**Emily P. Balskus, José Méndez-Andino, Ruslan M. Arbit, and Leo A. Paquette\***. Intercalation of Multiple Carbon Atoms between the Carbonyls of  $\alpha$ -Diketones.

Pages 6696–6698. At several places in Schemes 2–5, the symbol Pb for lead in  $\text{Pb}(\text{OAc})_4$  was inadvertently substituted by the symbol Pd. The text correctly indicates that lead tetraacetate was used throughout this study.
