

Subject Index

Absidia cylindrospora

Lactones 27 [1]: Transformations of γ -lactones fused to a dimethylcyclohexane ring in *Absidia cylindrospora* cultures 31

Aegeline

Bioreduction of 2-azido-1-arylethanones mediated by *Geotrichum candidum* and *Rhodotorula glutinis* 9

Aerogels

Immobilization in quartz fiber felt reinforced silica aerogel improves the activity of *Candida rugosa* lipase in organic solvents 77

Aldolase

A versatile colony assay based on NADH fluorescence 149

Amidase

Biotransformation of nitriles by *Rhodococcus equi* A4 immobilized in LentiKats® 59

Ampicillin

Kinetically controlled synthesis of ampicillin and cephalixin in highly condensed systems in the absence of a liquid aqueous phase 105

Aqueous–organic media

Biocatalytic properties of Baeyer–Villiger monooxygenases in aqueous–organic media 91

Aspergillus niger

Microbial transformations of flavanone and 6-hydroxyflavanone by *Aspergillus niger* strains 18

Mild hydrolysis of nitriles by the immobilized nitrilase from *Aspergillus niger* K10 55

Aspergillus terreus

Biotransformations of *ortho*-, *meta*- and *para*-aromatic nitrocompounds by strains of *Aspergillus terreus*: Reduction of ketones and deracemization of alcohols 24

Bacillus subtilis lipase A

The lid is a structural and functional determinant of lipase activity and selectivity 166

Baeyer–Villiger monooxygenase

Microbial Baeyer–Villiger oxidation of 4,4-disubstituted cyclohexan- and cyclohexenones by recombinant whole-cells expressing monooxygenases of bacterial origin 135

Biocatalytic properties of Baeyer–Villiger monooxygenases in aqueous–organic media 91

Baeyer–Villiger oxidation

Microbial Baeyer–Villiger oxidation of 4,4-disubstituted cyclohexan- and cyclohexenones by recombinant whole-cells expressing monooxygenases of bacterial origin 135

Benzonitrile

Mild hydrolysis of nitriles by the immobilized nitrilase from *Aspergillus niger* K10 55

Biotransformation

Biotransformations of *ortho*-, *meta*- and *para*-aromatic nitrocompounds by strains of *Aspergillus terreus*: Reduction of ketones and deracemization of alcohols 24

Lactones 27 [1]: Transformations of γ -lactones fused to a dimethylcyclohexane ring in *Absidia cylindrospora* cultures 31

Candida antarctica lipase B

The effect of water concentration on the activity and stability of CLECs in supercritical CO₂ in continuous operation 112

Candida rugosa lipase isoform 1

The lid is a structural and functional determinant of lipase activity and selectivity 166

CC-bond cleavage

Exploring the cupin-type metal-coordinating signature of acetylacetone dioxygenase Dke1 with site-directed mutagenesis: Catalytic reaction profile and Fe²⁺ binding stability of Glu-69 → Gln mutant 171

Cephalixin

Kinetically controlled synthesis of ampicillin and cephalixin in highly condensed systems in the absence of a liquid aqueous phase 105

Ceramic fiber felt reinforcement

Immobilization in quartz fiber felt reinforced silica aerogel improves the activity of *Candida rugosa* lipase in organic solvents 77

Chemoselectivity

Chemoselective enzymatic preparation of *N*-hydroxyalkylacrylamides, monomers for hydrophilic polymer matrices 50

Chiral compounds

Biocatalytic properties of Baeyer–Villiger monooxygenases in aqueous–organic media 91

Chirality

Lipase-mediated kinetic resolution of racemic and desymmetrization of prochiral organophosphorus P-boranes 45

ChiroCLEC™-CAB

The effect of water concentration on the activity and stability of CLECs in supercritical CO₂ in continuous operation 112

Colony screening

A versatile colony assay based on NADH fluorescence 149

Compressed gases

Influence of compressed fluids treatment on the activity of *Yarrowia lipolytica* lipase 117

Continuous reaction

The effect of water concentration on the activity and stability of CLECs in supercritical CO₂ in continuous operation 112

Covalent attachment

Immobilization of *Mucor javanicus* lipase on effectively functionalized silica nanoparticles 62

Culture medium

Effect of redox potential on the growth of *Yarrowia lipolytica* and the biosynthesis and activity of heterologous hydroperoxide lyase 179

Cupin

Exploring the cupin-type metal-coordinating signature of acetylacetone dioxygenase Dke1 with site-directed mutagenesis: Catalytic reaction profile and Fe²⁺ binding stability of Glu-69 → Gln mutant 171

Cyanopyridines

Mild hydrolysis of nitriles by the immobilized nitrilase from *Aspergillus niger* K10 55

8,9-Dehydronootkatone

Biotransformation of sesquiterpenoids having α,β -unsaturated carbonyl groups with cultured plant cells of *Marchantia polymorpha* 13

- Dehydrogenation
Microbial transformations of flavanone and 6-hydroxyflavanone by *Aspergillus niger* strains 18
- β -Diketone
Exploring the cupin-type metal-coordinating signature of acetylacetone dioxygenase Dke1 with site-directed mutagenesis: Catalytic reaction profile and Fe^{2+} binding stability of Glu-69 \rightarrow Gln mutant 171
- Deracemization
Biotransformations of *ortho*-, *meta*- and *para*-aromatic nitrocompounds by strains of *Aspergillus terreus*: Reduction of ketones and deracemization of alcohols 24
- Desymmetrization
Lipase-mediated kinetic resolution of racemic and desymmetrization of prochiral organophosphorus P-boranes 45
- 2,6-Diaminopurine nucleoside
Microbial synthesis of 2,6-diaminopurine nucleosides 40
- 1,4-Dithio-DL-threitol
Unique transglycosylation potential of extracellular α -D-galactosidase from *Talaromyces flavus* 128
- Domain swapping
The lid is a structural and functional determinant of lipase activity and selectivity 166
- Effectiveness
Characterization of sol-gel encapsulated lipase using tetraethoxysilane as precursor 69
- Electrophoresis
Chemoselective enzymatic preparation of *N*-hydroxyalkylacrylamides, monomers for hydrophilic polymer matrices 50
- Enantioselectivity
Kinetic resolutions with novel, highly enantioselective fungal lipases produced by solid state fermentation 141
A metal ion-based method for the screening of nitrilases 156
The lid is a structural and functional determinant of lipase activity and selectivity 166
- Encapsulated
Characterization of sol-gel encapsulated lipase using tetraethoxysilane as precursor 69
- Enzymatic galactosylation
 β -1,4-Galactosyltransferase-catalyzed glycosylation of sugar derivatives: Modulation of the enzyme activity by α -lactalbumin, immobilization and solvent tolerance 98
- Enzyme
Laccase-mediated oxidation of natural glycosides 3
Immobilization of lipases for non-aqueous synthesis 83
- Enzyme activity
Influence of compressed fluids treatment on the activity of *Yarrowia lipolytica* lipase 117
- Enzyme immobilization
Influence of compressed fluids treatment on the activity of *Yarrowia lipolytica* lipase 117
- Enzyme stability
Biocatalytic properties of Baeyer-Villiger monooxygenases in aqueous-organic media 91
Equilibrium shifts in enzyme reactions at high pressure 124
- Esterase
A versatile colony assay based on NADH fluorescence 149
- Esterification
Immobilization in quartz fiber felt reinforced silica aerogel improves the activity of *Candida rugosa* lipase in organic solvents 77
Immobilization of lipases for non-aqueous synthesis 83
- Extreme environment
Distribution of hydantoinase activity in bacterial isolates from geographically distinct environmental sources 160
- Flavanone
Microbial transformations of flavanone and 6-hydroxyflavanone by *Aspergillus niger* strains 18
- Fumarase
Equilibrium shifts in enzyme reactions at high pressure 124
- β -1,4-Galactosyltransferase
 β -1,4-Galactosyltransferase-catalyzed glycosylation of sugar derivatives: Modulation of the enzyme activity by α -lactalbumin, immobilization and solvent tolerance 98
- α -D-Galactosidase
Unique transglycosylation potential of extracellular α -D-galactosidase from *Talaromyces flavus* 128
- Glucosidase
Equilibrium shifts in enzyme reactions at high pressure 124
- High activity
Immobilization of *Mucor javanicus* lipase on effectively functionalized silica nanoparticles 62
- High-throughput screening
A metal ion-based method for the screening of nitrilases 156
- Hydantoinase
Distribution of hydantoinase activity in bacterial isolates from geographically distinct environmental sources 160
- Hydrogenation
Biotransformation of sesquiterpenoids having α,β -unsaturated carbonyl groups with cultured plant cells of *Marchantia polymorpha* 13
- Hydroperoxide lyase activity
Effect of redox potential on the growth of *Yarrowia lipolytica* and the biosynthesis and activity of heterologous hydroperoxide lyase 179
- Hydrophobic
Immobilization of lipases for non-aqueous synthesis 83
- 6-Hydroxyflavanone
Microbial transformations of flavanone and 6-hydroxyflavanone by *Aspergillus niger* strains 18
- Hydroxylation
Lactones 27 [1]: Transformations of γ -lactones fused to a dimethylcyclohexane ring in *Absidia cylindrospora* cultures 31
- Immobilization
 β -1,4-Galactosyltransferase-catalyzed glycosylation of sugar derivatives: Modulation of the enzyme activity by α -lactalbumin, immobilization and solvent tolerance 98
Immobilization of lipases for non-aqueous synthesis 83
- Immobilized enzyme
Mild hydrolysis of nitriles by the immobilized nitrilase from *Aspergillus niger* K10 55
- Kinetic resolution
Lipase-mediated kinetic resolution of racemic and desymmetrization of prochiral organophosphorus P-boranes 45
Kinetic resolutions with novel, highly enantioselective fungal lipases produced by solid state fermentation 141
- Laccase
Laccase-mediated oxidation of natural glycosides 3
- α -Lactalbumin
 β -1,4-Galactosyltransferase-catalyzed glycosylation of sugar derivatives: Modulation of the enzyme activity by α -lactalbumin, immobilization and solvent tolerance 98
- β -Lactam antibiotic
Kinetically controlled synthesis of ampicillin and cephalixin in highly condensed systems in the absence of a liquid aqueous phase 105
- Lactones
Lactones 27 [1]: Transformations of γ -lactones fused to a dimethylcyclohexane ring in *Absidia cylindrospora* cultures 31
- Lancerodiol *p*-hydroxybenzoate
Biotransformation of sesquiterpenoids having α,β -unsaturated carbonyl groups with cultured plant cells of *Marchantia polymorpha* 13
- LentiKats®
Biotransformation of nitriles by *Rhodococcus equi* A4 immobilized in LentiKats® 59

- Lipase**
 Lipase-mediated kinetic resolution of racemic and desymmetrization of prochiral organophosphorus P-boranes 45
 Chemoselective enzymatic preparation of *N*-hydroxyalkylacrylamides, monomers for hydrophilic polymer matrices 50
 Characterization of sol–gel encapsulated lipase using tetraethoxysilane as precursor 69
 Immobilization of lipases for non-aqueous synthesis 83
 Influence of compressed fluids treatment on the activity of *Yarrowia lipolytica* lipase 117
 Kinetic resolutions with novel, highly enantioselective fungal lipases produced by solid state fermentation 141
- Lipase from *Candida rugosa***
 Immobilization in quartz fiber felt reinforced silica aerogel improves the activity of *Candida rugosa* lipase in organic solvents 77
- Marchantia polymorpha***
 Biotransformation of sesquiterpenoids having α,β -unsaturated carbonyl groups with cultured plant cells of *Marchantia polymorpha* 13
- Metalloenzyme**
 Exploring the cupin-type metal-coordinating signature of acetylacetone dioxygenase Dke1 with site-directed mutagenesis: Catalytic reaction profile and Fe^{2+} binding stability of Glu-69 \rightarrow Gln mutant 171
- Microbial transglycosylation**
 Microbial synthesis of 2,6-diaminopurine nucleosides 40
- Monooxygenases**
 Lactones 27 [1]: Transformations of γ -lactones fused to a dimethylcyclohexane ring in *Absidia cylindrospora* cultures 31
- Mucor javanicus* lipase**
 Immobilization of *Mucor javanicus* lipase on effectively functionalized silica nanoparticles 62
- NADH fluorescence**
 A versatile colony assay based on NADH fluorescence 149
- Natural glycosides**
 Laccase-mediated oxidation of natural glycosides 3
- Nitrilase**
 Mild hydrolysis of nitriles by the immobilized nitrilase from *Aspergillus niger* K10 55
 A versatile colony assay based on NADH fluorescence 149
 A metal ion-based method for the screening of nitrilases 156
- Nitrile hydratase**
 Biotransformation of nitriles by *Rhodococcus equi* A4 immobilized in LentiKats® 59
- Nitriles**
 Biotransformation of nitriles by *Rhodococcus equi* A4 immobilized in LentiKats® 59
- Nitrocompounds**
 Biotransformations of *ortho*-, *meta*- and *para*-aromatic nitrocompounds by strains of *Aspergillus terreus*: Reduction of ketones and deracemization of alcohols 24
- Non-heme iron**
 Exploring the cupin-type metal-coordinating signature of acetylacetone dioxygenase Dke1 with site-directed mutagenesis: Catalytic reaction profile and Fe^{2+} binding stability of Glu-69 \rightarrow Gln mutant 171
- Nootkatone**
 Biotransformation of sesquiterpenoids having α,β -unsaturated carbonyl groups with cultured plant cells of *Marchantia polymorpha* 13
- Nucleoside analogues**
 Microbial synthesis of 2,6-diaminopurine nucleosides 40
- Organic solvent**
 β -1,4-Galactosyltransferase-catalyzed glycosylation of sugar derivatives: Modulation of the enzyme activity by α -lactalbumin, immobilization and solvent tolerance 98
- Organic sulfides**
 Biocatalytic properties of Baeyer–Villiger monooxygenases in aqueous–organic media 91
- Oxidation**
 Laccase-mediated oxidation of natural glycosides 3
- Oxido-reduction potential (ORP)**
 Effect of redox potential on the growth of *Yarrowia lipolytica* and the biosynthesis and activity of heterologous hydroperoxide lyase 179
- Penicillin G amidase**
 Kinetically controlled synthesis of ampicillin and cephalixin in highly condensed systems in the absence of a liquid aqueous phase 105
- Phosphine P-boranes**
 Lipase-mediated kinetic resolution of racemic and desymmetrization of prochiral organophosphorus P-boranes 45
- Pseudomonas fragi* lipase**
 The lid is a structural and functional determinant of lipase activity and selectivity 166
- Pyrococcus furiosus***
 Equilibrium shifts in enzyme reactions at high pressure 124
- (*R*)- and (*S*)-2-azido-1-arylethanol**
 Bioreduction of 2-azido-1-arylethanones mediated by *Geotrichum candidum* and *Rhodotorula glutinis* 9
- Reaction volume**
 Equilibrium shifts in enzyme reactions at high pressure 124
- Reduction**
 Biotransformations of *ortho*-, *meta*- and *para*-aromatic nitrocompounds by strains of *Aspergillus terreus*: Reduction of ketones and deracemization of alcohols 24
- Rhodococcus equi***
 Biotransformation of nitriles by *Rhodococcus equi* A4 immobilized in LentiKats® 59
- α -Santonin**
 Biotransformation of sesquiterpenoids having α,β -unsaturated carbonyl groups with cultured plant cells of *Marchantia polymorpha* 13
- Screening**
 Distribution of hydantoinase activity in bacterial isolates from geographically distinct environmental sources 160
- Sepabeads**
 Immobilization of lipases for non-aqueous synthesis 83
- Sequential biotransformation**
 Microbial Baeyer–Villiger oxidation of 4,4-disubstituted cyclohexan- and cyclohexenones by recombinant whole-cells expressing monooxygenases of bacterial origin 135
- Silica nanoparticles**
 Immobilization of *Mucor javanicus* lipase on effectively functionalized silica nanoparticles 62
- Site-directed mutagenesis**
 The lid is a structural and functional determinant of lipase activity and selectivity 166
- Sol–gel**
 Characterization of sol–gel encapsulated lipase using tetraethoxysilane as precursor 69
- Solid state fermentation**
 Kinetic resolutions with novel, highly enantioselective fungal lipases produced by solid state fermentation 141
- Specificity**
 The lid is a structural and functional determinant of lipase activity and selectivity 166
- Stability**
 Immobilization of *Mucor javanicus* lipase on effectively functionalized silica nanoparticles 62
- Stereoselective oxidation**
 Microbial Baeyer–Villiger oxidation of 4,4-disubstituted cyclohexan- and cyclohexenones by recombinant whole-cells expressing monooxygenases of bacterial origin 135
- Substituted acrylamides**
 Chemoselective enzymatic preparation of *N*-hydroxyalkylacrylamides, monomers for hydrophilic polymer matrices 50

- Supercritical CO₂
The effect of water concentration on the activity and stability of CLECs in supercritical CO₂ in continuous operation 112
- Supercritical fluids
Influence of compressed fluids treatment on the activity of *Yarrowia lipolytica* lipase 117
- Synthesis
Kinetically controlled synthesis of ampicillin and cephalixin in highly condensed systems in the absence of a liquid aqueous phase 105
- Talaromyces flavus*
Unique transglycosylation potential of extracellular α -D-galactosidase from *Talaromyces flavus* 128
- Tembamide
Bioreduction of 2-azido-1-arylethanones mediated by *Geotrichum candidum* and *Rhodotorula glutinis* 9
- Temperature stability
The lid is a structural and functional determinant of lipase activity and selectivity 166
- TEMPO
Laccase-mediated oxidation of natural glycosides 3
- tert*-Butyl alcohol
Unique transglycosylation potential of extracellular α -D-galactosidase from *Talaromyces flavus* 128
- Tetraethoxysilane
Characterization of sol-gel encapsulated lipase using tetraethoxysilane as precursor 69
- Transglycosylation
Unique transglycosylation potential of extracellular α -D-galactosidase from *Talaromyces flavus* 128
- UV-vis spectroscopy
A metal ion-based method for the screening of nitrilases 156
- Whole cells
Microbial synthesis of 2,6-diaminopurine nucleosides 40
- Whole-cell biotransformation
Microbial Baeyer-Villiger oxidation of 4,4-disubstituted cyclohexan- and cyclohexenones by recombinant whole-cells expressing monooxygenases of bacterial origin 135
- Yarrowia lipolytica*
Effect of redox potential on the growth of *Yarrowia lipolytica* and the biosynthesis and activity of heterologous hydroperoxide lyase 179
