

Retraction

Influence of endurance training on energy intake, norepinephrine kinetics, and metabolic rate in older individuals. *Poehlman E, Gardner A, Goran M. Metabolism 1992;41(September):941-8.*

This article has been retracted at the request of the editor-in-chief and authors because of the intentional

omission of a material data point for the norepinephrine results for 1 of the 7 subjects reported in Figure 4 and the associated text of the article to make the association between increased sympathetic nervous activity and endurance training appear more significant than was actually the case.
