

Subject Index of Volume 133

Acetophenone

Variation of Langmuir adsorption constant determined for TiO₂-photo-catalyzed degradation of acetophenone under different light intensity, 67

Active oxygen species

Visible light-induced catalytic degradation of iprobenfos fungicide by poly(3-octylthiophene-2,5-diyl) film, 59

Adsorption constant

Variation of Langmuir adsorption constant determined for TiO₂-photo-catalyzed degradation of acetophenone under different light intensity, 67

Air photooxidation

Photooxidation of ethylbenzene with air catalyzed by a polymer supported Rose Bengal photosensitizer, 27

Allylic amination

Photochemical and photocatalytic reduction of nitrobenzene in the presence of cyclohexene, 129

Aqueous metal-oxide dispersions

Factors affecting the efficiency of a photocatalyzed process in aqueous metal-oxide dispersions. Prospect of distinguishing between two kinetic models, 89

Atomic fluorescence

Measurements of branching ratios of CaF(A²Π_{1/2,1/3}) from the reactions of Ca[4s4p(³P_J)] with CH₃F following pulsed dye-laser excitation of atomic calcium, 1

C-nucleoside

Photophysical and photochemical properties of C-linked ribosides of pyridin-2-one, 169

CaF molecular chemiluminescence

Measurements of branching ratios of CaF(A²Π_{1/2,1/3}) from the reactions of Ca[4s4p(³P_J)] with CH₃F following pulsed dye-laser excitation of atomic calcium, 1

Carbon–carbon bond formation

Intramolecular *ortho* and *meta* photocycloadditions of 4-phenoxybut-1-enes substituted in the arene residue with carbomethoxy, carbomethoxymethyl, and 2-carbomethoxyethyl groups, 135

2-Chloroethenylsilane

Near UV multiphoton dissociation of organosilanes with picosecond and nanosecond laser pulses, 39

Complex structure

Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197

Constrained amino acids

Photophysics of phenylalanine analogues. Part 1. Constrained analogues of phenylalanine modified at phenyl ring, 33

Contact complex formation

Investigation of the pyrene/*N,N'*-diethylaniline exciplex by photoacoustic calorimetry and fluorescence spectroscopy, 149

Copper(II) acetate

Photochemistry of copper(II) polyfluorocarboxylates and copper(II) acetate as their hydrocarbon analogues, 177

Copper(II) polyfluorocarboxylates

Photochemistry of copper(II) polyfluorocarboxylates and copper(II) acetate as their hydrocarbon analogues, 177

Critical transfer distance

Investigations of energy transfer from some diolefinic laser dyes to Rhodamine 110, 185

Cross-linking pathways/mechanism

Photodynamic cross-linking of proteins. V. Nature of the tyrosine–tyrosine bonds formed in the FMN-sensitized intermolecular cross-linking of *N*-acetyl-L-tyrosine, 115

CTAC

Effect of detergents on the fluorescence from CdS-Q clusters prepared using variable excess Cd²⁺ concentrations, 205

1,5-Diaminonaphthalene (DANH₂²⁺)

Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197

9,10-Dichloroanthracene

Excited-state dynamics for interpretation of the solvent-dependent photochemistry of 9,10-dichloroanthracene in the presence of 2,5-dimethylhexa-2,4-diene, 11

Dimethylformamide

Laser flash photolysis of sodium persulfate in aqueous solution with additions of dimethylformamide, 99

2,5-Dimethylhexa-2,4-diene

Excited-state dynamics for interpretation of the solvent-dependent photochemistry of 9,10-dichloroanthracene in the presence of 2,5-dimethylhexa-2,4-diene, 11

Dipolar moments

New fluorescent probes for monitoring polymerisation reactions. 1. Synthesis, solvatochromism and emission properties, 51

Dipole–dipole interaction

Investigations of energy transfer from some diolefinic laser dyes to Rhodamine 110, 185

DMPO

ESR spin-trapping detection of radical intermediates in the TiO₂-assisted photo-oxidation of sulforhodamine B under visible irradiation, 83

Electron transfer

Synthesis and photophysical studies of a porphyrin–viologen dyad covalently linked by a flexible seven-atom chain, 105

Eley–Rideal model

Factors affecting the efficiency of a photocatalyzed process in aqueous metal-oxide dispersions. Prospect of distinguishing between two kinetic models, 89

Energy transfer

Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197

Investigations of energy transfer from some diolefinic laser dyes to Rhodamine 110, 185

- ESR spin-trapping
ESR spin-trapping detection of radical intermediates in the TiO₂-assisted photo-oxidation of sulforhodamine B under visible irradiation, 83
- Ethylbenzene
Photooxidation of ethylbenzene with air catalyzed by a polymer supported Rose Bengal photosensitizer, 27
- Ethylbenzene hydroperoxide
Photooxidation of ethylbenzene with air catalyzed by a polymer supported Rose Bengal photosensitizer, 27
- Ethylene glycol/water
Chemical size-effects on fluorescence lifetime of Rhodamine 6G in ethylene glycol/water microdroplets dispersed in polydimethylsiloxane matrix, 189
- Excimer
Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197
- Exciplex
Investigation of the pyrene/*N,N'*-diethylaniline exciplex by photoacoustic calorimetry and fluorescence spectroscopy, 149
- Excited state
Excited-state dynamics for interpretation of the solvent-dependent photochemistry of 9,10-dichloroanthracene in the presence of 2,5-dimethylhexa-2,4-diene, 11
- Fine particle
Laser flash photolysis study on photophysical and photochemical properties of C₆₀ fine particles, 45
- Fluorescence
Investigation of the pyrene/*N,N'*-diethylaniline exciplex by photoacoustic calorimetry and fluorescence spectroscopy, 149
Photophysical and photochemical properties of C-linked ribosides of pyridin-2-one, 169
Photophysical properties and quantum chemical calculations of differently substituted 2(2-phenylethenyl)-benzoxazoles and benzothiazoles, 21
Photophysics of phenylalanine analogues. Part 1. Constrained analogues of phenylalanine modified at phenyl ring, 33
Synthesis and photophysical studies of a porphyrin–viologen dyad covalently linked by a flexible seven-atom chain, 105
- Fluorescent probes
New fluorescent probes for monitoring polymerisation reactions. 1. Synthesis, solvatochromism and emission properties, 51
- Fullerene
Laser flash photolysis study on photophysical and photochemical properties of C₆₀ fine particles, 45
- Fungicide
Visible light-induced catalytic degradation of iprobenfos fungicide by poly(3-octylthiophene-2,5-diyl) film, 59
- Hydrogen peroxide
Influence of H₂O₂ and Fe(III) in the photodegradation of nitrobenzene, 123
- Intramolecular photocycloaddition
Intramolecular *ortho* and *meta* photocycloadditions of 4-phenoxybut-1-enes substituted in the arene residue with carbomethoxy, carbomethoxymethyl, and 2-carbomethoxyethyl groups, 135
- Iron trichloride
Influence of H₂O₂ and Fe(III) in the photodegradation of nitrobenzene, 123
- Kinetics and mechanism
Photochemistry of copper(II) polyfluorocarboxylates and copper(II) acetate as their hydrocarbon analogues, 177
- Langmuir-Hinshelwood model
Factors affecting the efficiency of a photocatalyzed process in aqueous metal-oxide dispersions. Prospect of distinguishing between two kinetic models, 89
- Laser dyes
Investigations of energy transfer from some diolefinic laser dyes to Rhodamine 110, 185
- Laser excitation of Ca
Measurements of branching ratios of CaF(A²Π_{1/2,1/3}) from the reactions of Ca[4s4p(³P_J)] with CH₃F following pulsed dye-laser excitation of atomic calcium, 1
- Laser flash photolysis
Laser flash photolysis of sodium persulfate in aqueous solution with additions of dimethylformamide, 99
- Laser-induced fluorescence
Near UV multiphoton dissociation of organosilanes with picosecond and nanosecond laser pulses, 39
- Lifetimes
Investigation of the pyrene/*N,N'*-diethylaniline exciplex by photoacoustic calorimetry and fluorescence spectroscopy, 149
- Light intensity
Variation of Langmuir adsorption constant determined for TiO₂-photocatalyzed degradation of acetophenone under different light intensity, 67
- Meta* photocycloaddition
Intramolecular *ortho* and *meta* photocycloadditions of 4-phenoxybut-1-enes substituted in the arene residue with carbomethoxy, carbomethoxymethyl, and 2-carbomethoxyethyl groups, 135
- Molecular electronic branching ratios
Measurements of branching ratios of CaF(A²Π_{1/2,1/3}) from the reactions of Ca[4s4p(³P_J)] with CH₃F following pulsed dye-laser excitation of atomic calcium, 1
- Molecular mechanics simulation
Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197
- Monomer
Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197
- Multiphoton excitation
Near UV multiphoton dissociation of organosilanes with picosecond and nanosecond laser pulses, 39
- Nitrobenzene
Influence of H₂O₂ and Fe(III) in the photodegradation of nitrobenzene, 123
- Nitrobenzene photoreduction
Photochemical and photocatalytic reduction of nitrobenzene in the presence of cyclohexene, 129
- Ortho* photocycloaddition
Intramolecular *ortho* and *meta* photocycloadditions of 4-phenoxybut-1-enes substituted in the arene residue with carbomethoxy, carbomethoxymethyl, and 2-carbomethoxyethyl groups, 135
- PBN
ESR spin-trapping detection of radical intermediates in the TiO₂-assisted photo-oxidation of sulforhodamine B under visible irradiation, 83
- Persulfate
Laser flash photolysis of sodium persulfate in aqueous solution with additions of dimethylformamide, 99
- 4-Phenoxybut-1-enes
Intramolecular *ortho* and *meta* photocycloadditions of 4-phenoxybut-1-enes substituted in the arene residue with carbomethoxy, carbomethoxymethyl, and 2-carbomethoxyethyl groups, 135
- Phenylalanine
Photophysics of phenylalanine analogues. Part 1. Constrained analogues of phenylalanine modified at phenyl ring, 33
2(2-Phenylethenyl)-benzoxazoles and benzothiazoles
Photophysical properties and quantum chemical calculations of differently substituted 2(2-phenylethenyl)-benzoxazoles and benzothiazoles, 21

- Phenylsilane
Near UV multiphoton dissociation of organosilanes with picosecond and nanosecond laser pulses, 39
- Photo-oxidation
ESR spin-trapping detection of radical intermediates in the TiO₂-assisted photo-oxidation of sulforhodamine B under visible irradiation, 83
Factors influencing relative efficiency in photo-oxidations of organic molecules by Cs₃PW₁₂O₄₀ and TiO₂ colloidal photocatalysts, 213
- Photoacoustic calorimetry
Investigation of the pyrene/*N,N'*-diethylaniline exciplex by photoacoustic calorimetry and fluorescence spectroscopy, 149
- Photocatalysis
Factors influencing relative efficiency in photo-oxidations of organic molecules by Cs₃PW₁₂O₄₀ and TiO₂ colloidal photocatalysts, 213
Photochemical and photocatalytic reduction of nitrobenzene in the presence of cyclohexene, 129
Variation of Langmuir adsorption constant determined for TiO₂-photocatalyzed degradation of acetophenone under different light intensity, 67
- Photocatalytic degradation
Visible light-induced catalytic degradation of iprobenfos fungicide by poly(3-octylthiophene-2,5-diyl) film, 59
- Photochemical decomposition
Influence of H₂O₂ and Fe(III) in the photodegradation of nitrobenzene, 123
- Photochemistry
Photochemical and photocatalytic reduction of nitrobenzene in the presence of cyclohexene, 129
Photochemistry of copper(II) polyfluorocarboxylates and copper(II) acetate as their hydrocarbon analogues, 177
Photophysical and photochemical properties of C-linked ribosides of pyridin-2-one, 169
- Photodegradation
Factors affecting the efficiency of a photocatalyzed process in aqueous metal-oxide dispersions. Prospect of distinguishing between two kinetic models, 89
Nanosecond UV laser photoionization of aqueous tryptophan: temperature dependence of quantum yield, mechanism, and kinetics of hydrated electron decay, 159
- Photoinduced electron transfer
Laser flash photolysis study on photophysical and photochemical properties of C₆₀ fine particles, 45
- Photophysics
Photophysics of phenylalanine analogues. Part 1. Constrained analogues of phenylalanine modified at phenyl ring, 33
- Polydimethylsiloxane
Chemical size-effects on fluorescence lifetime of Rhodamine 6G in ethylene glycol/water microdroplets dispersed in polydimethylsiloxane matrix, 189
- Polyelectrolytes
Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197
- Polymer supported Rose Bengal photosensitizer
Photooxidation of ethylbenzene with air catalyzed by a polymer supported Rose Bengal photosensitizer, 27
- Polymerisation
New fluorescent probes for monitoring polymerisation reactions. 1. Synthesis, solvatochromism and emission properties, 51
- Polyoxometalate
Factors influencing relative efficiency in photo-oxidations of organic molecules by Cs₃PW₁₂O₄₀ and TiO₂ colloidal photocatalysts, 213
- Polyoxotungstate
Factors influencing relative efficiency in photo-oxidations of organic molecules by Cs₃PW₁₂O₄₀ and TiO₂ colloidal photocatalysts, 213
- Polythiophene film
Visible light-induced catalytic degradation of iprobenfos fungicide by poly(3-octylthiophene-2,5-diyl) film, 59
- Porphyrin
Synthesis and photophysical studies of a porphyrin–viologen dyad covalently linked by a flexible seven-atom chain, 105
- Pyrene
Monosubstituted derivatives of pyrene. Comparison of their spectral behaviour in solution and in polymer matrices, 73
- Pyridin-2-one
Photophysical and photochemical properties of C-linked ribosides of pyridin-2-one, 169
- Q-CdS clusters
Effect of detergents on the fluorescence from CdS-Q clusters prepared using variable excess Cd²⁺ concentrations, 205
- Quantum yields
Investigation of the pyrene/*N,N'*-diethylaniline exciplex by photoacoustic calorimetry and fluorescence spectroscopy, 149
- Quantum-chemical calculations — AM1 approximation
Photophysical properties and quantum chemical calculations of differently substituted 2(2-phenylethenyl)-benzoxazoles and benzothiazoles, 21
- Radical pathway
Photodynamic cross-linking of proteins. V. Nature of the tyrosine–tyrosine bonds formed in the FMN-sensitized intermolecular cross-linking of *N*-acetyl-L-tyrosine, 115
- Reaction enthalpies
Investigation of the pyrene/*N,N'*-diethylaniline exciplex by photoacoustic calorimetry and fluorescence spectroscopy, 149
- Reaction volumes
Investigation of the pyrene/*N,N'*-diethylaniline exciplex by photoacoustic calorimetry and fluorescence spectroscopy, 149
- Rhodamine 6G
Chemical size-effects on fluorescence lifetime of Rhodamine 6G in ethylene glycol/water microdroplets dispersed in polydimethylsiloxane matrix, 189
- SDS
Effect of detergents on the fluorescence from CdS-Q clusters prepared using variable excess Cd²⁺ concentrations, 205
- Self-quenching
Self-quenching of the triplet state of a semifluorinated polyimide in solution, 7
- Semiconductors
Photochemical and photocatalytic reduction of nitrobenzene in the presence of cyclohexene, 129
- Semifluorinated polyimides
Self-quenching of the triplet state of a semifluorinated polyimide in solution, 7
- Silylene
Near UV multiphoton dissociation of organosilanes with picosecond and nanosecond laser pulses, 39
- SO₄^{•−}
Laser flash photolysis of sodium persulfate in aqueous solution with additions of dimethylformamide, 99
- Solvatochromism
New fluorescent probes for monitoring polymerisation reactions. 1. Synthesis, solvatochromism and emission properties, 51
- Spin trapping
Photochemical and photocatalytic reduction of nitrobenzene in the presence of cyclohexene, 129
- Spontaneous fluorescence
Near UV multiphoton dissociation of organosilanes with picosecond and nanosecond laser pulses, 39
- TiO₂
ESR spin-trapping detection of radical intermediates in the TiO₂-assisted photo-oxidation of sulforhodamine B under visible irradiation, 83

Titanium dioxide

Factors influencing relative efficiency in photo-oxidations of organic molecules by $\text{Cs}_3\text{PW}_{12}\text{O}_{40}$ and TiO_2 colloidal photocatalysts, 213

Variation of Langmuir adsorption constant determined for TiO_2 -photo-catalyzed degradation of acetophenone under different light intensity, 67

Trans-4,4'-diaminostilbene (DASH_2^{2+})

Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197

Triplet

Nanosecond UV laser photoionization of aqueous tryptophan: temperature dependence of quantum yield, mechanism, and kinetics of hydrated electron decay, 159

Triplet lifetimes

Self-quenching of the triplet state of a semifluorinated polyimide in solution, 7

Triton X-100

Effect of detergents on the fluorescence from CdS-Q clusters prepared using variable excess Cd^{2+} concentrations, 205

Tryptophan

Nanosecond UV laser photoionization of aqueous tryptophan: temperature dependence of quantum yield, mechanism, and kinetics of hydrated electron decay, 159

Tungsten halogen lamp

Photooxidation of ethylbenzene with air catalyzed by a polymer supported Rose Bengal photosensitizer, 27

Ultraviolet radiation

Influence of H_2O_2 and Fe(III) in the photodegradation of nitrobenzene, 123

UV and Fluorescence spectra

Demonstration of structure-selective binding of organic cations to anionic polyelectrolytes, 197

Viologen

Synthesis and photophysical studies of a porphyrin–viologen dyad covalently linked by a flexible seven-atom chain, 105

Visible light

ESR spin-trapping detection of radical intermediates in the TiO_2 -assisted photo-oxidation of sulforhodamine B under visible irradiation, 83

Visible light-induced catalytic degradation of iprobenfos fungicide by poly(3-octylthiophene-2,5-diyl) film, 59
