|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Special Article: Archibald Edward Garrod: The Physician Father of Biochemistry<br><i>Anna Piro, Antonio Tagarelli, Giuseppe Tagarelli, Paolo Lagonia, and Aldo Quattrone</i>                                                                                                                                                                                   | 427 |
| Influence of Obesity on Vitamin D–Binding Protein and 25-Hydroxy Vitamin D Levels in African American and White Women<br><i>Stephen J. Winters, Ramana Chennubhatla, Chenxi Wang, and James J. Miller</i>                                                                                                                                                      | 438 |
| Proinflammatory Cytokines in Response to Insulin-Induced Hypoglycemic Stress in Healthy Subjects<br><i>Laleh Razavi Nematollahi, Abbas Eghbal Kitabchi, Frankie B. Stentz, Jim Y. Wan, Bagher A. Larijani, Mohammad Mohajer Tehrani, Mohammad Hossein Gozashti, Kobra Omidfar, and Eghbal Taheri</i>                                                           | 443 |
| Preoperative Glucocorticoid Administration Attenuates the Systemic Stress Response and Hyperglycemia After Surgical Trauma in the Rat<br><i>Peter Hager, Johan Permert, Ann-Charlotte Wikström, Margery K. Herrington, Claes-Göran Östenson, and Lisa Strömmer</i>                                                                                             | 449 |
| Middle-Aged Japanese Women Are Resistant to Obesity-Related Metabolic Abnormalities<br><i>Masaru Sakurai, Toshinari Takamura, Katsuyuki Miura, Shuichi Kaneko, and Hideaki Nakagawa</i>                                                                                                                                                                        | 456 |
| Fruit and Vegetable Consumption and Risk Factors for Cardiovascular Disease<br><i>Parvin Mirmiran, Nazanin Noori, Maryam Beheshti Zavareh, and Fereidoun Azizi</i>                                                                                                                                                                                             | 460 |
| The Response of $\gamma$ Vitamin E to Varying Dosages of $\alpha$ Vitamin E Plus Vitamin C<br><i>Absalon D. Gutierrez, Daniela Gonzalez de Serna, Irina Robinson, and David S. Schade</i>                                                                                                                                                                      | 469 |
| Retinol-Binding Protein Levels Are Increased in Association With Gonadotropin Levels in Healthy Women<br><i>Hideo Makimura, Jeffrey Wei, Sara E. Dolan-Looby, Vincent Ricchiuti, and Steven Grinspoon</i>                                                                                                                                                      | 479 |
| Utilization of an Abbreviated Diabetes Impact Management Scale to Assess Change in Subjective Disability During a Trial of Pulsatile Insulin Delivery Demonstrates Benefit<br><i>Larry A. Weinrauch, George Bayliss, Ray E. Gleason, Annette T. Lee, and John A. D’Elia</i>                                                                                    | 488 |
| A Pilot Study to Assess Utility of Changes in Elements of the Diabetes Impact Management Scale in Evaluating Diabetic Patients for Progressive Nephropathy<br><i>Larry A. Weinrauch, George Bayliss, Ray E. Gleason, Annette T. Lee, and John A. D’Elia</i>                                                                                                    | 492 |
| Association Between Leptin and Transaminases: 1-Year Follow-Up Study in 180 Overweight Children<br><i>Thomas Reinehr, Caroline Schmidt, Gideon de Sousa, and Werner Andler</i>                                                                                                                                                                                 | 497 |
| Diabetic Nephropathy and Risk Factors for Peripheral Artery Disease in Chinese With Type 2 Diabetes Mellitus<br><i>Ming-Chia Hsieh, Kai-Jen Tien, Daw-Shyong Perng, Jeng-Yueh Hsiao, Shun-Jen Chang, Hui-Ting Liang, Hung-Chun Chen, and Shih-Te Tu</i>                                                                                                        | 504 |
| Beneficial Effects of Designed Dietary Fatty Acid Compositions on Lipids in Triacylglycerol-Rich Lipoproteins Among Chinese Patients With Type 2 Diabetes Mellitus<br><i>Jun Dai, Yi-Xiang Su, Scott Bartell, Ngoc-Anh Le, Wen-Hua Ling, Yi-Quan Liang, Ling Gao, Hai-Yan Wu, Emir Veledar, and Viola Vaccarino</i>                                            | 510 |
| RARRES2, Encoding the Novel Adipokine Chemerin, Is a Genetic Determinant of Disproportionate Regional Body Fat Distribution: A Comparative Magnetic Resonance Imaging Study<br><i>Karsten Müssig, Harald Staiger, Fausto Machicao, Claus Thamer, Jürgen Machann, Fritz Schick, Claus D. Claussen, Norbert Stefan, Andreas Fritsche, and Hans-Ulrich Häring</i> | 519 |

|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Metformin Suppresses High Glucose–Induced Poly(Adenosine Diphosphate–Ribose) Polymerase Overactivation in Aortic Endothelial Cells<br><i>Meriem Mahrouf-Yorgov, Nicolas Marie, Didier Borderie, Raja Djelidi, Dominique Bonnefont-Rousselot, Alain Legrand, Jean-Louis Beaudeau, and Jacqueline Peynet</i>                                                                                                                         | 525 |
| Red Blood Cell Membrane $\alpha$ -Linolenic Acid and the Risk of Sudden Cardiac Arrest<br><i>Rozenn N. Lemaitre, Irena B. King, Nona Sotoodehnia, Thomas D. Rea, Trivellore E. Raghunathan, Kenneth M. Rice, Thomas S. Lumley, Robert H. Knopp, Leonard A. Cobb, Michael K. Copass, and David S. Siscovick</i>                                                                                                                     | 534 |
| The Pro12Ala Polymorphism of the PPAR $\gamma$ 2 Gene Is Associated With Hepatic Glucose Uptake During Hyperinsulinemia in Subjects With Type 2 Diabetes Mellitus<br><i>Miikka-Juhani Honka, Markku Vanttinen, Patricia Iozzo, Kirsi A. Virtanen, Riikka Lautamäki, Kirsti Hällsten, Ronald J.H. Borra, Teemu Takala, Antti P.M. Viljanen, Jukka Kempainen, Jussi Pihlajamäki, Juhani Knuuti, Pirjo Nuutila, and Markku Laakso</i> | 541 |
| Serum Levels of Angiopoietin-Related Growth Factor in Diabetes Mellitus and Chronic Hemodialysis<br><i>Thomas Ebert, Anette Bachmann, Ulrike Lössner, Jürgen Kratzsch, Matthias Blüher, Michael Stumvoll, and Mathias Fasshauer</i>                                                                                                                                                                                                | 547 |
| Cold Exposure Increases Adiponectin Levels in Men<br><i>Pascal Imbeault, Isabelle Dépault, and François Haman</i>                                                                                                                                                                                                                                                                                                                  | 552 |
| Overexpression of Apolipoprotein A5 in Mice Is Not Protective Against Body Weight Gain and Aberrant Glucose Homeostasis<br><i>Nathalie Pamir, Timothy S. McMillen, Yu-I Li, Ching-Mei Lai, Howard Wong, and Renée C. LeBoeuf</i>                                                                                                                                                                                                   | 560 |
| Adenoviral Expression of Human Lecithin-Cholesterol Acyltransferase in Nonhuman Primates Leads to an Antiatherogenic Lipoprotein Phenotype by Increasing High-Density Lipoprotein and Lowering Low-Density Lipoprotein<br><i>Marcelo J.A. Amar, Robert D. Shamburek, Boris Vaisman, Catherine L. Knapper, Bernhard Foger, Robert F. Hoyt Jr, Silvia Santamarina-Fojo, Hollis B. Brewer Jr, and Alan T. Remaley</i>                 | 568 |
| Elevated Coagulation and Inflammatory Markers in Adolescents With a History of Premature Adrenarche<br><i>Sarantis Livadas, Maria Dracopoulou, Karmen Vasileiadi, Christina Lazaropoulou, Maria-Alexandra Magiakou, Paraskevi Xekouki, Antonis Voutetakis, Christina Kanaka-Gantenbein, Ioannis Papassotiriou, Christodoulos Stefanadis, George P. Chrousos, and Catherine Dacou-Voutetakis</i>                                    | 576 |
