Bioinformatics of Protein Allergenicity

Guest Editor: James Gibson

Editorial

Bioinformatics of Protein Allergenicity

James Gibson 591

Review Article

Food allergy

Wesley Burks and Barbara K. Ballmer-Weber 595

Review Article

Review of the development of methodology for evaluating the human allergenic potential of novel proteins

Steve L. Taylor 604

Review Article

Introduction to bioinformatics

Pinar Kondu Akalin 610

Review Article

Requirements for effective IgE cross-linking on mast cells and basophils

Edward F. Knol 620

Review Article

In silico predictability of allergenicity: From amino acid sequence via 3-D structure to allergenicity

Rob C. Aalberse and Beda M. Stadler 625

Review Article

Structural bioinformatic approaches to understand cross-reactivity

Heimo Breiteneder and Clare Mills 628

Review Article

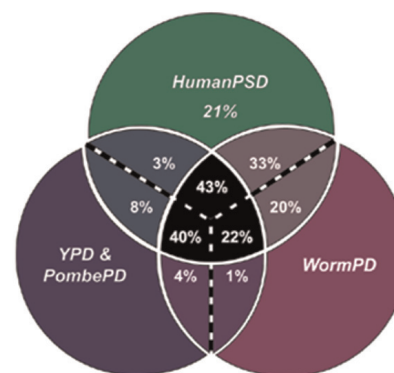

Allergen sequence databases

Steven M. Gendel and John A. Jenkins 633

Review Article

Evaluation of available IgE-binding epitope data and its utility in bioinformatics

Gary A. Bannon and Tadashi Ogawa 638

Review Article

Allergen-specific IgE testing in the diagnosis of food allergy and the event of a positive match in the bioinformatics search

Ronald van Ree, Stefan Vieths, Lars K. Poulsen ..

645

Review Article

Practical and predictive bioinformatics methods for the identification of potentially cross-reactive protein matches

Richard E. Goodman ..

655

MNF Meetings Diary ..

661

Instructions to authors ..
