

## Subject Index

- 6-Acetylmino-2-oxohexanoic acid  
Microbial resolution of *N*<sup>ε</sup>-acetyl-DL-lysine with *Rhodococcus* sp. AIU Z-35-1 47
- N*<sup>ε</sup>-acetyl-D-lysine  
Microbial resolution of *N*<sup>ε</sup>-acetyl-DL-lysine with *Rhodococcus* sp. AIU Z-35-1 47
- N*<sup>ε</sup>-acetyl-L-lysine  
Microbial resolution of *N*<sup>ε</sup>-acetyl-DL-lysine with *Rhodococcus* sp. AIU Z-35-1 47
- Adenylation  
Substrate flexibility of the adenylation reaction in the Tyrocidine non-ribosomal peptide synthetase 140
- Aglycone  
Improvement of isoflavone aglycones production using  $\beta$ -glucosidase secretory produced in recombinant *Aspergillus oryzae* 297
- Albicanol  
Enzymatic resolution of albicanol and its application to the synthesis of (–)-copalic acid 254
- Alginate immobilization  
Optimizing an alginate immobilized lipase for monoacylglycerol production by the glycerolysis reaction 206
- Alkaline protease  
Selectivity and stability of alkaline protease AL-89 in hydrophilic solvents 266
- Amidase  
Enantioselective hydrolysis of  $\beta$ -hydroxy nitriles using the whole cell biocatalyst *Rhodococcus rhodochrous* ATCC BAA-870 231
- Amino nitriles  
Biocatalytic application of nitrilases from *Fusarium solani* O1 and *Aspergillus niger* K10 243
- 2-Aminocyclopentanol  
Highly efficient chemoenzymatic syntheses of *trans*-2-aminocyclopentanol derivatives 111
- Aminopeptidase  
A highly enantioselective aminopeptidase from sunflower seed—Kinetic studies, substrate mapping and application to biocatalytic transformations 106
- Amylase  
Immobilization of  $\alpha$ -amylase onto cellulose-coated magnetite (CCM) nanoparticles and preliminary starch degradation study 134
- Apparent  $pK_a$   
Role of apparent  $pK_a$  of carboxylic acids in lipase-catalyzed esterifications in biphasic systems 220
- Applications  
Ureases. II. Properties and their customizing by enzyme immobilizations: A review 22
- Archaea  
Alteration of coenzyme specificity in halophilic NAD(P)<sup>+</sup> glucose dehydrogenase by site-directed mutagenesis 261
- Arthrobacter simplex*  
Effects of hydroxypropyl- $\beta$ -cyclodextrin on steroids 1-en-dehydrogenation biotransformation by *Arthrobacter simplex* TCCC 11037 58
- Aspergillus*  
Fructooligosaccharides and  $\beta$ -fructofuranosidase production by *Aspergillus japonicus* immobilized on lignocellulosic materials 76
- Aspergillus niger*  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Aspergillus oryzae*  
Improvement of isoflavone aglycones production using  $\beta$ -glucosidase secretory produced in recombinant *Aspergillus oryzae* 297
- Aspergillus terreus*  
Biooxidation of 1,8-cineole by *Aspergillus terreus* 173
- ATP-PP<sub>i</sub> exchange assay  
Substrate flexibility of the adenylation reaction in the Tyrocidine non-ribosomal peptide synthetase 140
- AYR1  
Identification of a *Candida* sp. reductase behind bicyclic exo-alcohol production 286
- 6-Azaauridine  
A simple procedure for the synthesis of potential 6-azauridine prodrugs by *Thermomyces lanuginosus* lipase 212
- Bacillus stearothermophilus*  
Substrate specificities of farnesyl diphosphate synthases of *Bacillus stearothermophilus* and porcine liver with allylic substrate homologs having vinyl or ethynyl group 163  
Substrate specificities of wild and mutated farnesyl diphosphate synthases: Reactivity of allylic substrate homologs having hydrophilic groups at  $\omega$ -position 225
- N*<sup>α</sup>-benzyloxycarbonyl-D-lysine  
Microbial resolution of *N*<sup>ε</sup>-acetyl-DL-lysine with *Rhodococcus* sp. AIU Z-35-1 47
- N*<sup>α</sup>-benzyloxycarbonyl-L-lysine  
Microbial resolution of *N*<sup>ε</sup>-acetyl-DL-lysine with *Rhodococcus* sp. AIU Z-35-1 47
- Bicyclic diketone  
Identification of a *Candida* sp. reductase behind bicyclic exo-alcohol production 286
- Biocatalysis  
Enantioselective hydrolysis of  $\beta$ -hydroxy nitriles using the whole cell biocatalyst *Rhodococcus rhodochrous* ATCC BAA-870 231  
Synthesis of pyridoxamine 5'-phosphate using an MBA:pyruvate transaminase as biocatalyst 279
- Biocatalysts  
Lipase entrapment in a zirconia matrix: Sol–gel synthesis and catalytic properties 116  
Hydroxylation of daidzein by CYP107H1 from *Bacillus subtilis* 168 248
- Biomaterials  
Lipase entrapment in a zirconia matrix: Sol–gel synthesis and catalytic properties 116
- Biooxidation  
Biooxidation of 1,8-cineole by *Aspergillus terreus* 173
- Bioreduction  
Identification of a *Candida* sp. reductase behind bicyclic exo-alcohol production 286
- Biosensor  
Bioelectroanalytical determination of phosphate: A review 1
- Biotransformation  
Stereospecific hydrogenation of the C=C double bond of enones by *Escherichia coli* overexpressing an enone reductase of *Nicotiana tabacum* 158  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Biphasic medium  
Role of apparent  $pK_a$  of carboxylic acids in lipase-catalyzed esterifications in biphasic systems 220

- Bisphenol A  
Guaicol-mediated oxidative degradation and polymerization of bisphenol A catalyzed by bitter gourd (*Momordica charantia*) peroxidase 185
- Bitter gourd peroxidase  
Guaicol-mediated oxidative degradation and polymerization of bisphenol A catalyzed by bitter gourd (*Momordica charantia*) peroxidase 185
- $\beta$ -Nicotinamide adenine dinucleotide  
A novel enzyme-immobilization method for a biofuel cell 274
- Bosea  
Gene cloning, purification, and characterization of  $\alpha$ -methylserine aldolase from *Bosea* sp. AJ110407 and its applicability for the enzymatic synthesis of  $\alpha$ -methyl-L-serine and  $\alpha$ -ethyl-L-serine 237
- Bovine serum albumin  
Stereospecific hydrogenation of the C=C double bond of enones by *Escherichia coli* overexpressing an enone reductase of *Nicotiana tabacum* 158
- Calcium ions  
Stability and solubility studies of native and activated *Aspergillus awamori* feruloyl esterase 190
- Candida albicans*  
Identification of a *Candida* sp. reductase behind bicyclic exo-alcohol production 286
- Candida antarctica* lipase B  
A molecular modelling study to rationalize the regioselectivity in acylation of flavonoid glycosides catalyzed by *Candida antarctica* lipase B 96  
Highly efficient synthesis of ethyl hexanoate catalyzed by CALB-displaying *Saccharomyces cerevisiae* whole-cells in non-aqueous phase 168
- Candida tropicalis*  
Identification of a *Candida* sp. reductase behind bicyclic exo-alcohol production 286
- Cellulose  
Immobilization of  $\alpha$ -amylase onto cellulose-coated magnetite (CCM) nanoparticles and preliminary starch degradation study 134
- Chemical modification  
Stabilization of  $\alpha$ -chymotrypsin in aqueous organic solvents by chemical modification with organic acid anhydrides 153
- $\alpha$ -Chymotrypsin  
Stabilization of  $\alpha$ -chymotrypsin in aqueous organic solvents by chemical modification with organic acid anhydrides 153
- 1,8-cineole  
Biooxidation of 1,8-cineole by *Aspergillus terreus* 173
- Coated lipase beads  
Optimizing an alginate immobilized lipase for monoacylglycerol production by the glycerolysis reaction 206
- Coenzyme specificity  
Alteration of coenzyme specificity in halophilic NAD(P)<sup>+</sup> glucose dehydrogenase by site-directed mutagenesis 261
- Combinatorial biosynthesis  
Substrate flexibility of the adenylation reaction in the Tyrocidine non-ribosomal peptide synthetase 140
- Copalic acid  
Enzymatic resolution of albicanol and its application to the synthesis of (–)-copalic acid 254
- Copalol  
Enzymatic resolution of albicanol and its application to the synthesis of (–)-copalic acid 254
- Crotopoxide  
Lipase catalyzed regioselective hydrolysis of Crotopoxide isolated from *Piper cubeb* Cass DC 121
- Cryptococcus flavus*  
Xylanases from *Cryptococcus flavus* isolate I-11: Enzymatic profile, isolation and heterologous expression of CjXYN1 in *Saccharomyces cerevisiae* 52
- Cunninghamella blakesleeana*  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Cunninghamella echinulata*  
Microbial transformation of dehydroandrographolide by *Cunninghamella echinulata* 201
- Cunninghamella echinulata* var. *elegans*  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Cunninghamella elegans*  
Fungal biotransformation of mosapride by *Cunninghamella elegans* 82
- CYP107H1  
Hydroxylation of daidzein by CYP107H1 from *Bacillus subtilis* 168 248
- Daidzein  
Hydroxylation of daidzein by CYP107H1 from *Bacillus subtilis* 168 248
- Degradation  
Guaicol-mediated oxidative degradation and polymerization of bisphenol A catalyzed by bitter gourd (*Momordica charantia*) peroxidase 185
- Dehydroandrographolide  
Microbial transformation of dehydroandrographolide by *Cunninghamella echinulata* 201
- Diallyl group  
Highly efficient chemoenzymatic syntheses of *trans*-2-aminocyclopentanol derivatives 111
- Diastereoselectivity  
Biocatalytic application of nitrilases from *Fusarium solani* O1 and *Aspergillus niger* K10 243
- Diterpenoids  
Microbial transformation of dehydroandrographolide by *Cunninghamella echinulata* 201
- D-Lyxose  
A short-step chemo-enzymatic synthesis of a precursor for L-nucleosides from D-lyxose 197
- DNA polymerase  $\beta$   
DNA polymerase  $\beta$  reveals enhanced stability in reverse microemulsions 64
- Docking  
A molecular modelling study to rationalize the regioselectivity in acylation of flavonoid glycosides catalyzed by *Candida antarctica* lipase B 96
- Electroanalysis  
Bioelectroanalytical determination of phosphate: A review 1
- Electrode  
Bioelectroanalytical determination of phosphate: A review 1
- Enantioselectivity  
Kinetic modulation of *Trichosporon asahii* MSR 54 lipase in presence of organic solvents: Altered fatty acid specificity and reversal of enantioselectivity during hydrolytic reactions 41  
A highly enantioselective aminopeptidase from sunflower seed—Kinetic studies, substrate mapping and application to biocatalytic transformations 106  
Biocatalytic application of nitrilases from *Fusarium solani* O1 and *Aspergillus niger* K10 243
- 1-en-Dehydrogenation  
Effects of hydroxypropyl- $\beta$ -cyclodextrin on steroids 1-en-dehydrogenation biotransformation by *Arthrobacter simplex* TCCC 11037 58
- Enzymatic profile  
Xylanases from *Cryptococcus flavus* isolate I-11: Enzymatic profile, isolation and heterologous expression of CjXYN1 in *Saccharomyces cerevisiae* 52
- Enzymatic promiscuity  
Substrate flexibility of the adenylation reaction in the Tyrocidine non-ribosomal peptide synthetase 140
- Enzymatic synthesis  
Enzymatic polymerization of phenols in room-temperature ionic liquids 177
- Enzyme  
Bioelectroanalytical determination of phosphate: A review 1
- Enzyme catalysis  
Highly efficient chemoenzymatic syntheses of *trans*-2-aminocyclopentanol derivatives 111  
A simple procedure for the synthesis of potential 6-azauridine prodrugs by *Thermomyces lanuginosus* lipase 212
- Enzyme stability  
Preparation of thermostable trypsin–polysaccharide neoglycoenzymes through Ugi multicomponent reaction 126  
A novel enzyme-immobilization method for a biofuel cell 274
- Esterification  
Highly efficient synthesis of ethyl hexanoate catalyzed by CALB-displaying *Saccharomyces cerevisiae* whole-cells in non-aqueous phase 168  
Role of apparent  $pK_a$  of carboxylic acids in lipase-catalyzed esterifications in biphasic systems 220
- $\alpha$ -Ethyl-L-serine  
Gene cloning, purification, and characterization of  $\alpha$ -methylserine aldolase from *Bosea* sp. AJ110407 and its applicability for the enzymatic synthesis of  $\alpha$ -methyl-L-serine and  $\alpha$ -ethyl-L-serine 237
- Ethynyldimethylallyl diphosphate  
Substrate specificities of farnesyl diphosphate synthases of *Bacillus stearothermophilus* and porcine liver with allylic substrate homologs having vinyl or ethynyl group 163

- Exo-alcohol  
Identification of a *Candida* sp. reductase behind bicyclic exo-alcohol production 286
- Farnesyl diphosphate synthases  
Substrate specificities of farnesyl diphosphate synthases of *Bacillus stearothermophilus* and porcine liver with allylic substrate homologs having vinyl or ethynyl group 163
- Fatty acid chain length  
Selectivity and stability of alkaline protease AL-89 in hydrophilic solvents 266
- Fatty acid specificity  
Kinetic modulation of *Trichosporon asahii* MSR 54 lipase in presence of organic solvents: Altered fatty acid specificity and reversal of enantio selectivity during hydrolytic reactions 41
- Feruloyl esterase  
Stability and solubility studies of native and activated *Aspergillus awamori* feruloyl esterase 190
- Flavonoid acylation  
A molecular modelling study to rationalize the regioselectivity in acylation of flavonoid glycosides catalyzed by *Candida antarctica* lipase B 96
- Fluorination  
Utility of ionic liquid for improvement of fluorination reaction with immobilized fluorinase 131
- $\beta$ -Fructofuranosidase  
Fructooligosaccharides and  $\beta$ -fructofuranosidase production by *Aspergillus japonicus* immobilized on lignocellulosic materials 76
- Fructooligosaccharides  
Fructooligosaccharides and  $\beta$ -fructofuranosidase production by *Aspergillus japonicus* immobilized on lignocellulosic materials 76
- Fungus  
Production of xylo-oligosaccharides from agro-industrial residues using immobilized *Talaromyces thermophilus* xylanase 145
- $\beta$ -Glucosidase  
Improvement of isoflavone aglycones production using  $\beta$ -glucosidase secretory produced in recombinant *Aspergillus oryzae* 297
- Glycerolysis  
Optimizing an alginate immobilized lipase for monoacylglycerol production by the glycerolysis reaction 206
- Halophilic glucose dehydrogenase  
Alteration of coenzyme specificity in halophilic NAD(P)<sup>+</sup> glucose dehydrogenase by site-directed mutagenesis 261
- Hydrolysis  
Lipase catalyzed regioselective hydrolysis of Crotepoxide isolated from *Piper cubeb* Cass DC 121
- Hydrolytic resolution  
Hydrolytic resolution of (*R,S*)-3-hydroxy-3-phenylpropionates by esterase from *Klebsiella oxytoca*: Effects of leaving alcohol, covalent immobilization and aqueous pH 70
- Hydroxycineole  
Biooxidation of 1,8-cineole by *Aspergillus terreus* 173
- Hydroxylation  
Microbial transformation of dehydroandrographolide by *Cunninghamella echinulata* 201  
Hydroxylation of daidzein by CYP107H1 from *Bacillus subtilis* 168 248  
Fungal hydroxylation of (–)-santonin and its analogues 292
- $\beta$ -Hydroxy nitrile  
Enantioselective hydrolysis of  $\beta$ -hydroxy nitriles using the whole cell biocatalyst *Rhodococcus rhodochrous* ATCC BAA-870 231
- (*R,S*)-3-Hydroxy-3-phenylpropionates  
Hydrolytic resolution of (*R,S*)-3-hydroxy-3-phenylpropionates by esterase from *Klebsiella oxytoca*: Effects of leaving alcohol, covalent immobilization and aqueous pH 70
- Hydroxypropyl- $\beta$ -cyclodextrin  
Effects of hydroxypropyl- $\beta$ -cyclodextrin on steroids 1-en-dehydrogenation biotransformation by *Arthrobacter simplex* TCCC 11037 58
- Immobilizations  
Ureases. II. Properties and their customizing by enzyme immobilizations: A review 22  
Fructooligosaccharides and  $\beta$ -fructofuranosidase production by *Aspergillus japonicus* immobilized on lignocellulosic materials 76  
Immobilization of  $\alpha$ -amylase onto cellulose-coated magnetite (CCM) nanoparticles and preliminary starch degradation study 134  
Production of xylo-oligosaccharides from agro-industrial residues using immobilized *Talaromyces thermophilus* xylanase 145  
A novel enzyme-immobilization method for a biofuel cell 274
- Immobilized enzymes  
Hydrolytic resolution of (*R,S*)-3-hydroxy-3-phenylpropionates by esterase from *Klebsiella oxytoca*: Effects of leaving alcohol, covalent immobilization and aqueous pH 70
- Immobilized fluorinase  
Utility of ionic liquid for improvement of fluorination reaction with immobilized fluorinase 131
- Ionic liquid  
Utility of ionic liquid for improvement of fluorination reaction with immobilized fluorinase 131
- IPF4033  
Identification of a *Candida* sp. reductase behind bicyclic exo-alcohol production 286
- Isoflavone  
Improvement of isoflavone aglycones production using  $\beta$ -glucosidase secretory produced in recombinant *Aspergillus oryzae* 297
- Kinetic analysis  
A highly enantioselective aminopeptidase from sunflower seed—Kinetic studies, substrate mapping and application to biocatalytic transformations 106
- Kinetic resolution  
Enantioselective hydrolysis of  $\beta$ -hydroxy nitriles using the whole cell biocatalyst *Rhodococcus rhodochrous* ATCC BAA-870 231  
Enzymatic resolution of albicanol and its application to the synthesis of (–)-copalic acid 254
- Klebsiella oxytoca* esterase  
Hydrolytic resolution of (*R,S*)-3-hydroxy-3-phenylpropionates by esterase from *Klebsiella oxytoca*: Effects of leaving alcohol, covalent immobilization and aqueous pH 70
- Lactate dehydrogenase  
A novel enzyme-immobilization method for a biofuel cell 274
- Lignocellulosic materials  
Fructooligosaccharides and  $\beta$ -fructofuranosidase production by *Aspergillus japonicus* immobilized on lignocellulosic materials 76
- Lipases  
Kinetic modulation of *Trichosporon asahii* MSR 54 lipase in presence of organic solvents: Altered fatty acid specificity and reversal of enantio selectivity during hydrolytic reactions 41  
Understanding water effect on *Candida antarctica* lipase B activity and enantioselectivity towards secondary alcohols 90  
Lipase entrapment in a zirconia matrix: Sol-gel synthesis and catalytic properties 116  
A short-step chemo-enzymatic synthesis of a precursor for L-nucleosides from D-lyxose 197  
Role of apparent pK<sub>a</sub> of carboxylic acids in lipase-catalyzed esterifications in biphasic systems 220
- Lipase QL  
Enzymatic resolution of albicanol and its application to the synthesis of (–)-copalic acid 254
- L-Nucleoside  
A short-step chemo-enzymatic synthesis of a precursor for L-nucleosides from D-lyxose 197
- L-Ribose  
A short-step chemo-enzymatic synthesis of a precursor for L-nucleosides from D-lyxose 197
- Magnetite  
Immobilization of  $\alpha$ -amylase onto cellulose-coated magnetite (CCM) nanoparticles and preliminary starch degradation study 134
- Membrane reductase  
Identification of a *Candida* sp. reductase behind bicyclic exo-alcohol production 286
- Metabolites  
Fungal biotransformation of mosapride by *Cunninghamella elegans* 82
- $\alpha$ -Methyl-L-serine  
Gene cloning, purification, and characterization of  $\alpha$ -methylserine aldolase from *Bosea* sp. AJ110407 and its applicability for the enzymatic synthesis of  $\alpha$ -methyl-L-serine and  $\alpha$ -ethyl-L-serine 237
- $\alpha$ -Methylserine aldolase  
Gene cloning, purification, and characterization of  $\alpha$ -methylserine aldolase from *Bosea* sp. AJ110407 and its applicability for the enzymatic synthesis of  $\alpha$ -methyl-L-serine and  $\alpha$ -ethyl-L-serine 237

- Methoxymethoxydimethylallyl diphosphate  
Substrate specificities of wild and mutated farnesyl diphosphate synthases: Reactivity of allylic substrate homologs having hydrophilic groups at  $\omega$ -position 225
- Microbial transformation  
Fungal biotransformation of mosapride by *Cunninghamella elegans* 82  
Microbial transformation of dehydroandrographolide by *Cunninghamella echinulata* 201
- Modified enzyme  
Preparation of thermostable trypsin-polysaccharide neoglycoenzymes through Ugi multicomponent reaction 126
- Molecular modelling  
A molecular modelling study to rationalize the regioselectivity in acylation of flavonoid glycosides catalyzed by *Candida antarctica* lipase B 96
- Monoacylglycerol  
Optimizing an alginate immobilized lipase for monoacylglycerol production by the glycerolysis reaction 206
- Monoxygenase  
Biooxidation of 1,8-cineole by *Aspergillus terreus* 173
- Mosapride  
Fungal biotransformation of mosapride by *Cunninghamella elegans* 82
- Mucor miehei*  
Lipase catalyzed regioselective hydrolysis of Crotepoxide isolated from *Piper cubeb* Cass DC 121
- Mucor plumbeus*  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Multicomponent reaction  
Preparation of thermostable trypsin-polysaccharide neoglycoenzymes through Ugi multicomponent reaction 126
- Nicotiana tabacum*  
Stereospecific hydrogenation of the C=C double bond of enones by *Escherichia coli* overexpressing an enone reductase of *Nicotiana tabacum* 158
- Nitrilase  
Biocatalytic application of nitrilases from *Fusarium solani* O1 and *Aspergillus niger* K10 243
- Nitrile hydratase  
Enantioselective hydrolysis of  $\beta$ -hydroxy nitriles using the whole cell biocatalyst *Rhodococcus rhodochrous* ATCC BAA-870 231
- Non-ribosomal peptide synthetase (NRPS)  
Substrate flexibility of the adenylation reaction in the Tyrocidine non-ribosomal peptide synthetase 140
- Organic acid anhydrides  
Stabilization of  $\alpha$ -chymotrypsin in aqueous organic solvents by chemical modification with organic acid anhydrides 153
- Organic solvents  
Stabilization of  $\alpha$ -chymotrypsin in aqueous organic solvents by chemical modification with organic acid anhydrides 153  
A simple procedure for the synthesis of potential 6-azauridine prodrugs by *Thermomyces lanuginosus* lipase 212
- Orthogonal protection  
Highly efficient chemoenzymatic syntheses of *trans*-2-aminocyclopentanol derivatives 111
- Phanerochaete chrysosporium*  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Phosphate  
Bioelectroanalytical determination of phosphate: A review 1
- Polymerization  
Guaiacol-mediated oxidative degradation and polymerization of bisphenol A catalyzed by bitter gourd (*Momordica charantia*) peroxidase 185
- Polyphenol  
Enzymatic polymerization of phenols in room-temperature ionic liquids 177
- Polysaccharide  
Preparation of thermostable trypsin-polysaccharide neoglycoenzymes through Ugi multicomponent reaction 126
- Porcine pancreas  
Lipase catalyzed regioselective hydrolysis of Crotepoxide isolated from *Piper cubeb* Cass DC 121
- Product inhibition  
Effects of hydroxypropyl- $\beta$ -cyclodextrin on steroids 1-en-dehydrogenation biotransformation by *Arthrobacter simplex* TCCC 11037 58
- Proficiency  
Ureases I. Functional, catalytic and kinetic properties: A review 9
- Properties  
Ureases I. Functional, catalytic and kinetic properties: A review 9  
Ureases. II. Properties and their customizing by enzyme immobilizations: A review 22
- Propoxygeranyl diphosphate  
Substrate specificities of wild and mutated farnesyl diphosphate synthases: Reactivity of allylic substrate homologs having hydrophilic groups at  $\omega$ -position 225
- Protein activity  
DNA polymerase  $\beta$  reveals enhanced stability in reverse microemulsions 64
- Protein stability  
DNA polymerase  $\beta$  reveals enhanced stability in reverse microemulsions 64
- Pseudomonas cepacia*  
Lipase catalyzed regioselective hydrolysis of Crotepoxide isolated from *Piper cubeb* Cass DC 121
- Pyridoxal 5'-phosphate  
Gene cloning, purification, and characterization of  $\alpha$ -methylserine aldolase from *Bosea* sp. AJ110407 and its applicability for the enzymatic synthesis of  $\alpha$ -methyl-L-serine and  $\alpha$ -ethyl-L-serine 237
- Pyridoxamine 5'-phosphate  
Synthesis of pyridoxamine 5'-phosphate using an MBA:pyruvate transaminase as biocatalyst 279
- Pyrrroloquinoline quinone  
A novel enzyme-immobilization method for a biofuel cell 274
- Racemic resolution  
A highly enantioselective aminopeptidase from sunflower seed—Kinetic studies, substrate mapping and application to biocatalytic transformations 106
- Recombinant *E. coli* expressing enone reductase  
Stereospecific hydrogenation of the C=C double bond of enones by *Escherichia coli* overexpressing an enone reductase of *Nicotiana tabacum* 158
- Recombinant pulegone reductase  
Stereospecific hydrogenation of the C=C double bond of enones by *Escherichia coli* overexpressing an enone reductase of *Nicotiana tabacum* 158
- Redox mediator  
Guaiacol-mediated oxidative degradation and polymerization of bisphenol A catalyzed by bitter gourd (*Momordica charantia*) peroxidase 185
- Redox partner  
Hydroxylation of daidzein by CYP107H1 from *Bacillus subtilis* 168 248
- Regioselective acylation  
A simple procedure for the synthesis of potential 6-azauridine prodrugs by *Thermomyces lanuginosus* lipase 212
- Regioselective reaction  
A short-step chemo-enzymatic synthesis of a precursor for L-nucleosides from D-lyxose 197
- Regioselectivity  
A molecular modelling study to rationalize the regioselectivity in acylation of flavonoid glycosides catalyzed by *Candida antarctica* lipase B 96  
Lipase catalyzed regioselective hydrolysis of Crotepoxide isolated from *Piper cubeb* Cass DC 121
- Reverse microemulsions  
DNA polymerase  $\beta$  reveals enhanced stability in reverse microemulsions 64
- Review  
Ureases I. Functional, catalytic and kinetic properties: A review 9  
Ureases. II. Properties and their customizing by enzyme immobilizations: A review 22
- Rhodococcus*  
Enantioselective hydrolysis of  $\beta$ -hydroxy nitriles using the whole cell biocatalyst *Rhodococcus rhodochrous* ATCC BAA-870 231
- Roles  
Ureases I. Functional, catalytic and kinetic properties: A review 9
- Room-temperature ionic liquids  
Enzymatic polymerization of phenols in room-temperature ionic liquids 177
- Santonin  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Sclerotinia sclerotiorum*  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Sesquiterpene  
Fungal hydroxylation of (–)-santonin and its analogues 292

- Sol-gel  
Lipase entrapment in a zirconia matrix: Sol-gel synthesis and catalytic properties 116
- Solvent engineering  
Enzymatic polymerization of phenols in room-temperature ionic liquids 177
- Solvent stability  
Kinetic modulation of *Trichosporon asahii* MSR 54 lipase in presence of organic solvents: Altered fatty acid specificity and reversal of enantio selectivity during hydrolytic reactions 41
- Solvents  
Selectivity and stability of alkaline protease AL-89 in hydrophilic solvents 266
- Stability and solubility studies  
Stability and solubility studies of native and activated *Aspergillus awamori* feruloyl esterase 190
- Stabilization  
Stabilization of  $\alpha$ -chymotrypsin in aqueous organic solvents by chemical modification with organic acid anhydrides 153
- Starch degradation  
Immobilization of  $\alpha$ -amylase onto cellulose-coated magnetite (CCM) nanoparticles and preliminary starch degradation study 134
- Stereochemical inversion  
A short-step chemo-enzymatic synthesis of a precursor for L-nucleosides from D-lyxose 197
- Stereoselective catalysis  
Understanding water effect on *Candida antarctica* lipase B activity and enantioselectivity towards secondary alcohols 90
- Stereospecific hydrogenation  
Stereospecific hydrogenation of the C=C double bond of enones by *Escherichia coli* overexpressing an enone reductase of *Nicotiana tabacum* 158
- Substrate mapping  
A highly enantioselective aminopeptidase from sunflower seed—Kinetic studies, substrate mapping and application to biocatalytic transformations 106
- Substrate specificity  
Substrate flexibility of the adenylation reaction in the Tyrocidine non-ribosomal peptide synthetase 140  
Substrate specificities of farnesyl diphosphate synthases of *Bacillus stearothermophilus* and porcine liver with allylic substrate homologs having vinyl or ethynyl group 163  
Substrate specificities of wild and mutated farnesyl diphosphate synthases: Reactivity of allylic substrate homologs having hydrophilic groups at  $\omega$ -position 225  
Biocatalytic application of nitrilases from *Fusarium solani* O1 and *Aspergillus niger* K10 243
- Sucrose  
Selectivity and stability of alkaline protease AL-89 in hydrophilic solvents 266
- Sunflower seeds  
A highly enantioselective aminopeptidase from sunflower seed—Kinetic studies, substrate mapping and application to biocatalytic transformations 106
- Superoxide dismutase (*sodM*) promoter  
Improvement of isoflavone aglycones production using  $\beta$ -glucosidase secretory produced in recombinant *Aspergillus oryzae* 297
- Thermodynamic activity of water  
Understanding water effect on *Candida antarctica* lipase B activity and enantioselectivity towards secondary alcohols 90  
Thermodynamics  
Understanding water effect on *Candida antarctica* lipase B activity and enantioselectivity towards secondary alcohols 90
- Thermomyces lanuginosus* lipase  
A simple procedure for the synthesis of potential 6-azauridine prodrugs by *Thermomyces lanuginosus* lipase 212
- Transaminase  
Synthesis of pyridoxamine 5'-phosphate using an MBA:pyruvate transaminase as biocatalyst 279
- Transesterification  
Selectivity and stability of alkaline protease AL-89 in hydrophilic solvents 266
- Trichosporon* sp.  
Kinetic modulation of *Trichosporon asahii* MSR 54 lipase in presence of organic solvents: Altered fatty acid specificity and reversal of enantio selectivity during hydrolytic reactions 41
- Trypsin  
Preparation of thermostable trypsin-polysaccharide neoglycoenzymes through Ugi multicomponent reaction 126
- Ureases  
Ureases I. Functional, catalytic and kinetic properties: A review 9  
Ureases. II. Properties and their customizing by enzyme immobilizations: A review 22
- Vinyldimethylallyl diphosphate  
Substrate specificities of farnesyl diphosphate synthases of *Bacillus stearothermophilus* and porcine liver with allylic substrate homologs having vinyl or ethynyl group 163
- Vitamin B6  
Synthesis of pyridoxamine 5'-phosphate using an MBA:pyruvate transaminase as biocatalyst 279
- Water adsorption  
Understanding water effect on *Candida antarctica* lipase B activity and enantioselectivity towards secondary alcohols 90
- Whetzelinia sclerotiorum*  
Fungal hydroxylation of (–)-santonin and its analogues 292
- Whole-cell biocatalyst  
Highly efficient synthesis of ethyl hexanoate catalyzed by CALB-displaying *Saccharomyces cerevisiae* whole-cells in non-aqueous phase 168
- Wild and mutated type of farnesyl diphosphate synthases  
Substrate specificities of wild and mutated farnesyl diphosphate synthases: Reactivity of allylic substrate homologs having hydrophilic groups at  $\omega$ -position 225
- Xylanase  
Xylanases from *Cryptococcus flavus* isolate I-11: Enzymatic profile, isolation and heterologous expression of *CfXYN1* in *Saccharomyces cerevisiae* 52  
Production of xylo-oligosaccharides from agro-industrial residues using immobilized *Talaromyces thermophilus* xylanase 145
- Xylo-oligosaccharide  
Production of xylo-oligosaccharides from agro-industrial residues using immobilized *Talaromyces thermophilus* xylanase 145
- Yeast surface display  
Highly efficient synthesis of ethyl hexanoate catalyzed by CALB-displaying *Saccharomyces cerevisiae* whole-cells in non-aqueous phase 168
- Zirconia  
Lipase entrapment in a zirconia matrix: Sol-gel synthesis and catalytic properties 116
