FOODBORNE INFECTIONS AND INTOXICATIONS

Editor: Helge Karch

Editorial: Foodborne Infections and Intoxications: Need of a Multidisciplinary Approach for Control

Helge Karch 473

MNF Interview: Strategies against food-borne diseases

Andrea Ammon 476

Review Article:

Bacillus cereus, the causative agent of an emetic type of food-borne illness

Monika Ehling-Schulz, Martina Fricker and Siegfried Scherer

479

Research Articles:

Systematic survey on the prevalence of genes coding for staphylococcal enterotoxins SEIM, SEIO, and SEIN

Karsten Becker, Alexander W. Friedrich, Georg Peters and Christof von Eiff

488

Expression profiles of effector proteins SopB, SopD1, SopE1, and AvrA differ with systemic, enteric, and epidemic strains of *Salmonella enterica*

Wiebke Streckel, Anne-Christin Wolff, Rita Prager, Erhard Tietze and Helmut Tschäpe

496

Molecular characteristics of *Escherichia coli* serogroup O78 strains isolated from diarrheal cases in bovines urge further investigations on their zoonotic potential

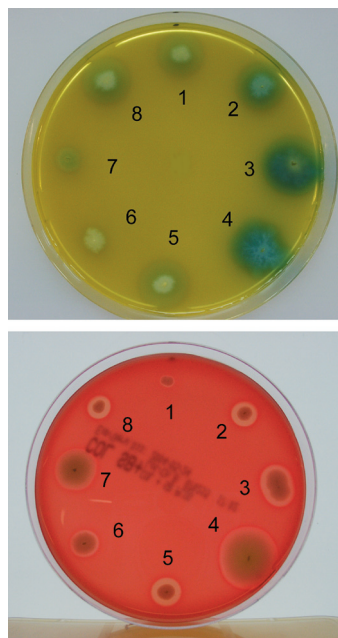

Christa Ewers, Claudia Schüffner, Reinhard Weiß, Georg Baljer and Lothar H. Wieler 504

A rapid method for the discrimination of genes encoding classical Shiga toxin (Stx) 1 and its variants, Stx1c and Stx1d, in *Escherichia coli*

Thorsten Kuczius, Martina Bielaszewska, Alexander W. Friedrich and Wenlan Zhang 515

Occurrence of antibiotic-resistant enterobacteria in agricultural foodstuffs

Sybille Boehme, Guido Werner, Ingo Klare, Rolf Reissbrodt and Wolfgang Witte 522

Molecular monitoring of environmental conditions influencing the induction of ochratoxin A biosynthesis genes in *Penicillium nordicum*

<i>Rolf Geisen</i>	532
