**R. W. Phillips, V. V. Sheares, E. T. Samulski, and J. M. DeSimone\***: Isomeric Poly(benzophenone)s: Synthesis of Highly Crystalline Poly(4,4'-benzophenone) and Amorphous Poly(2,5-benzophenone), a Soluble Poly(*p*-phenylene) Derivative. Volume 27, Number 8, April 11, 1994, pp 2354–2356.

The sentence on p 2355, column 1, line 4, should read as follows:

The polymerization was then performed using the Ni(0) catalyst prepared from NiCl<sub>2</sub> (0.3125 mmol), triphenylphosphine (0.0093 mol), bipyridine (0.3886 mmol), and zinc dust (0.0495 mol) in DMAc.
