

Notes to Contributors

Original Communications. Manuscripts for publication, letters, and all other editorial communications should be addressed to the Editor-in-Chief, James B. Field, MD, Eight Windmill Point Lane, Hampton, VA 23664-2129; telephone/ fax: 757-850-2826. Articles are accepted for publication on the condition that they are contributed solely to *Metabolism*. Contributors should bear in mind the nature of the Journal, ie, articles should have a definite metabolic application, with case reports submitted only if they include controlled observations of an exceptionally revealing nature. Papers should be as brief as possible and consistent with the subject. Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher.

Preliminary Reports. Contributors are encouraged to submit articles in a special short form known as a "Preliminary Report," with the understanding that if such an article is accepted it will be printed in the next available issue. It can serve as a preliminary report on work just completed, or may be a final report or an observation that does not require a lengthy write-up. To qualify for the priority given a Preliminary Report, the article must not exceed 1,000 words including the bibliography, but exclusive of any illustrative material. A simple table or small figure is allowed, but the author should cut the 1,000-word allowance by an amount sufficient to allow for the space taken up by the table or illustration. Despite the limitation on length, data to support the conclusions stated should be included to the extent necessary.

Manuscripts. Manuscripts must be submitted on a disk, preferably in Microsoft Word. Three double-spaced hard copy versions of the final manuscript, free of handwritten alterations, must accompany the disk. All components of the manuscript must appear within a single electronic file: references, figure legends, and tables must appear at the end of the manuscript. Please refrain from using end notes as references or automatic list numbering because these features are lost in conversion: simply type the reference number in parentheses in the text and type the reference list. Formatting, such as Greek letters, italics, super- and subscripts, may be used: the coding scheme for such elements must be consistent throughout.

The title page of the manuscript should include (1) the name of the institution where the work was done ("From the Fels Research Institute . . ."); (2) acknowledgments for research support the authors wish to publish; and (3) one complete mailing address for one author for the mailing of proofs and for reprint requests.

Previously Published Material. Authors are responsible for applying for permission for both print and electronic rights for all borrowed materials and are responsible for paying any fees related to the applications of these permissions.

Illustrations and Tables. All tables and figures must be cited in order in the text using arabic numerals. Illustrations should carry their numbers and the author's name on the back; where necessary, indicate "top" on the back. Figure legends should be compiled in a separate list at the end of the paper. To ensure clear reproduction, diagrams, charts, and other line drawings should be submitted as glossy, black-and-white photo prints; for half-tone work, good photographic prints should be supplied. Photocopies are *not* acceptable for reproduction in the Journal, but legible copies may be sent with the duplicate manuscripts. Tables and illustrations should be of a size easily handled, and for all illustrations the effect of reduction in size to fit the Journal page should be considered. The contributor must bear the full cost of printing color plates.

Electronic Illustration Submission. Figures may be submitted in electronic format. Images should be provided in EPS or TIF format on Zip disk, CD, floppy, Jaz, or 3.5 MO. Graphics software such as Photoshop and Illustrator, not presentation software such as PowerPoint, CorelDraw, or Harvard Graphics, should be used to create the art. Color images must be CMYK, at least 300 DPI, with a digital color proof, not a color laser print or color photocopy (this proof will be used at press for color reproduction). Gray scale images should be at least 300 DPI and accompanied by a proof. Combinations of gray scale and line art should be at least 1200 DPI and accompanied by a proof. Line art (black and white or color) should be at least 1200 DPI and accompanied by a proof. Please include hardware and software information, in addition to the file names. For detailed instructions on the preparation of electronic artwork, consult Elsevier's Author Gateway at <http://authors.elsevier.com>.

References should be compiled numerically according to the order of citation in the text and typed double-spaced in the Vancouver style, **giving inclusive pages**:

Journal article:

1. Camacho RC, Denny JC, Pencek RR, Koyama Y, Lacy DB, James FD, et al. Portal venous hyperinsulinemia does not stimulate gut glucose absorption in the conscious dog. *Metabolism* 2004;53:1290-5.

2. Katz A, Bogardus C: Insulin-mediated increase in glucose 1,6-bisphosphate is attenuated in skeletal muscle of insulin-resistant man. *Metabolism*. In press 2004.

Complete book:

3. Wesson LG. Physiology of the human kidney. Philadelphia, PA, Grune & Stratton; 1969

Chapter in book:

4. Young VR. The role of skeletal and cardiac muscle in the regulation of protein metabolism. In Munro HN, editor: Mammalian protein metabolism. vol 4. San Diego: Academic; 1970. p. 585-674.

Proofreading. Contributors are provided with galley proofs and are asked to proofread them for typesetting errors, returning them within 48 hours. Important changes in data are allowed within reason without cost, but excessive alterations and additions must be charged to the contributor.

Reprints of articles will be furnished to contributors when ordered in advance of publication. An order form is sent via E mail upon registration of an article with the publisher. Individual reprints of an article can usually be obtained by contacting its author (see footnote on first page of article).

Other inquiries. For inquiries relating to the submission of articles (including electronic submission where available), please visit www.elsevier.com/authors. This site also provides the facility to track accepted articles and set up e-mail alerts to inform you of when an article's status has changed. The site provides detailed artwork guidelines, copyright information, frequently asked questions, and more.

Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided after registration of an article for publication.

Funding Body Agreements and Policies. Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>.
