# JOURNAL OF ANALYTICAL ATOMIC SPECTROMETRY (JAAS)

An International Journal on the Development and  
Application of Spectrometric Techniques

## AIMS AND SCOPE

*Journal of Analytical Atomic Spectrometry (JAAS)* is a new international journal, to begin publication in February 1986, which will contain original research papers, short papers, communications and letters concerned with the development and analytical application of atomic spectrometric techniques. *JAAS* will be published bimonthly and will include comprehensive reviews on specific topics, general information and news of interest to analytical atomic spectroscopists, including information on forthcoming conferences and book reviews. Special issues of *JAAS* will be published, devoted to subjects highlighted by particular symposia. Also included in *JAAS* will be the literature reviews previously covered in *Annual Reports on Analytical Atomic Spectroscopy*.

Published by the Royal Society of Chemistry in London, *JAAS* will have a style and format similar to that of the well-established journal *The Analyst*. *JAAS* will provide an improved publication service to support the growing research efforts in, and applications of, atomic spectrometric techniques.
