Journal of  
Photochemistry  
and  
Photobiology  
A: Chemistry

## Subject Index of Volume 126

### Actinometry

The influence of solute absorbance in laser flash photolysis – actinometry in experiment and theory at non-vanishing absorbance, 1

### AM1 calculation

Variance of charges in the process of isomerization of perylenequinone, 27

### Anisotropy

Fluorescence anisotropy of dyes included in crosslinked polystyrene, 77

### Azomethine ylide

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

### Azomethine

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

### Benzophenone-4-carboxylic acid

The influence of solute absorbance in laser flash photolysis – actinometry in experiment and theory at non-vanishing absorbance, 1

### Bromopyrogallol red

Nano-porous TiO<sub>2</sub> photovoltaic cells sensitized with metallochromic triphenylmethane dyes: [n-TiO<sub>2</sub>/triphenylmethane dye/p-I<sup>-</sup>/I<sub>3</sub><sup>-</sup> (or CuI)], 111

### Carbene

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

### Carbon dioxide

Photo-enhanced reduction of carbon dioxide with hydrogen over Rh/TiO<sub>2</sub> 117

### Cetyltrimethylammonium micelle

The effect of micelle–water interface electric field on the intramolecular charge transfer within ionic micelle. Dual fluorescence of sodium *p*-dialkylaminobenzoates in cetyltrimethylammonium micelles, 125

### Charge

Variance of charges in the process of isomerization of perylenequinone, 27

### Decarboxylation

Photolysis reaction mechanism of dibenzophenoneoxime hexamethylenediurethane, a new type of photobase generator, 37

### Diazirine

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

### Dual fluorescence

The effect of micelle–water interface electric field on the intramolecular charge transfer within ionic micelle. Dual fluorescence of sodium *p*-dialkylaminobenzoates in cetyltrimethylammonium micelles, 125

### Dye sensitization

Nano-porous TiO<sub>2</sub> photovoltaic cells sensitized with metallochromic triphenylmethane dyes: [n-TiO<sub>2</sub>/triphenylmethane dye/p-I<sup>-</sup>/I<sub>3</sub><sup>-</sup> (or CuI)], 111

### Electric field effect

The effect of micelle–water interface electric field on the intramolecular charge transfer within ionic micelle. Dual fluorescence of sodium *p*-dialkylaminobenzoates in cetyltrimethylammonium micelles, 125

### Electron transfer

Efficient low temperature charge transfer in a self-assembled porphyrin aggregate, 99

### Eosine as photosensitizer

Ultraviolet absorbers and singlet oxygen 43

### ESR

Free radical mechanism for photoinduced isonitrile–nitrile isomerization in solution, 23

### Ethidium bromide

Fluorescence spectroscopic probing of two distinctive microenvironments in perfluorinated ionomer membranes, 71

### Ethyl cellulose

Ultraviolet absorbers and singlet oxygen 43

### Excited state quenching

Singlet molecular oxygen photosensitized by Rhodamine dyes: correlation with photophysical properties of the sensitizers, 51

### Fluorescence probing

Fluorescence spectroscopic probing of two distinctive microenvironments in perfluorinated ionomer membranes, 71

### Fluorescence

Fluorescence anisotropy of dyes included in crosslinked polystyrene, 77

Photoprocesses in 4-nitro- and 2,4-dinitro-substituted *trans*-1-styryl-naphthalene, *trans*-9-styrylanthracene and related systems, 15

### Free radical

Free radical mechanism for photoinduced isonitrile–nitrile isomerization in solution, 23

### Hydrogen

Hydrogen evolution photoinduced by using platinum-loaded Langmuir–Blodgett films of viologen-linked porphyrin, 91

### 2-(2-Hydroxy-4-methoxyphenyl)-4,6-diaryl-1,3,5-triazines

Ultraviolet absorbers and singlet oxygen 43

### 2-(2-Hydroxy-5-methylphenyl)benzotriazole (Tinuvin P, TIN P)

Ultraviolet absorbers and singlet oxygen 43

### 3-Hydroxypyridines

Singlet molecular oxygen-mediated photooxidation of 2-substituted 3-hydroxypyridines, 59

### Indolizine

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

## Intersystem crossing

Singlet molecular oxygen photosensitized by Rhodamine dyes: correlation with photophysical properties of the sensitizers, 51

## Intramolecular charge transfer

Photoprocesses in 4-nitro- and 2,4-dinitro-substituted *trans*-1-styryl-naphthalene, *trans*-9-styrylanthracene and related systems, 15

The effect of micelle–water interface electric field on the intramolecular charge transfer within ionic micelle. Dual fluorescence of sodium *p*-dialkylaminobenzoates in cetyltrimethylammonium micelles, 125

## Intramolecular hydrogen transfer

Variance of charges in the process of isomerization of perylenequinone, 27

## Ionic micelle–water interface

The effect of micelle–water interface electric field on the intramolecular charge transfer within ionic micelle. Dual fluorescence of sodium *p*-dialkylaminobenzoates in cetyltrimethylammonium micelles, 125

## Isomerization

Variance of charges in the process of isomerization of perylenequinone, 27

## Isonitrile

Free radical mechanism for photoinduced isonitrile–nitrile isomerization in solution, 23

## Kinetics

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

## Langmuir–Blodgett film

Hydrogen evolution photoinduced by using platinum-loaded Langmuir–Blodgett films of viologen-linked porphyrin, 91

## Laser flash photolysis

The influence of solute absorbance in laser flash photolysis – actinometry in experiment and theory at non-vanishing absorbance, 1

## Luminescence quenching

Temperature dependence study of pyridine complex formation and emission quenching of copper(II) octaethyl- and tetraphenylporphyrin, 83

## Mathematical model

The influence of solute absorbance in laser flash photolysis – actinometry in experiment and theory at non-vanishing absorbance, 1

## Oxime urethane

Photolysis reaction mechanism of dibenzophenoneoxime hexamethylenediurethane, a new type of photobase generator, 37

## Perfluorinated ionomer membranes

Fluorescence spectroscopic probing of two distinctive microenvironments in perfluorinated ionomer membranes, 71

## Perylenequinone

Variance of charges in the process of isomerization of perylenequinone, 27

## Phosphorescence

Singlet molecular oxygen photosensitized by Rhodamine dyes: correlation with photophysical properties of the sensitizers, 51

## Photo-oxidation

Singlet molecular oxygen-mediated photooxidation of 2-substituted 3-hydroxypyridines, 59

## Photobase generator

Photolysis reaction mechanism of dibenzophenoneoxime hexamethylenediurethane, a new type of photobase generator, 37

## Photochemical cells

Nano-porous TiO<sub>2</sub> photovoltaic cells sensitized with metallochromic triphenylmethane dyes: [n-TiO<sub>2</sub>/triphenylmethane dye/p-I<sup>−</sup>/I<sub>3</sub><sup>−</sup> (or CuI)], 111

## Photochemistry

Photochemistry and photoinduced chemical crosslinking activity of type I & II co-reactive photoinitiators in acrylated prepolymers, 135

## Photocuring

Photochemistry and photoinduced chemical crosslinking activity of type I & II co-reactive photoinitiators in acrylated prepolymers, 135

## Photoinduced isomerization

Free radical mechanism for photoinduced isonitrile–nitrile isomerization in solution, 23

## Photoinitiators

Photochemistry and photoinduced chemical crosslinking activity of type I & II co-reactive photoinitiators in acrylated prepolymers, 135  
Laser flash photolysis

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

## Photolysis reaction

Photolysis reaction mechanism of dibenzophenoneoxime hexamethylenediurethane, a new type of photobase generator, 37

## Photooxygenation of 9,10-dimethylantracene

Ultraviolet absorbers and singlet oxygen 43

## Photopolymerisation

Photochemistry and photoinduced chemical crosslinking activity of type I & II co-reactive photoinitiators in acrylated prepolymers, 135

## Photoreduction

Photo-enhanced reduction of carbon dioxide with hydrogen over Rh/TiO<sub>2</sub> 117

## Picosecond

Time dependent solvent effects on the T<sub>1</sub>–T<sub>n</sub> absorption spectra of thioxanthone: a picosecond investigation, 7

## Platinum

Hydrogen evolution photoinduced by using platinum-loaded Langmuir–Blodgett films of viologen-linked porphyrin, 91

## Polystyrene

Fluorescence anisotropy of dyes included in crosslinked polystyrene, 77

## Porphyrin complexes

Temperature dependence study of pyridine complex formation and emission quenching of copper(II) octaethyl- and tetraphenylporphyrin, 83

## Porphyrin

Hydrogen evolution photoinduced by using platinum-loaded Langmuir–Blodgett films of viologen-linked porphyrin, 91

Efficient low temperature charge transfer in a self-assembled porphyrin aggregate, 99

<sup>1</sup>O<sub>2</sub> (<sup>1</sup>Δ<sub>g</sub>) production

Ultraviolet absorbers and singlet oxygen 43

## Pyridine complexes

Temperature dependence study of pyridine complex formation and emission quenching of copper(II) octaethyl- and tetraphenylporphyrin, 83

## Pyrocatechol violet

Nano-porous TiO<sub>2</sub> photovoltaic cells sensitized with metallochromic triphenylmethane dyes: [n-TiO<sub>2</sub>/triphenylmethane dye/p-I<sup>−</sup>/I<sub>3</sub><sup>−</sup> (or CuI)], 111

## Pyrrole

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

## Rhodamine

Singlet molecular oxygen photosensitized by Rhodamine dyes: correlation with photophysical properties of the sensitizers, 51

## Rhodium

Photo-enhanced reduction of carbon dioxide with hydrogen over Rh/TiO<sub>2</sub> 117

## Self-assembly

Efficient low temperature charge transfer in a self-assembled porphyrin aggregate, 99

## Singlet molecular oxygen

Singlet molecular oxygen photosensitized by Rhodamine dyes: correlation with photophysical properties of the sensitizers, 51

Singlet molecular oxygen-mediated photooxidation of 2-substituted 3-hydroxypyridines, 59

## Singlet oxygen

Photoprocesses in 4-nitro- and 2,4-dinitro-substituted *trans*-1-styrylnaphthalene, *trans*-9-styrylanthracene and related systems, 15

Ultraviolet absorbers and singlet oxygen 43

Sodium *p*-(dialkylamino) benzoate

The effect of micelle–water interface electric field on the intramolecular charge transfer within ionic micelle. Dual fluorescence of sodium *p*-dialkylaminobenzoates in cetyltrimethylammonium micelles, 125

## Solvatochromy

Time dependent solvent effects on the  $T_1$ – $T_n$  absorption spectra of thioxanthone: a picosecond investigation, 7

## Solvent effects

Time dependent solvent effects on the  $T_1$ – $T_n$  absorption spectra of thioxanthone: a picosecond investigation, 7

## Temperature dependence

Temperature dependence study of pyridine complex formation and emission quenching of copper(II) octaethyl- and tetraphenylporphyrin, 83

## Tetramethylethylene

Ultraviolet absorbers and singlet oxygen 43

## Thioxanthone

Time dependent solvent effects on the  $T_1$ – $T_n$  absorption spectra of thioxanthone: a picosecond investigation, 7

## Time-resolved absorption

Efficient low temperature charge transfer in a self-assembled porphyrin aggregate, 99

## Titanium dioxide

Nano-porous  $\text{TiO}_2$  photovoltaic cells sensitized with metallochromic triphenylmethane dyes: [n- $\text{TiO}_2$ /triphenylmethane dye/ $\text{p-I}^-/\text{I}_3^-$  (or  $\text{CuI}$ )], 111

Photo-enhanced reduction of carbon dioxide with hydrogen over Rh/ $\text{TiO}_2$  117

*Trans* → *cis* photoisomerization

Photoprocesses in 4-nitro- and 2,4-dinitro-substituted *trans*-1-styrylnaphthalene, *trans*-9-styrylanthracene and related systems, 15

## Transient absorption

Time dependent solvent effects on the  $T_1$ – $T_n$  absorption spectra of thioxanthone: a picosecond investigation, 7

## Triplet state

Photoprocesses in 4-nitro- and 2,4-dinitro-substituted *trans*-1-styrylnaphthalene, *trans*-9-styrylanthracene and related systems, 15

## UV absorbers

Ultraviolet absorbers and singlet oxygen 43

## Vinylpyridine

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

## Vinylpyridinium ylide

Laser flash photolysis studies of nitrogen ylides generated by the reaction of arylchlorocarbenes with substituted vinylpyridines and 1-azabuta-1,3-dienes 31

## Viologen

Hydrogen evolution photoinduced by using platinum-loaded Langmuir–Blodgett films of viologen-linked porphyrin, 91

## X-ray absorption spectroscopy

Photo-enhanced reduction of carbon dioxide with hydrogen over Rh/ $\text{TiO}_2$  117
