

Additions and Corrections

Vol. 66, 2001

Francesco Fringuelli, Ferdinando Pizzo,* and Luigi Vaccaro. Azidolysis of α,β -Epoxy-carboxylic Acids. A Water-Promoted Process Efficiently Catalyzed by Indium Trichloride at pH 4.0

Page 3555, ref 20. There is an inversion of the pH values before and after addition of InCl_3 . The correct sentence is as follows: "The pH of a 2.5 M aqueous solution of NaN_3 (5 mol/equiv) containing the α,β -epoxy-acid **4** (1 equiv) is 5.0 and becomes 4.5 in the presence (0.01 mol/equiv) of InCl_3 ..."
