## GENERAL INFORMATION

### Aims and Scope

Primarily fundamental in tenor, MCLC publishes original research papers of both an experimental and theoretical nature in three areas of specialization: molecular crystals (spectroscopy, energy, and charge transfer, solid state reactions, photo and radiation effects); low dimensional solids (structure, electronic, magnetic, and optical properties, transport mechanisms); and liquid crystals (electro and magneto-optical phenomena, thermodynamics, phase transitions, structure, NMR and orientation controlled spectroscopy). In all three areas, experimental manuscripts describing both preparation and properties will be considered. The above listing of topics is meant to be purely illustrative of typical subject matter.

Notes for contributors can be found at the back of the journal.

### Subscription Rates

Four issues per volume: \$226.00 U.S. (including postage)

This price applies in North America only. All other countries will be invoiced at our current conversion rate. The subscription rates include a distribution charge of \$17.00 for postage and handling. Send your order to your usual supplier or direct to Gordon and Breach, Science Publishers, c/o STBS Ltd., One Bedford Street, London WC2E 9PP, England. Journal subscriptions are sold on a volume basis only; single issues are not available separately. Claims for non-receipt of issues should be made within three months of publication of the issue. If not, they will not be honored without charge. Subscriptions are available for microform editions for current and back volumes. Please write for details.
