

Structure and function of a phospholipid hydroperoxide glutathione peroxidase-like protein from barley 397

Phospholipid synthesis

Phospholipase D from *Streptovorticillium cinnamoneum*: protein engineering and application for phospholipid production 107

Phytoplankton

Improvement of marine environmental pollution using ecosystem: decomposition and recovery of endocrine disrupting chemicals by marine phyto- and zooplanktons 419

Plant cultured cells

Biotransformation using plant cultured cells 145

Plant secondary metabolism

Anthocyanin acyltransferases: specificities, mechanism, phylogenetics, and applications 117

Poly- γ -glutamate

Poly- γ -glutamate synthetase of *Bacillus subtilis* 101

Poly- γ -glutamate depolymerase of *Bacillus subtilis*: production, simple purification and substrate selectivity 249

Primary structure

Cloning and sequencing of the leucine dehydrogenase gene from *Bacillus sphaericus* IFO 3525 and importance of the C-terminal region for the enzyme activity 239

Primary structure of glucose dehydrogenase

The *Sulfolobus tokodaii* gene ST1704 codes highly thermostable glucose dehydrogenase 281

Probiotic agent

Molecular characterization of alanine racemase from *Bifidobacterium bifidum* 213

Propionyl coenzyme A

Purification and substrate characterization of α -ketobutyrate decarboxylase from *Pseudomonas putida* 265

Protein engineering

Alteration of substrate specificity of leucine dehydrogenase by site-directed mutagenesis 299

Conversion of the catalytic specificity of alanine racemase to a D-amino acid aminotransferase activity by a double active-site mutation 311

Protein-protein interaction

A novel regulatory function of selenocysteine lyase, a unique catalyst to modulate major urinary protein 367

Pseudomonas fluorescens

Enzymatic synthesis of 2-keto-D-gluconate and 2-keto-D-galactonate from D-glucose and D-galactose with cell culture of *Pseudomonas fluorescens* and 2-keto-galactonate from D-galactono 1,4-lactone with partially purified 2-ketogalactonate reductase 291

Psychrophile

Paradoxical thermostable enzymes from psychrophile: molecular characterization and potentiality for biotechnological application 65

Psychrophilicity

Improvement in thermostability and psychrophilicity of psychrophilic alanine racemase by site-directed mutagenesis 389

Psychrotroph

A novel esterase from a psychrotrophic bacterium, *Acinetobacter* sp. strain no. 6, that belongs to the amidase signature family 357

Pyridoxal 5'-phosphate

Conversion of the catalytic specificity of alanine racemase to a D-amino acid aminotransferase activity by a double active-site mutation 311

- D-Amino acid aminotransferase: fragmentation at a flexible loop is an efficient method to generate mutant enzymes with new substrate specificities and elevated activities 321
- Pyrococcus horikoshii*
A nicotinamide mononucleotide adenylyltransferase with unique adenylyl group donor specificity from a hyperthermophilic archaeon, *Pyrococcus horikoshii* OT-3 273
- Pyruvate dehydrogenase E1 component
Purification and substrate characterization of α -ketobutyrate decarboxylase from *Pseudomonas putida* 265
- Racemase
Occurrence of a unique amino acid racemase in a basidiomycetous mushroom, *Lentinus edodes* 379
- Reaction mechanism
Mass spectrometric analysis of the reactions catalyzed by L-2-haloacid dehalogenase mutants and implications for the roles of the catalytic amino acid residues 337
- Recombinant enzyme
Stereoselective reduction of 4-benzoylpyridine by recombinant pig heart carbonyl reductase 29
- Salt stress
Structure and function of a phospholipid hydroperoxide glutathione peroxidase-like protein from barley 397
- Selenium
A novel regulatory function of selenocysteine lyase, a unique catalyst to modulate major urinary protein 367
- Selenocysteine lyase
A novel regulatory function of selenocysteine lyase, a unique catalyst to modulate major urinary protein 367
- Sequence processes
High enantioselective resolution of racemic 2-arylpropionic acids in an enzyme membrane reactor 43
- Serine protease
Earthworm-serine protease: characterization, molecular cloning, and application of the catalytic functions 191
Structure and function of an isozyme of earthworm proteases as a new biocatalyst 405
- Site-directed mutagenesis
Improvement in thermostability and psychrophilicity of psychrophilic alanine racemase by site-directed mutagenesis 389
- Solvent-free
Enzymatic synthesis of partial glycerol caprate in solvent-free media 3
- Stabilization by salts
Purification and characterization of alanine dehydrogenase from a marine bacterium, *Vibrio proteolyticus* 373
- Stereoselective
Stereoselective esterification of 2,6-dimethyl-1,7-heptanedioic acid, catalysed by *Candida rugosa* lipase 53
- Stereoselective reduction
Stereoselective reduction of 4-benzoylpyridine by recombinant pig heart carbonyl reductase 29
Stereoselective reduction of keto esters: thermophilic bacteria and microalgae as new biocatalysts 171
- Stereoselectivity
Biotransformation using plant cultured cells 145
- Streptomyces cattleya*
Cosynthesis of monofluoroacetate and 4-fluorothreonine by resting cells of blocked mutants of *Streptomyces cattleya* NRRL8057 257
- Streptomyces* sp
Phospholipase D from *Streptoverticillium cinnamomeum*: protein engineering and application for phospholipid production 107
- Structure and function
Earthworm-serine protease: characterization, molecular cloning, and application of the catalytic functions 191
- Substrate selectivity
Poly- γ -glutamate depolymerase of *Bacillus subtilis*: production, simple purification and substrate selectivity 249
- Substrate specificity
Alteration of substrate specificity of leucine dehydrogenase by site-directed mutagenesis 299
- Subunit interaction
Cloning and sequencing of the leucine dehydrogenase gene from *Bacillus sphaericus* IFO 3525 and importance of the C-terminal region for the enzyme activity 239
- Sulfolobus tokodaii*
The *Sulfolobus tokodaii* gene ST1704 codes highly thermostable glucose dehydrogenase 281
- Synthesis
Stereoselective esterification of 2,6-dimethyl-1,7-heptanedioic acid, catalysed by *Candida rugosa* lipase 53
- Synthetase
Poly- γ -glutamate synthetase of *Bacillus subtilis* 101
- Thermoacidophilic archaeon
The *Sulfolobus tokodaii* gene ST1704 codes highly thermostable glucose dehydrogenase 281
- Thermophilic actinomycetes
Stereoselective reduction of keto esters: thermophilic bacteria and microalgae as new biocatalysts 171
- Thermophilic bacteria
Stereoselective reduction of keto esters: thermophilic bacteria and microalgae as new biocatalysts 171
- Thermostability
Purification and characterization of alanine dehydrogenase from a marine bacterium, *Vibrio proteolyticus* 373
Improvement in thermostability and psychrophilicity of psychrophilic alanine racemase by site-directed mutagenesis 389
Structural aspects of acylated plant pigments: stabilization of flavonoid glucosides and interpretation of their functions 411
- Thermostable enzyme
Paradoxical thermostable enzymes from psychrophile: molecular characterization and potentiality for biotechnological application 65
- Transamination
Conversion of the catalytic specificity of alanine racemase to a D-amino acid aminotransferase activity by a double active-site mutation 311

Transphosphatidylation

Phospholipase D from *Streptovericillium cinnamoneum*: protein engineering and application for phospholipid production 107

Versatile plant acyltransferase family

Anthocyanin acyltransferases: specificities, mechanism, phylogenetics, and applications 117

Yeast two-hybrid screening

A novel regulatory function of selenocysteine lyase, a unique catalyst to modulate major urinary protein 367

Zooplankton

Improvement of marine environmental pollution using ecosystem: decomposition and recovery of endocrine disrupting chemicals by marine phyto- and zooplanktons 419
