Xinya Lu and R. A. Weiss*: Relationship between the Glass Transition Temperature and the Interaction Parameter of Miscible Binary Polymer Blends. Volume 25, Number 12, June 8, 1992, pp 3242-3246.

The correct sign of eq 17 is positive. That is

$$A = \frac{\chi R(T_{g1} - T_{g2})c}{M_1 \Delta c_{p1}}$$

We are grateful to Mr. Warren Nachlis at General Electric Co. for pointing out this error.
