Primarily fundamental in tenor, MCLC publishes original research papers of both an experimental and theoretical nature in three areas of specialization: molecular crystals (spectroscopy, energy and charge transfer, solid state reactions, photo and radiation effects); low dimensional solids (structure, electronic, magnetic, and optical properties, transport mechanisms); and liquid crystals (electro and magneto-optical phenomena, thermodynamics, phase transitions, structure, NMR and orientation controlled spectroscopy). In all three areas, experimental manuscripts describing both preparation and properties will be considered. The above listing of topics is meant to be purely illustrative of typical subject matter.

SUBSCRIPTION RATES

Each volume consists of two double issues; published monthly

Current Volume Block: Volumes 102–111

Subscription rate, per volume, for current volume block: \$225.00

Molecular Crystals and Liquid Crystals (ISSN:0026-8941) subscription rate U.S. dollar \$225.00 (including postage). This price applies in North America only. All other countries will be invoiced at current conversion rates. Back volumes are also available in microform (microfiche or microfilm). Please write for details.
