Aims and Scope

Primarily fundamental in tenor, MCLC publishes original research papers of both an experimental and theoretical nature in three areas of specialization: molecular crystals (spectroscopy, energy, and charge transfer, solid state reactions, photo and radiation effects); low-dimensional solids (structure, electronic, magnetic, and optical properties, transport mechanisms); and liquid crystals (electro and magneto-optical phenomena, thermodynamics, phase transitions, structure, NMR and orientation controlled spectroscopy). In all three areas, experimental manuscripts describing both preparation and properties will be considered.

ORDERING INFORMATION

Published monthly. Subscriptions are renewed on an annual basis. 2001 Volume(s): 355-371.

Molecular Crystals and Liquid Crystals is Section A of the combined title *Molecular Crystals and Liquid Crystals Science and Technology*. Other journals offered in this collection are Section B: *Nonlinear Optics*; Section C: *Molecular Materials*; and Section D: *Display and Imaging*. Please contact the Publisher for further details.

Orders may be placed with your usual supplier or at one of the addresses shown below. Journal subscriptions are sold on a per volume basis only; single issues of the current volume are not available separately. Claims for nonreceipt of issues will be honored if made within three months of publication of the issue. **See Publication Schedule Information.** Subscriptions are available for microform editions; details will be furnished upon request.
