

Contents

Special Issue: "Enzyme Biochemistry and Biotechnology"

Guest Editor: Prof. N. Nakajima

Preface	61
-------------------	----

Invited review

Paradoxical thermostable enzymes from psychrophile: molecular characterization and potentiality for biotechnological application T. Oikawa, T. Kazuoka and K. Soda (Osaka, Japan)	65
--	----

Reviews

Production of D-amino acids by <i>N</i> -acyl-D-amino acid amidohydrolase and its structure and function M. Wakayama (Shiga, Japan), K. Yoshimune (Oita, Japan), Y. Hirose (Gifu, Japan) and M. Moriguchi (Oita, Japan)	71
Microbial glutaminase: biochemistry, molecular approaches and applications in the food industry R. Nandakumar (Baltimore, MD, USA), K. Yoshimune (Oita, Japan), M. Wakayama (Shiga, Japan) and M. Moriguchi (Oita, Japan)	87
Poly- γ -glutamate synthetase of <i>Bacillus subtilis</i> M. Ashiuchi, T. Kamei and H. Misono (Kochi, Japan)	101
Phospholipase D from <i>Streptovorticillium cinnamomeum</i> : protein engineering and application for phospholipid production C. Ogino (Kanazawa, Japan), S. Kuroda (Osaka, Japan), S. Tokuyama (Shizuoka, Japan), A. Kondo (Kobe, Japan), N. Shimizu (Kanazawa, Japan), K. Tanizawa (Osaka, Japan) and H. Fukuda (Kobe, Japan)	107
Anthocyanin acyltransferases: specificities, mechanism, phylogenetics, and applications T. Nakayama, H. Suzuki and T. Nishino (Miyagi, Japan)	117
Discovery of alcohol dehydrogenase from mushrooms and application to alcoholic beverages T. Okamura-Matsui, T. Tomoda, S. Fukuda and M. Ohsugi (Hyogo, Japan)	133
Biotransformation using plant cultured cells K. Ishihara (Kyoto, Japan), H. Hamada (Okayama, Japan), T. Hirata (Hiroshima, Japan) and N. Nakajima (Okayama, Japan)	145
Stereoselective reduction of keto esters: thermophilic bacteria and microalgae as new biocatalysts K. Ishihara (Kyoto, Japan), H. Yamaguchi (Kobe, Japan) and N. Nakajima (Okayama, Japan)	171
Earthworm-serine protease: characterization, molecular cloning, and application of the catalytic functions N. Nakajima, M. Sugimoto (Okayama, Japan) and K. Ishihara (Kyoto, Japan)	191

Articles

Molecular characterization of alanine racemase from <i>Bifidobacterium bifidum</i> T. Yamashita, M. Ashiuchi, K. Ohnishi, S. Kato, S. Nagata and H. Misono (Kochi, Japan)	213
Novel halophilic 2-aminobutyrate dehydrogenase from <i>Halobacterium saccharovorum</i> DSM 1137 S. Nagata, Y. Kobayashi, S. Shinkawa, R. Katoh (Kochi, Japan), T. Ohshima (Tokushima, Japan) and H. Misono (Kochi, Japan)	223
Purification and characterization of leucine dehydrogenase from an alkaliphilic halophile, <i>Natronobacterium magadii</i> MS-3 R. Katoh, S. Nagata, A. Ozawa (Kochi, Japan), T. Ohshima (Tokushima, Japan), M. Kamekura (Chiba, Japan) and H. Misono (Kochi, Japan)	231
Cloning and sequencing of the leucine dehydrogenase gene from <i>Bacillus sphaericus</i> IFO 3525 and importance of the C-terminal region for the enzyme activity R. Katoh, S. Nagata and H. Misono (Kochi, Japan)	239
Poly- γ -glutamate depolymerase of <i>Bacillus subtilis</i> : production, simple purification and substrate selectivity M. Ashiuchi, H. Nakamura, T. Yamamoto, T. Kamei (Kochi, Japan), K. Soda (Osaka, Japan), C. Park, M.-H. Sung (Daejeon, South Korea), T. Yagi and H. Misono (Kochi, Japan)	249

Cosynthesis of monofluoroacetate and 4-fluorothreonine by resting cells of blocked mutants of <i>Streptomyces cattleya</i> NRRL8057 T. Tamura, Y. Sawamoto, T. Kuriyama, K. Oba, H. Tanaka and K. Inagaki (Okayama, Japan)	257
Purification and substrate characterization of α -ketobutyrate decarboxylase from <i>Pseudomonas putida</i> H. Inoue, A. Nishito, S. Eriguchi, T. Tamura, K. Inagaki and H. Tanaka (Okayama, Japan)	265
A nicotinamide mononucleotide adenylyltransferase with unique adenylyl group donor specificity from a hyperthermo- philic archaeon, <i>Pyrococcus horikoshii</i> OT-3 H. Sakuraba, K. Kanai, S. Goda (Tokushima, Japan), Y. Kawarabayasi (Osaka, Japan) and T. Ohshima (Tokushima, Japan)	273
The <i>Sulfolobus tokodaii</i> gene ST1704 codes highly thermostable glucose dehydrogenase T. Ohshima, Y. Ito, H. Sakuraba, S. Goda (Tokushima, Japan) and Y. Kawarabayasi (Osaka, Japan)	281
Enzymatic synthesis of 2-keto-D-gluconate and 2-keto-D-galactonate from D-glucose and D-galactose with cell culture of <i>Pseudomonas fluorescens</i> and 2-keto-galactonate from D-galactono 1,4-lactone with partially purified 2-ketogalacto- nate reductase R. Tanimura, A. Hamada, K. Ikehara and R. Iwamoto (Nara, Japan)	291
Alteration of substrate specificity of leucine dehydrogenase by site-directed mutagenesis K. Kataoka (Ishikawa, Japan) and K. Tanizawa (Osaka, Japan)	299
Conversion of the catalytic specificity of alanine racemase to a D-amino acid aminotransferase activity by a double active-site mutation G.-Y. Yow, A. Watanabe, T. Yoshimura and N. Esaki (Kyoto, Japan)	311
D-Amino acid aminotransferase: fragmentation at a flexible loop is an efficient method to generate mutant enzymes with new substrate specificities and elevated activities Y. Fuchikami, T. Yoshimura and N. Esaki (Kyoto, Japan)	321
A new D,L-2-haloacid dehalogenase acting on 2-haloacid amides: purification, characterization, and mechanism C. Park, T. Kurihara, T. Yoshimura, K. Soda and N. Esaki (Kyoto, Japan)	329
Mass spectrometric analysis of the reactions catalyzed by L-2-haloacid dehalogenase mutants and implications for the roles of the catalytic amino acid residues Y.-F. Li, T. Kurihara, S. Ichihara (Kyoto, Japan), M. Miyagi, S. Tsunasawa (Shiga, Japan) and N. Esaki (Kyoto, Japan)	337
Purification, characterization, and gene cloning of a novel fluoroacetate dehalogenase from <i>Burkholderia</i> sp. FA1 T. Kurihara, T. Yamauchi, S. Ichihara, H. Takahata and N. Esaki (Kyoto, Japan)	347
A novel esterase from a psychrotrophic bacterium, <i>Acinetobacter</i> sp. strain no. 6, that belongs to the amidase signature family Y.-I. Wei, T. Kurihara, T. Suzuki and N. Esaki (Kyoto, Japan)	357
A novel regulatory function of selenocysteine lyase, a unique catalyst to modulate major urinary protein M.-S. Kwak, H. Mihara and N. Esaki (Kyoto, Japan)	367
Purification and characterization of alanine dehydrogenase from a marine bacterium, <i>Vibrio proteolyticus</i> S. Kato (Kochi, Japan), T. Ohshima (Tokushima, Japan), A. Galkin, L. Kulakova, T. Yoshimura and N. Esaki (Kyoto, Japan)	373
Occurrence of a unique amino acid racemase in a basidiomycetous mushroom, <i>Lentinus edodes</i> A. Watanabe, S. Yamaguchi, K. Urabe and Y. Asada (Kagawa, Japan)	379
Improvement in thermostability and psychrophilicity of psychrophilic alanine racemase by site-directed mutagenesis K. Yokoigawa, Y. Okubo (Nara, Japan), K. Soda (Osaka, Japan) and H. Misono (Kochi, Japan)	389
Structure and function of a phospholipid hydroperoxide glutathione peroxidase-like protein from barley M. Sugimoto and K. Takeda (Okayama, Japan)	397
Structure and function of an isozyme of earthworm proteases as a new biocatalyst M. Sugimoto (Okayama, Japan), K. Ishihara (Kyoto, Japan) and N. Nakajima (Okayama, Japan)	405
Structural aspects of acylated plant pigments: stabilization of flavonoid glucosides and interpretation of their functions K. Ishihara (Kyoto, Japan) and N. Nakajima (Okayama, Japan)	411
Improvement of marine environmental pollution using eco-system: decomposition and recovery of endocrine disrupting chemicals by marine phyto- and zooplanktons K. Ishihara (Kyoto, Japan) and N. Nakajima (Okayama, Japan)	419
