

Subject Index

Acetone pretreatment

Enhanced activity and stability of *Chromobacterium viscosum* lipase in AOT reverse micellar systems by pretreatment with acetone 149

Acetonitrile

Synthesis of kyotorphin precursor by an organic solvent-stable protease from *Bacillus licheniformis* RSP-09-37 1

Activation

Activation in the family of *Candida rugosa* islipases by polyethylene glycol 225

Adsorption

The adsorption characteristics, activity and stability of trypsin onto mesoporous silicates 231

Aerogel

Compared esterification kinetics of the lipase from *Burkholderia cepacia* either free or encapsulated in a silica aerogel 193

Alcaligenes sp.

Synthesis of versatile chiral intermediate for drimane sesquiterpenes and labdane diterpenes based on enzymatic resolution 141

Almond β -D-glucosidase

Construction and optimization of a monophasic organic–water system for enzymatic synthesis of *p*-nitrobenzyl β -D-glucopyranosides by reverse hydrolysis 83

α -Amino acids

Microbial deracemization of α -amino acids 157

Aspergillus niger

Immobilization of epoxide hydrolase from *Aspergillus niger* onto DEAE-cellulose: enzymatic properties and application for the enantioselective resolution of a racemic epoxide 175

D-Amino acid

D-Amino acid production by *E. coli* co-expressed three genes encoding hydantoin racemase, D-hydantoinase and *N*-carbamoyl-D-amino acid amidohydrolase 213

Efficient immobilization of epoxide hydrolase onto silica gel and use in the enantioselective hydrolysis of racemic *para*-nitrostyrene oxide 219

Bacillus subtilis 168

Comparison and functional characterisation of three homologous intracellular carboxylesterases of *Bacillus subtilis* 261

Baeyer–Villiger oxidation

Biooxidation of ketones with a cyclobutanone structural motif by recombinant whole-cells expressing 4-hydroxyacetophenone monooxygenase 135

Biocatalysis

Esterification of streptol — a cyclitol derivative — by *Candida rugosa* lipase: influence of the acyl donor on regioselectivity 247

Reaction of *Trigonopsis variabilis* D-amino acid oxidase with 2,6-dichloroindophenol: kinetic characterisation and development of an oxygen-independent assay of the enzyme activity 271

Biodiesel

Study on the kinetics of enzymatic interesterification of triglycerides for biodiesel production with methyl acetate as the acyl acceptor 241

Bioreactor

Chrysotile as a support for the immobilisation of *Mycobacterium* sp. NRRL B-3805 cells for the bioconversion of β -sitosterol in an organic–aqueous two-liquid phase system 61

Bioreductions

Assessing substrate acceptance and enantioselectivity of yeast reductases in reactions with substituted α -keto β -lactams 167

Biotransformation

Biotransformation of valencene by cultured cells of *Gynostemma pentaphyllum* 103

Biotransformation of (+)-(1*R*)- and (–)-(1*S*)-fenchone by the larvae of common cutworm (*Spodoptera litura*) 123

n-Butyl acetoacetate

Lipase catalyzed transesterification of methyl acetoacetate with *n*-butanol 107

Butyrolactones

Biooxidation of ketones with a cyclobutanone structural motif by recombinant whole-cells expressing 4-hydroxyacetophenone monooxygenase 135

Candida rugosa

Activation in the family of *Candida rugosa* islipases by polyethylene glycol 225

Candida rugosa lipase

Acetylenic polymers as new immobilization matrices for lipolytic enzymes 67

Esterification of streptol — a cyclitol derivative — by *Candida rugosa* lipase: influence of the acyl donor on regioselectivity 247

N-Carbamoyl-D-amino acid amidohydrolase

Purification and properties of D-hydantoin hydrolase and *N*-carbamoyl-D-amino acid amidohydrolase from *Flavobacterium* sp. AJ11199 and *Pasteurella* sp. AJ11221 205

N-Carbamoyl-D-Amino acid amidohydrolase

D-Amino acid production by *E. coli* co-expressed three genes encoding hydantoin racemase, D-hydantoinase and *N*-carbamoyl-D-amino acid amidohydrolase 213

Carboxylesterase

Comparison and functional characterisation of three homologous intracellular carboxylesterases of *Bacillus subtilis* 261

Carrier

Acetylenic polymers as new immobilization matrices for lipolytic enzymes 67

Cell immobilisation

Chrysotile as a support for the immobilisation of *Mycobacterium* sp. NRRL B-3805 cells for the bioconversion of β -sitosterol in an organic–aqueous two-liquid phase system 61

Chiral fragrances

Lipase-catalysed preparation of enantiomerically enriched odorants 33

Cholesterol esterase

Activation in the family of *Candida rugosa* islipases by polyethylene glycol 225

Chrysotile

Chrysotile as a support for the immobilisation of *Mycobacterium* sp. NRRL B-3805 cells for the bioconversion of β -sitosterol in an organic–aqueous two-liquid phase system 61

COX

Peroxidase-catalyzed synthesis of neolignan and its anti-inflammatory activity 7

- Cultured cells
Hydrogenation of the C–C double bond of maleimides with cultured plant cells 131
- Cyclobutanones
Biooxidation of ketones with a cyclobutanone structural motif by recombinant whole-cells expressing 4-hydroxyacetophenone monooxygenase 135
- Dead-end complex
Kinetic study of monophenol and *o*-diphenol binding to oxytyrosinase 185
- Desorption
The adsorption characteristics, activity and stability of trypsin onto mesoporous silicates 231
- Dextran coating of enzymes
Dextran aldehyde coating of glucose oxidase immobilized on magnetic nanoparticles prevents its inactivation by gas bubbles 97
- β -D-Glucopyranoside
Construction and optimization of a monophasic organic–water system for enzymatic synthesis of *p*-nitrobenzyl β -D-glucopyranosides by reverse hydrolysis 83
- D-glycerate-2-kinase
Method for the enzymatic synthesis of 2-phospho-D-glycerate from adenosine 5'-triphosphate and D-glycerate via D-glycerate-2-kinase 77
- D-Hydantoin hydrolase
Purification and properties of D-hydantoin hydrolase and *N*-carbamoyl-D-amino acid amidohydrolase from *Flavobacterium* sp. AJ11199 and *Pasteurella* sp. AJ11221 205
- D-Hydantoinase
D-Amino acid production by *E. coli* co-expressed three genes encoding hydantoin racemase, D-hydantoinase and *N*-carbamoyl-D-amino acid amidohydrolase 213
- Dioxane–water system
Construction and optimization of a monophasic organic–water system for enzymatic synthesis of *p*-nitrobenzyl β -D-glucopyranosides by reverse hydrolysis 83
- D-Phenylalanine degrading microorganisms
Microbial deracemization of α -amino acids 157
- Dynamics
Effect of exogenous iron on aerobic catalytic mechanism of soybean lipoxygenase 21
- Electron acceptor
Reaction of *Trigonopsis variabilis* D-amino acid oxidase with 2,6-dichloroindophenol: kinetic characterisation and development of an oxygen-independent assay of the enzyme activity 271
- Enantiomer
Lipase-catalysed preparation of enantiomerically enriched odorants 33
- Enantioselective acetylation
Synthesis of versatile chiral intermediate for drimane sesquiterpenes and labdane diterpenes based on enzymatic resolution 141
- Enantioselective inversion of configuration
Microbial deracemization of α -amino acids 157
- Enantioselective production
Comparison and functional characterisation of three homologous intracellular carboxylesterases of *Bacillus subtilis* 261
- Enantioselectivity
Enantioselective acylation of R-2-pentanol in a solid/gas reactor catalysed by lipase B from *Candida antarctica* 53
Efficient immobilization of epoxide hydrolase onto silica gel and use in the enantioselective hydrolysis of racemic *para*-nitrostyrene oxide 219
- Enzymatic peptide synthesis
Biocatalytic properties of native and immobilized subtilisin 72 in aqueous-organic and low water media 253
- Enzymatic resolution
Synthesis of versatile chiral intermediate for drimane sesquiterpenes and labdane diterpenes based on enzymatic resolution 141
- Immobilization of epoxide hydrolase from *Aspergillus niger* onto DEAE-cellulose: enzymatic properties and application for the enantioselective resolution of a racemic epoxide 175
- Enzymatic synthesis
Peroxidase-catalyzed synthesis of neolignan and its anti-inflammatory activity 7
- Enzyme assay
Reaction of *Trigonopsis variabilis* D-amino acid oxidase with 2,6-dichloroindophenol: kinetic characterisation and development of an oxygen-independent assay of the enzyme activity 271
- Enzyme immobilization
Comparison of hydrolytic activities in aqueous and organic media for lipases immobilized on poly(acrylonitrile-*co*-maleic acid) ultrafiltration hollow fiber membrane 115
Efficient immobilization of epoxide hydrolase onto silica gel and use in the enantioselective hydrolysis of racemic *para*-nitrostyrene oxide 219
- Enzyme inactivation
Dextran aldehyde coating of glucose oxidase immobilized on magnetic nanoparticles prevents its inactivation by gas bubbles 97
- Enzyme stability
Efficient immobilization of epoxide hydrolase onto silica gel and use in the enantioselective hydrolysis of racemic *para*-nitrostyrene oxide 219
- Epinootkatol
Biotransformation of valencene by cultured cells of *Gynostemma pentaphyllum* 103
- Epoxide hydrolase
Immobilization of epoxide hydrolase from *Aspergillus niger* onto DEAE-cellulose: enzymatic properties and application for the enantioselective resolution of a racemic epoxide 175
Efficient immobilization of epoxide hydrolase onto silica gel and use in the enantioselective hydrolysis of racemic *para*-nitrostyrene oxide 219
- Esterification
Compared esterification kinetics of the lipase from *Burkholderia cepacia* either free or encapsulated in a silica aerogel 193
Esterification of streptol — a cyclitol derivative — by *Candida rugosa* lipase: influence of the acyl donor on regioselectivity 247
- Flavobacterium*
Purification and properties of D-hydantoin hydrolase and *N*-carbamoyl-D-amino acid amidohydrolase from *Flavobacterium* sp. AJ11199 and *Pasteurella* sp. AJ11221 205
- Flavoenzyme
Reaction of *Trigonopsis variabilis* D-amino acid oxidase with 2,6-dichloroindophenol: kinetic characterisation and development of an oxygen-independent assay of the enzyme activity 271
- Formal synthesis
Synthesis of versatile chiral intermediate for drimane sesquiterpenes and labdane diterpenes based on enzymatic resolution 141
- Glucose oxidase
Dextran aldehyde coating of glucose oxidase immobilized on magnetic nanoparticles prevents its inactivation by gas bubbles 97
- Gynostemma pentaphyllum*
Biotransformation of valencene by cultured cells of *Gynostemma pentaphyllum* 103
- Hydantoin racemase
D-Amino acid production by *E. coli* co-expressed three genes encoding hydantoin racemase, D-hydantoinase and *N*-carbamoyl-D-amino acid amidohydrolase 213
- Hydrogenation
Hydrogenation of the C–C double bond of maleimides with cultured plant cells 131
- Hydrolysis
Enhanced activity and stability of *Chromobacterium viscosum* lipase in AOT reverse micellar systems by pretreatment with acetone 149

Hydrophobic

Acetylenic polymers as new immobilization matrices for lipolytic enzymes 67

Hydrophobic amino acids

Enhanced activity and stability of *Chromobacterium viscosum* lipase in AOT reverse micellar systems by pretreatment with acetone 149

 α -Hydroxy β -lactams

Assessing substrate acceptance and enantioselectivity of yeast reductases in reactions with substituted α -keto β -lactams 167

4-Hydroxyacetophenone monooxygenase

Biooxidation of ketones with a cyclobutanone structural motif by recombinant whole-cells expressing 4-hydroxyacetophenone monooxygenase 135

Hydroxylation

Biotransformation of (+)-(1R)- and (-)-(1S)-fenchone by the larvae of common cutworm (*Spodoptera litura*) 123

N-Hydroxyphthalimide

Aryl substituted *N*-hydroxyphthalimides as mediators in the laccase-catalysed oxidation of lignin model compounds and delignification of wood pulp 89

Immobilization

Acetylenic polymers as new immobilization matrices for lipolytic enzymes 67

Immobilization of epoxide hydrolase from *Aspergillus niger* onto DEAE-cellulose: enzymatic properties and application for the enantioselective resolution of a racemic epoxide 175

The adsorption characteristics, activity and stability of trypsin onto mesoporous silicates 231

Immobilized lipases

Lipase catalyzed transesterification of methyl acetoacetate with *n*-butanol 107

Interaction with hydrophobic interfaces

Dextran aldehyde coating of glucose oxidase immobilized on magnetic nanoparticles prevents its inactivation by gas bubbles 97

Interesterification

Study on the kinetics of enzymatic interesterification of triglycerides for biodiesel production with methyl acetate as the acyl acceptor 241

Iron

Effect of exogenous iron on aerobic catalytic mechanism of soybean lipoxygenase 21

1,2-*O*-isopropylidene glycerol

Comparison and functional characterisation of three homologous intracellular carboxylesterases of *Bacillus subtilis* 261

 β -Keto ester

Lipase catalyzed transesterification of methyl acetoacetate with *n*-butanol 107

 α -Keto β -lactams

Assessing substrate acceptance and enantioselectivity of yeast reductases in reactions with substituted α -keto β -lactams 167

Kinetic model

Lipase catalyzed transesterification of methyl acetoacetate with *n*-butanol 107

Kinetics

Compared esterification kinetics of the lipase from *Burkholderia cepacia* either free or encapsulated in a silica aerogel 193

Study on the kinetics of enzymatic interesterification of triglycerides for biodiesel production with methyl acetate as the acyl acceptor 241

Kyotorphin

Synthesis of kyotorphin precursor by an organic solvent-stable protease from *Bacillus licheniformis* RSP-09-37 1

Laccase

Aryl substituted *N*-hydroxyphthalimides as mediators in the laccase-catalysed oxidation of lignin model compounds and delignification of wood pulp 89

Lignin

Aryl substituted *N*-hydroxyphthalimides as mediators in the laccase-catalysed oxidation of lignin model compounds and delignification of wood pulp 89

Lipase

Lipase-catalysed preparation of enantiomerically enriched odorants 33

Comparison of hydrolytic activities in aqueous and organic media for lipases immobilized on poly(acrylonitrile-*co*-maleic acid) ultrafiltration hollow fiber membrane 115

Synthesis of versatile chiral intermediate for drimane sesquiterpenes and labdane diterpenes based on enzymatic resolution 141

Compared esterification kinetics of the lipase from *Burkholderia cepacia* either free or encapsulated in a silica aerogel 193

Activation in the family of *Candida rugosa* isolipases by polyethylene glycol 225

Study on the kinetics of enzymatic interesterification of triglycerides for biodiesel production with methyl acetate as the acyl acceptor 241

Lipase activity and stability

Enhanced activity and stability of *Chromobacterium viscosum* lipase in AOT reverse micellar systems by pretreatment with acetone 149

Lipase B from *Candida antarctica*

Enantioselective acylation of R-2-pentanol in a solid/gas reactor catalysed by lipase B from *Candida antarctica* 53

Lipase-catalyzed acetylation

NMR monitoring of lipase-catalyzed reactions of prostaglandins: preliminary estimation of reaction velocities 15

Lipase-catalyzed esterification

NMR monitoring of lipase-catalyzed reactions of prostaglandins: preliminary estimation of reaction velocities 15

Lipoxygenase

Effect of exogenous iron on aerobic catalytic mechanism of soybean lipoxygenase 21

Low water media

Biocatalytic properties of native and immobilized subtilisin 72 in aqueous-organic and low water media 253

Low-water media

NMR monitoring of lipase-catalyzed reactions of prostaglandins: preliminary estimation of reaction velocities 15

LOX

Peroxidase-catalyzed synthesis of neolignan and its anti-inflammatory activity 7

Magnetic nanoparticles to immobilize enzymes

Dextran aldehyde coating of glucose oxidase immobilized on magnetic nanoparticles prevents its inactivation by gas bubbles 97

Maleimides

Hydrogenation of the C-C double bond of maleimides with cultured plant cells 131

Mechanism

Effect of exogenous iron on aerobic catalytic mechanism of soybean lipoxygenase 21

Mediator

Aryl substituted *N*-hydroxyphthalimides as mediators in the laccase-catalysed oxidation of lignin model compounds and delignification of wood pulp 89

Mesoporous silicates

The adsorption characteristics, activity and stability of trypsin onto mesoporous silicates 231

Methyl acetate

Study on the kinetics of enzymatic interesterification of triglycerides for biodiesel production with methyl acetate as the acyl acceptor 241

Methyl acetoacetate

Lipase catalyzed transesterification of methyl acetoacetate with *n*-butanol 107

Microbial deracemization

Microbial deracemization of α -amino acids 157

Monophenol and *o*-diphenol

Kinetic study of monophenol and *o*-diphenol binding to oxytyrosinase 185

Neolignan

Peroxidase-catalyzed synthesis of neolignan and its anti-inflammatory activity 7

N^α-Z-D-aminoadipate-δ-semialdehyde

Production of *N*^α-benzyloxycarbonyl-L-aminoadipic acid and *N*^α-benzyloxycarbonyl-D-aminoadipic acid with *Rhodococcus* sp. AIU Z-35-1 27

N^α-Z-D-aminoadipic acid

Production of *N*^α-benzyloxycarbonyl-L-aminoadipic acid and *N*^α-benzyloxycarbonyl-D-aminoadipic acid with *Rhodococcus* sp. AIU Z-35-1 27

N^α-Z-D-lysine

Production of *N*^α-benzyloxycarbonyl-L-aminoadipic acid and *N*^α-benzyloxycarbonyl-D-aminoadipic acid with *Rhodococcus* sp. AIU Z-35-1 27

N^α-Z-L-aminoadipate-δ-semialdehyde

Production of *N*^α-benzyloxycarbonyl-L-aminoadipic acid and *N*^α-benzyloxycarbonyl-D-aminoadipic acid with *Rhodococcus* sp. AIU Z-35-1 27

N^α-Z-L-aminoadipic acid

Production of *N*^α-benzyloxycarbonyl-L-aminoadipic acid and *N*^α-benzyloxycarbonyl-D-aminoadipic acid with *Rhodococcus* sp. AIU Z-35-1 27

N^α-Z-L-lysine

Production of *N*^α-benzyloxycarbonyl-L-aminoadipic acid and *N*^α-benzyloxycarbonyl-D-aminoadipic acid with *Rhodococcus* sp. AIU Z-35-1 27

p-Nitrophenyl palmitate hydrolysis

Comparison of hydrolytic activities in aqueous and organic media for lipases immobilized on poly(acrylonitrile-*co*-maleic acid) ultrafiltration hollow fiber membrane 115

Non-conventional media

Chrysotile as a support for the immobilisation of *Mycobacterium* sp. NRRL B-3805 cells for the bioconversion of β-sitosterol in an organic-aqueous two-liquid phase system 61

Nootkatol

Biotransformation of valencene by cultured cells of *Gynostemma pentaphyllum* 103

Nootkatone

Biotransformation of valencene by cultured cells of *Gynostemma pentaphyllum* 103

Novozym 435

Lipase catalyzed transesterification of methyl acetoacetate with *n*-butanol 107

Odour

Lipase-catalysed preparation of enantiomerically enriched odorants 33

Organic medium

Construction and optimization of a monophasic organic-water system for enzymatic synthesis of *p*-nitrobenzyl β-D-glucopyranosides by reverse hydrolysis 83

Organic solvent

Enantioselective acylation of R-2-pentanol in a solid/gas reactor catalysed by lipase B from *Candida antarctica* 53

Organic solvents

Biocatalytic properties of native and immobilized subtilisin 72 in aqueous-organic and low water media 253

Oxidation

Aryl substituted *N*-hydroxyphthalimides as mediators in the laccase-catalysed oxidation of lignin model compounds and delignification of wood pulp 89

Oxygen

Reaction of *Trigonopsis variabilis* D-amino acid oxidase with 2,6-dichloroindophenol: kinetic characterisation and development of an oxygen-independent assay of the enzyme activity 271

Oxytyrosinase

Kinetic study of monophenol and *o*-diphenol binding to oxytyrosinase 185

Pasteurella

Purification and properties of D-hydantoin hydrolase and *N*-carbamoyl-D-amino acid amidohydrolase from *Flavobacterium* sp. AJ11199 and *Pasteurella* sp. AJ11221 205

Peptide synthesis

Synthesis of kyotorphin precursor by an organic solvent-stable protease from *Bacillus licheniformis* RSP-09-37 1

Peroxidase

Peroxidase-catalyzed synthesis of neolignan and its anti-inflammatory activity 7

2-phospho-D-glycerate synthesis

Method for the enzymatic synthesis of 2-phospho-D-glycerate from adenosine 5'-triphosphate and D-glycerate via D-glycerate-2-kinase 77

Ping-pong bi-bi model

Lipase catalyzed transesterification of methyl acetoacetate with *n*-butanol 107

Plant catalyst

Biotransformation of valencene by cultured cells of *Gynostemma pentaphyllum* 103

Poly(acrylonitrile-*co*-maleic acid)

Comparison of hydrolytic activities in aqueous and organic media for lipases immobilized on poly(acrylonitrile-*co*-maleic acid) ultrafiltration hollow fiber membrane 115

Polyethylene glycol

Activation in the family of *Candida rugosa* isolipases by polyethylene glycol 225

Polyphenylacetylene

Acetylenic polymers as new immobilization matrices for lipolytic enzymes 67

Prostaglandin

NMR monitoring of lipase-catalyzed reactions of prostaglandins: preliminary estimation of reaction velocities 15

Protease

Synthesis of kyotorphin precursor by an organic solvent-stable protease from *Bacillus licheniformis* RSP-09-37 1

Reaction monitoring by NMR spectroscopy

NMR monitoring of lipase-catalyzed reactions of prostaglandins: preliminary estimation of reaction velocities 15

Reactor

Immobilization of epoxide hydrolase from *Aspergillus niger* onto DEAE-cellulose: enzymatic properties and application for the enantioselective resolution of a racemic epoxide 175

Regioselective

Biotransformation of (+)-(1*R*)- and (−)-(1*S*)-fenchone by the larvae of common cutworm (*Spodoptera litura*) 123

Regioselectivity

Esterification of streptol — a cyclitol derivative — by *Candida rugosa* lipase: influence of the acyl donor on regioselectivity 247

Resolution

Lipase-catalysed preparation of enantiomerically enriched odorants 33

Reverse micelles

Enhanced activity and stability of *Chromobacterium viscosum* lipase in AOT reverse micellar systems by pretreatment with acetone 149

Reversed hydrolysis

Construction and optimization of a monophasic organic–water system for enzymatic synthesis of *p*-nitrobenzyl β -D-glucopyranosides by reverse hydrolysis 83

S/H ratio

Synthesis of kyotorphin precursor by an organic solvent-stable protease from *Bacillus licheniformis* RSP-09-37 1

Solid/gas biocatalysis

Enantioselective acylation of R-2-pentanol in a solid/gas reactor catalysed by lipase B from *Candida antarctica* 53

Spodoptera litura

Biotransformation of (+)-(1*R*)- and (–)-(1*S*)-fenchone by the larvae of common cutworm (*Spodoptera litura*) 123

Stability

The adsorption characteristics, activity and stability of trypsin onto mesoporous silicates 231

Stereoselective

Biotransformation of (+)-(1*R*)- and (–)-(1*S*)-fenchone by the larvae of common cutworm (*Spodoptera litura*) 123

Streptol

Esterification of streptol — a cyclitol derivative — by *Candida rugosa* lipase: influence of the acyl donor on regioselectivity 247

Subtilisin

Biocatalytic properties of native and immobilized subtilisin 72 in aqueous-organic and low water media 253

Subtilisin immobilized on PVA cryogel

Biocatalytic properties of native and immobilized subtilisin 72 in aqueous-organic and low water media 253

Transesterification

Enantioselective acylation of R-2-pentanol in a solid/gas reactor catalysed by lipase B from *Candida antarctica* 53

Lipase catalyzed transesterification of methyl acetoacetate with *n*-butanol 107

Trypsin

The adsorption characteristics, activity and stability of trypsin onto mesoporous silicates 231

Ultrafiltration hollow fiber membrane

Comparison of hydrolytic activities in aqueous and organic media for lipases immobilized on poly(acrylonitrile-*co*-maleic acid) ultrafiltration hollow fiber membrane 115

Whole-cell biotransformation

Biooxidation of ketones with a cyclobutanone structural motif by recombinant whole-cells expressing 4-hydroxyacetophenone monooxygenase 135

YbfK

Comparison and functional characterisation of three homologous intracellular carboxylesterases of *Bacillus subtilis* 261

Yeast reductases

Assessing substrate acceptance and enantioselectivity of yeast reductases in reactions with substituted α -keto β -lactams 167

Yeast-catalyzed reductions

Assessing substrate acceptance and enantioselectivity of yeast reductases in reactions with substituted α -keto β -lactams 167
