268 Errata Macromolecules

ERRATA

Volume 3, 1970

- M. Fisher and M. Szwarc: Kinetics of Propagation of Living Poly-2-vinylpyridine.
- Page 25. The graph in Figure 5 has been erroneously reversed by the draftsman and consequently the marking on 1/T axis should now run from right to left and $\log k_{-}$ axis from up to down.
- C. Gieniewski and R. S. Moore: Unit Cell of the Pseudomonoclinic Crystalline Component in Polyethylene.
- Page 97. The titles and authors of this note were inadvertently omitted from the Contents and Author Index of the January–February issue.
- **A. E. Tonelli:** The Calculated Rotatory Properties of Random-Coil Poly-L-alanine.

Page 636, column 2. The second sentence in the section on Calculated Results and Their Comparison with Experiment should read: If the band shapes are assumed to be Gaussian²⁹ then

$$[\theta_{i}] = [\theta_{i}^{0}] \exp[-(\nu_{i} - \nu)^{2}/\Theta_{i}^{2}]$$
 (2)

where $[\theta_i^0] = 0.875 \times 10^4 (\nu_i/\Theta_i) R_i$, and eq 2 can be used to construct the predicted CD spectrum from the calculated rotational strengths.
