

Subject Index of Volume 178

Acaryochloris

- Fluorescence properties of the chlorophyll *d*-dominated cyanobacterium *Acaryochloris* sp. strain Awaji, 122

Accessory chlorophyll

- A single chlorophyll in each of the core antennas CP43 and CP47 transferring excitation energies to the reaction center in Photosystem II of photosynthesis, 271

Acetone

- Electron momentum spectroscopy of the HOMO of acetone, 281

Aggregation

- Comparison of aggregation properties and photodynamic activity of phthalocyanines and azaphthalocyanines, 16
- Self-association of free base porphyrins with aminoacid substituents in AOT reverse micelles, 225
- Emission properties of a highly fluorescent pyrene dye in solution and in the liquid state, 251

Amphiphilic polyelectrolyte

- Synthesis and spectroscopic characterization of fluorescently labeled hydrocarbon- and/or fluorocarbon-modified poly(sodium 2-acrylamido-2-methylpropanesulfonates), 208

Anthracene

- Fluorescence quenching in organogel as a reaction medium, 57

Azaphthalocyanine

- Comparison of aggregation properties and photodynamic activity of phthalocyanines and azaphthalocyanines, 16

Benzazole dyes

- Spectral properties of amorphous silica (SiO₂) and mesoporous structured silicates (MCM-41 and ITQ-6) functionalized with ESIPT chromophores, 26

Benzimidazoles

- Preparation and photophysical properties of benzimidazole-based gels, 62

Binaphthol

- Chiral recognition and behavior of [1,1'-binaphthalene]-2,2'-diol in aqueous solution by fluorescence spectroscopy, 50

Binaphthyl

- Quantum control of molecular chirality: Ab initio molecular orbital study and wave packet analysis of 1,1'-binaphthyl, 258

Binol

- Chiral recognition and behavior of [1,1'-binaphthalene]-2,2'-diol in aqueous solution by fluorescence spectroscopy, 50

BOH

- Chiral recognition and behavior of [1,1'-binaphthalene]-2,2'-diol in aqueous solution by fluorescence spectroscopy, 50

C₆₀

- Electroabsorption spectra of a complex formed between tetraphenylporphyrin and fullerene in a polymer film, 177
- Photoinduced charge separation and charge recombination in terthiophene-acetylene-fullerene linked dyads, 242

Capsular polysaccharides

- A comparative study on the physico-chemical properties of bacterial capsular polysaccharides from different serotypes of *Klebsiella*, 98

CD

- Chiral recognition and behavior of [1,1'-binaphthalene]-2,2'-diol in aqueous solution by fluorescence spectroscopy, 50

CdS nanocluster

- Luminescent properties of CdS nanoclusters dispersed in solution—Effects of size and surface termination, 156

Charge-transfer complex

- Electroabsorption spectra of a complex formed between tetraphenylporphyrin and fullerene in a polymer film, 177

Chiral recognition

- Chiral recognition and behavior of [1,1'-binaphthalene]-2,2'-diol in aqueous solution by fluorescence spectroscopy, 50

Chloronitrobenzene

- Photocatalytic degradation of nitrobenzenes with combustion synthesized nano-TiO₂, 1

Chlorophyll *d*

- Fluorescence properties of the chlorophyll *d*-dominated cyanobacterium *Acaryochloris* sp. strain Awaji, 122

Coherence

- Quantum dynamics of exciton recurrence motion in dendritic molecular aggregates, 264

Combustion-synthesized catalyst

- Photocatalytic degradation of nitrobenzenes with combustion synthesized nano-TiO₂, 1

Complexation

- Thermodynamics studies of fluorescence quenching and complexation behavior of thallium(I) ion with some polyazamacrocycles, 83

Core antenna

- A single chlorophyll in each of the core antennas CP43 and CP47 transferring excitation energies to the reaction center in Photosystem II of photosynthesis, 271

Coupling energy matrix

- Excitation energy migration in a dodecameric porphyrin box, 130

Cyanobacteria

- Fe(VI)-assisted photocatalytic degradation of microcystin-LR using titanium dioxide, 106

Cyclodextrin

- Chiral recognition and behavior of [1,1'-binaphthalene]-2,2'-diol in aqueous solution by fluorescence spectroscopy, 50

Degussa P-25

- Photocatalytic degradation of nitrobenzenes with combustion synthesized nano-TiO₂, 1

Dendrimer

- The relaxation dynamics of the excited state of stilbene dendrimers substituted with phenylacetylene groups, 150

Diarylethene

- Photochromism of bis(2-alkyl-1-benzothiophen-3-yl)perfluorocyclopentene derivatives, 162

Diffusion rates

- Fluorescence quenching in organogel as a reaction medium, 57

Dimerization

Comparison of aggregation properties and photodynamic activity of phthalocyanines and azaphthalocyanines, 16

The PAS2 domain is required for dimerization of phytochrome A, 115

Dye sensitized

Interconnecting dye solar cells in modules—*I*–*V* characteristics under reverse bias, 33

Dye–polymer interaction

A comparative study on the physico-chemical properties of bacterial capsular polysaccharides from different serotypes of *Klebsiella*, 98

Electric field effects

External electric field effects on absorption and fluorescence of anthracene–(CH₂)_{*n*}–naphthalene bichromophoric molecules doped in a polymer film, 236

Electroabsorption spectrum

Electroabsorption spectra of a complex formed between tetraphenylporphyrin and fullerene in a polymer film, 177

External electric field effects on absorption and fluorescence of anthracene–(CH₂)_{*n*}–naphthalene bichromophoric molecules doped in a polymer film, 236

Electrofluorescence spectrum

External electric field effects on absorption and fluorescence of anthracene–(CH₂)_{*n*}–naphthalene bichromophoric molecules doped in a polymer film, 236

Electron momentum spectroscopy

Electron momentum spectroscopy of the HOMO of acetone, 281

Electron transfer

Photoinduced interlayer electron transfer in alternating porphyrin–fullerene dyad and regioregular poly(3-hexylthiophene) Langmuir–Blodgett films, 185

Photoinduced charge separation and charge recombination in terthiophene-acetylene-fullerene linked dyads, 242

Energy transfer

Fluorescence properties of the chlorophyll *d*-dominated cyanobacterium *Acaryochloris* sp. strain Awaji, 122

External electric field effects on absorption and fluorescence of anthracene–(CH₂)_{*n*}–naphthalene bichromophoric molecules doped in a polymer film, 236

ESIPT

Spectral properties of amorphous silica (SiO₂) and mesoporous structured silicates (MCM-41 and ITQ-6) functionalized with ESIPT chromophores, 26

Intramolecular proton transfer in 4-methyl-2,6-diformyl phenol and its derivative studied by femtosecond transient absorption spectroscopy, 76

Excimer formation

External electric field effects on absorption and fluorescence of anthracene–(CH₂)_{*n*}–naphthalene bichromophoric molecules doped in a polymer film, 236

Excitation energies

Effects of halogen substitution on the photochemical properties of hypericin, 41

Excitation energy hopping (EEH)

Excitation energy migration in a dodecameric porphyrin box, 130

Excitation energy transfer

Picosecond time-resolved luminescence of Pr(III) complexes: Intramolecular excitation energy transfer from ligand to Pr(III), 220

Excitation-energy trapping

A single chlorophyll in each of the core antennas CP43 and CP47 transferring excitation energies to the reaction center in Photosystem II of photosynthesis, 271

Exciton

Quantum dynamics of exciton recurrence motion in dendritic molecular aggregates, 264

Exciton coupling

Excitation energy migration in a dodecameric porphyrin box, 130

Exciton–exciton annihilation

Excitation energy migration in a dodecameric porphyrin box, 130

Femtosecond transient absorption

Intramolecular proton transfer in 4-methyl-2,6-diformyl phenol and its derivative studied by femtosecond transient absorption spectroscopy, 76

Ferrate-assisted

Fe(VI)-assisted photocatalytic degradating of microcystin-LR using titanium dioxide, 106

Ferrocene

Two-photon absorption properties of conjugated supramolecular porphyrins with electron donor and acceptor, 140

Fluorene

The relaxation dynamics of the excited state of stilbene dendrimers substituted with phenylacetylene groups, 150

Fluorescence

Preparation and photophysical properties of benzimidazole-based gels, 62

Self-association of free base porphyrins with aminoacid substituents in AOT reverse micelles, 225

Emission properties of a highly fluorescent pyrene dye in solution and in the liquid state, 251

Fluorescence anisotropy

Chiral recognition and behavior of [1,1'-binaphthalene]-2,2'-diol in aqueous solution by fluorescence spectroscopy, 50

Fluorescence quenching

Fluorescence quenching in organogel as a reaction medium, 57

A comparative study on the physico-chemical properties of bacterial capsular polysaccharides from different serotypes of *Klebsiella*, 98

Fluorescence quenching mechanism

Thermodynamics studies of fluorescence quenching and complexation behavior of thallium(I) ion with some polyazamacrocycles, 83

Fluorescence spectroscopy

Intramolecular proton transfer in 4-methyl-2,6-diformyl phenol and its derivative studied by femtosecond transient absorption spectroscopy, 76

Synthesis and spectroscopic characterization of fluorescently labeled hydrocarbon- and/or fluorocarbon-modified poly(sodium 2-acrylamido-2-methylpropanesulfonates), 208

Fluorescence up-conversion spectroscopy

Femtosecond fluorescence spectroscopy and near-field spectroscopy of water-soluble tetra(4-sulfonatophenyl)porphyrin and its J-aggregate, 192

Fluorescent hybrid-materials

Spectral properties of amorphous silica (SiO₂) and mesoporous structured silicates (MCM-41 and ITQ-6) functionalized with ESIPT chromophores, 26

Fluorescence up-conversion method

Solvent-assisted intramolecular vibrational energy redistribution of S₁ perylene in ketone solvents, 201

Fluorocarbon

Synthesis and spectroscopic characterization of fluorescently labeled hydrocarbon- and/or fluorocarbon-modified poly(sodium 2-acrylamido-2-methylpropanesulfonates), 208

Fullerene

Two-photon absorption properties of conjugated supramolecular porphyrins with electron donor and acceptor, 140

Photoinduced interlayer electron transfer in alternating porphyrin–fullerene dyad and regioregular poly(3-hexylthiophene) Langmuir–Blodgett films, 185

Gels

Fluorescence quenching in organogel as a reaction medium, 57

Preparation and photophysical properties of benzimidazole-based gels, 62

Halogen substitution

Effects of halogen substitution on the photochemical properties of hypericin, 41

Hydrogen

Visible light photoelectrochemical and water-photoelectrolysis properties of titania nanotube arrays, 8

Hypericin

Effects of halogen substitution on the photochemical properties of hypericin, 41

- Intermolecular vibrational energy transfer
 Solvent-assisted intramolecular vibrational energy redistribution of S_1 perylene in ketone solvents, 201
- Intramolecular vibrational energy redistribution
 Solvent-assisted intramolecular vibrational energy redistribution of S_1 perylene in ketone solvents, 201
- Isomerization
 Quantum control of molecular chirality: Ab initio molecular orbital study and wave packet analysis of 1,1'-binaphthyl, 258
- ITQ-6
 Spectral properties of amorphous silica (SiO_2) and mesoporous structured silicates (MCM-41 and ITQ-6) functionalized with ESIPT chromophores, 26
- IVR
 Intramolecular proton transfer in 4-methyl-2,6-diformyl phenol and its derivative studied by femtosecond transient absorption spectroscopy, 76
- J-aggregate
 Femtosecond fluorescence spectroscopy and near-field spectroscopy of water-soluble tetra(4-sulfonatophenyl)porphyrin and its J-aggregate, 192
- Kinetic analysis
 Photocatalytic degradation of nitrobenzenes with combustion synthesized nano- TiO_2 , 1
- LB film
 Photoinduced interlayer electron transfer in alternating porphyrin–fullerene dyad and regioregular poly(3-hexylthiophene) Langmuir–Blodgett films, 185
- Lifetime
 The relaxation dynamics of the excited state of stilbene dendrimers substituted with phenylacetylene groups, 150
- Linked compound
 External electric field effects on absorption and fluorescence of anthracene- $(CH_2)_n$ -naphthalene bichromophoric molecules doped in a polymer film, 236
- Liquid
 Emission properties of a highly fluorescent pyrene dye in solution and in the liquid state, 251
- Luminescence
 Molecular assembly of red and green nanophosphors from amine-functionalized covalent linking hybrids with emitting centers of Eu^{3+} and Tb^{3+} ions, 70
- MCM-41
 Spectral properties of amorphous silica (SiO_2) and mesoporous structured silicates (MCM-41 and ITQ-6) functionalized with ESIPT chromophores, 26
- Mechanism of reaction
 Photodegradation of 2,3,4,5-tetrachlorophenol in water/methanol mixture, 90
- Metachromasia
 A comparative study on the physico-chemical properties of bacterial capsular polysaccharides from different serotypes of *Klebsiella*, 98
- Microcystin-LR
 Fe(VI)-assisted photocatalytic degradating of microcystin-LR using titanium dioxide, 106
- Microstructures
 Preparation and photophysical properties of benzimidazole-based gels, 62
- Modules
 Interconnecting dye solar cells in modules— I - V characteristics under reverse bias, 33
- Molecular aggregates
 Quantum dynamics of exciton recurrence motion in dendritic molecular aggregates, 264
- Molecular chirality
 Quantum control of molecular chirality: Ab initio molecular orbital study and wave packet analysis of 1,1'-binaphthyl, 258
- Molecular-based hybrid materials
 Molecular assembly of red and green nanophosphors from amine-functionalized covalent linking hybrids with emitting centers of Eu^{3+} and Tb^{3+} ions, 70
- Momentum profile
 Electron momentum spectroscopy of the HOMO of acetone, 281
- Nanophosphors
 Molecular assembly of red and green nanophosphors from amine-functionalized covalent linking hybrids with emitting centers of Eu^{3+} and Tb^{3+} ions, 70
- Nano- TiO_2
 Photocatalytic degradation of nitrobenzenes with combustion synthesized nano- TiO_2 , 1
- Nanotube
 Visible light photoelectrochemical and water-photoelectrolysis properties of titania nanotube arrays, 8
- Nanotube array
 Visible light photoelectrochemical and water-photoelectrolysis properties of titania nanotube arrays, 8
- Nitrobenzene
 Photocatalytic degradation of nitrobenzenes with combustion synthesized nano- TiO_2 , 1
- Nitrophenol
 Photocatalytic degradation of nitrobenzenes with combustion synthesized nano- TiO_2 , 1
- Non-radiative energy transfer
 Synthesis and spectroscopic characterization of fluorescently labeled hydrocarbon- and/or fluorocarbon-modified poly(sodium 2-acrylamido-2-methylpropanesulfonates), 208
- Organogels
 Fluorescence quenching in organogel as a reaction medium, 57
- PAS domain
 The PAS2 domain is required for dimerization of phytochrome A, 115
- PAS2
 The PAS2 domain is required for dimerization of phytochrome A, 115
- Phenylacetylene
 The relaxation dynamics of the excited state of stilbene dendrimers substituted with phenylacetylene groups, 150
- Photocatalytic degradation
 Photocatalytic degradation of nitrobenzenes with combustion synthesized nano- TiO_2 , 1
 Fe(VI)-assisted photocatalytic degradating of microcystin-LR using titanium dioxide, 106
- Photochromism
 Photochromism of bis(2-alkyl-1-benzothiophen-3-yl)perfluorocyclopentene derivatives, 162
- Photodegradation
 Photodegradation of 2,3,4,5-tetrachlorophenol in water/methanol mixture, 90
- Photoelectrolysis
 Visible light photoelectrochemical and water-photoelectrolysis properties of titania nanotube arrays, 8
- Photoinduced electron-transfer
 Fluorescence quenching in organogel as a reaction medium, 57
- Photolysis
 Visible light photoelectrochemical and water-photoelectrolysis properties of titania nanotube arrays, 8
- Photosynthesis
 Fluorescence properties of the chlorophyll *d*-dominated cyanobacterium *Acaryochloris* sp. strain Awaji, 122

Photosystem II

A single chlorophyll in each of the core antennas CP43 and CP47 transferring excitation energies to the reaction center in Photosystem II of photosynthesis, 271

Phototoxicity

Effects of halogen substitution on the photochemical properties of hypericin, 41

Phthalocyanine

Comparison of aggregation properties and photodynamic activity of phthalocyanines and azaphthalocyanines, 16

Photochromism

Temperature dependence of ultrafast photoinduced ring-opening and -closure reactions of spironaphthooxazine in crystalline phase, 170

Phytochrome

The PAS2 domain is required for dimerization of phytochrome A, 115

Picosecond time-resolved luminescence spectra

Picosecond time-resolved luminescence of Pr(III) complexes: Intramolecular excitation energy transfer from ligand to Pr(III), 220

Polarization

Chiral recognition and behavior of [1,1'-binaphthalene]-2,2'-diol in aqueous solution by fluorescence spectroscopy, 50

Polyazamacrocyclic

Thermodynamics studies of fluorescence quenching and complexation behavior of thallium(I) ion with some polyazamacrocyclics, 83

Polymeric micelles

Synthesis and spectroscopic characterization of fluorescently labeled hydrocarbon- and/or fluorocarbon-modified poly(sodium 2-acrylamido-2-methylpropanesulfonates), 208

Polythiophene

Photoinduced interlayer electron transfer in alternating porphyrin-fullerene dyad and regioregular poly(3-hexylthiophene) Langmuir-Blodgett films, 185

Porphyrin

Two-photon absorption properties of conjugated supramolecular porphyrins with electron donor and acceptor, 140

Electroabsorption spectra of a complex formed between tetraphenylporphyrin and fullerene in a polymer film, 177

Photoinduced interlayer electron transfer in alternating porphyrin-fullerene dyad and regioregular poly(3-hexylthiophene) Langmuir-Blodgett films, 185

Self-association of free base porphyrins with aminoacid substituents in AOT reverse micelles, 225

Pr(III) complex

Picosecond time-resolved luminescence of Pr(III) complexes: Intramolecular excitation energy transfer from ligand to Pr(III), 220

Pyrene

Emission properties of a highly fluorescent pyrene dye in solution and in the liquid state, 251

Quantum beat

Quantum dynamics of exciton recurrence motion in dendritic molecular aggregates, 264

Quantum control

Quantum control of molecular chirality: Ab initio molecular orbital study and wave packet analysis of 1,1'-binaphthyl, 258

Quantum dynamics

Quantum dynamics of exciton recurrence motion in dendritic molecular aggregates, 264

Quantum yield

Photodegradation of 2,3,4,5-tetrachlorophenol in water/methanol mixture, 90

Rare earth ions

Molecular assembly of red and green nanophosphors from amine-functionalized covalent linking hybrids with emitting centers of Eu³⁺ and Tb³⁺ ions, 70

Rate constant

Photodegradation of 2,3,4,5-tetrachlorophenol in water/methanol mixture, 90

Reaction center

A single chlorophyll in each of the core antennas CP43 and CP47 transferring excitation energies to the reaction center in Photosystem II of photosynthesis, 271

Reaction dynamics

Temperature dependence of ultrafast photoinduced ring-opening and -closure reactions of spironaphthooxazine in crystalline phase, 170

Recurrence motion

Quantum dynamics of exciton recurrence motion in dendritic molecular aggregates, 264

Removal efficiency

Fe(VI)-assisted photocatalytic degrading of microcystin-LR using titanium dioxide, 106

Reverse

Interconnecting dye solar cells in modules—*I*-*V* characteristics under reverse bias, 33

Reverse micelle

Self-association of free base porphyrins with aminoacid substituents in AOT reverse micelles, 225

Scanning near-field optical microscopy

Femtosecond fluorescence spectroscopy and near-field spectroscopy of water-soluble tetra(4-sulfonatophenyl)porphyrin and its J-aggregate, 192

Self-assembled porphyrin array

Excitation energy migration in a dodecameric porphyrin box, 130

Self-assembly

Fluorescence quenching in organogel as a reaction medium, 57
Two-photon absorption properties of conjugated supramolecular porphyrins with electron donor and acceptor, 140

Series

Interconnecting dye solar cells in modules—*I*-*V* characteristics under reverse bias, 33

Shading

Interconnecting dye solar cells in modules—*I*-*V* characteristics under reverse bias, 33

Single crystal

Photochromism of bis(2-alkyl-1-benzothiophen-3-yl)perfluorocyclopentene derivatives, 162

Singlet oxygen

Comparison of aggregation properties and photodynamic activity of phthalocyanines and azaphthalocyanines, 16

Solid state reaction

Temperature dependence of ultrafast photoinduced ring-opening and -closure reactions of spironaphthooxazine in crystalline phase, 170

Solute-solvent interaction

Solvent-assisted intramolecular vibrational energy redistribution of S₁ perylene in ketone solvents, 201

Spirooxazine

Temperature dependence of ultrafast photoinduced ring-opening and -closure reactions of spironaphthooxazine in crystalline phase, 170

Stern-Volmer

Fluorescence quenching in organogel as a reaction medium, 57

Stilbene

The relaxation dynamics of the excited state of stilbene dendrimers substituted with phenylacetylene groups, 150

Sulfonamide

Self-association of free base porphyrins with aminoacid substituents in AOT reverse micelles, 225

Supramolecular chemistry

Emission properties of a highly fluorescent pyrene dye in solution and in the liquid state, 251

Synergetic effect

Fe(VI)-assisted photocatalytic degrading of microcystin-LR using titanium dioxide, 106

TD-DFT

Effects of halogen substitution on the photochemical properties of hypericin, 41

- Temperature dependence
 Temperature dependence of ultrafast photoinduced ring-opening and -closure reactions of spironaphthooxazine in crystalline phase, 170
- Terthiophene
 Photoinduced charge separation and charge recombination in terthiophene-acetylene-fullerene linked dyads, 242
- 2,3,4,5-Tetrachlorophenol
 Photodegradation of 2,3,4,5-tetrachlorophenol in water/methanol mixture, 90
- Tetra(4-sulfonatophenyl)porphyrin
 Femtosecond fluorescence spectroscopy and near-field spectroscopy of water-soluble tetra(4-sulfonatophenyl)porphyrin and its J-aggregate, 192
- Thallium
 Thermodynamics studies of fluorescence quenching and complexation behavior of thallium(I) ion with some polyazamacrocycles, 83
- Time-resolved fluorescence
 Fluorescence properties of the chlorophyll *d*-dominated cyanobacterium *Acaryochloris* sp. strain Awaji, 122
- Titania
 Visible light photoelectrochemical and water-photoelectrolysis properties of titania nanotube arrays, 8
- Transient absorption spectroscopy
 Temperature dependence of ultrafast photoinduced ring-opening and -closure reactions of spironaphthooxazine in crystalline phase, 170
- Transient absorption anisotropy (TAA)
 Excitation energy migration in a dodecameric porphyrin box, 130
- Two-photon absorption
 Two-photon absorption properties of conjugated supramolecular porphyrins with electron donor and acceptor, 140
- Ultrafast transient luminescence measurement
 Luminescent properties of CdS nanoclusters dispersed in solution—Effects of size and surface termination, 156
- Vibrational relaxation
 Solvent-assisted intramolecular vibrational energy redistribution of S_1 perylene in ketone solvents, 201
- Viscosity
 A comparative study on the physico-chemical properties of bacterial capsular polysaccharides from different serotypes of *Klebsiella*, 98
- Wave packet
 Quantum control of molecular chirality: Ab initio molecular orbital study and wave packet analysis of 1,1'-binaphthyl, 258
