V. Premnath: Determination of Molecular Spatial Orientation on Polymeric Surfaces Using Internal Total Reflection Infrared Dichroism. Volume 28, Number 14, July 3, 1995, pp 5139–5143.

An error was made in eqs 8 and 10–17. The factor 2.303 should not appear. This correction does not affect the other equations or conclusions in any way.

The corrected equations are as follows:

$$\ln R = \ln(1 - A) = (-A) \tag{8}$$

$$a_x^{\mathrm{TE}} = \alpha k_x [S_x/S_{\mathrm{ref}}]^n \tag{10}$$

$$a_x^{\mathrm{TM}} = (\beta k_y + \gamma k_z)[S_x/S_{\mathrm{ref}}]^n \tag{11}$$

$$a_y^{\mathrm{TE}} = \alpha k_y [S_y/S_{\mathrm{ref}}]^n \tag{12}$$

$$a_y^{\mathrm{TM}} = (\beta k_x + \gamma k_z)[S_y/S_{\mathrm{ref}}]^n \tag{13}$$

$$\beta a_x^{\mathrm{TE}} + \alpha a_x^{\mathrm{TM}} = [\alpha\beta(k_x + k_y) + \alpha\gamma k_z][S_x/S_{\mathrm{ref}}]^n \tag{14}$$

$$\beta a_y^{\mathrm{TE}} + \alpha a_y^{\mathrm{TM}} = [\alpha\beta(k_x + k_y) + \alpha\gamma k_z][S_y/S_{\mathrm{ref}}]^n \tag{15}$$

$$a_x^{\mathrm{LC}} = \beta a_x^{\mathrm{TE}} + \alpha a_x^{\mathrm{TM}} = \Delta(S_x/S_{\mathrm{ref}})^n \tag{16}$$

$$a_y^{\mathrm{LC}} = \beta a_y^{\mathrm{TE}} + \alpha a_y^{\mathrm{TM}} = \Delta(S_y/S_{\mathrm{ref}})^n \tag{17}$$
