Review Article

Vitamin E analogues as anticancer agents:

Lessons from studies with α -tocopheryl succinate

Xiu-Fang Wang, Lanfeng Dong, Yan Zhao, Marco Tomasetti,

Kun Wu Jiri Neuzil 675

Research Article

Metabolism of quercetin and rutin by the pig caecal microflora prepared by freeze-preservation

Katrin Keppler, Eva-Maria Hein and Hans-Ulrich Humpf 686

Research Article

Reactions of chlorogenic acid and quercetin with a soy protein isolate – Influence on the *in vivo* food protein quality in rats

Sascha Rohn, Klaus J. Petzke, Harshadrai M. Rawel,

Jürgen Kroll 696

Research Article

Determining the binding affinities of phenolic compounds to proteins by quenching of the intrinsic tryptophan fluorescence

Harshadrai M. Rawel, Simone K. Frey, Karina Meidtner, Jürgen Kroll,

Florian J. Schweigert 705

Research Article

Lipid peroxidation inhibition capacity assay for antioxidants based on liposomal membranes

Jingli Zhang, Roger A. Stanley, Laurence D. Melton 714

Research Article

Xanthine oxidase inhibitory activity of alkyl gallates

Noriyoshi Masuoka, Ken-ichi Nihei and Isao Kubo 725

Research Article

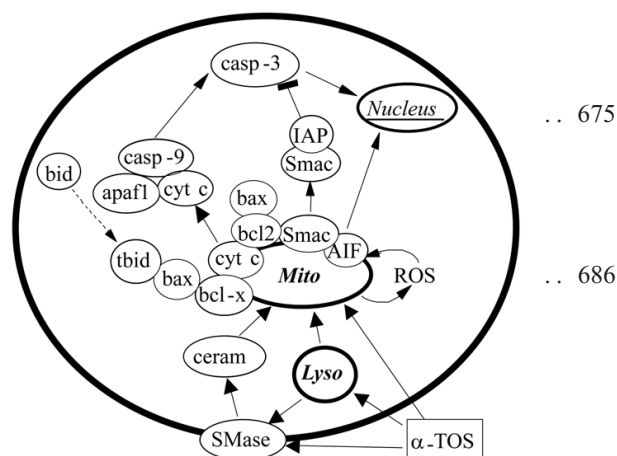

Effect of a *Siraitia grosvenori* extract containing mogrosides on the cellular immune system of type 1 diabetes mellitus mice

Qi Xiangyang, Chen Weijun, Liu Liegang, Yao Ping, Xie Bijun 732

Research Article

Cinnamon water extracts increase glucose uptake but inhibit adiponectin secretion in 3T3-L1 adipose cells

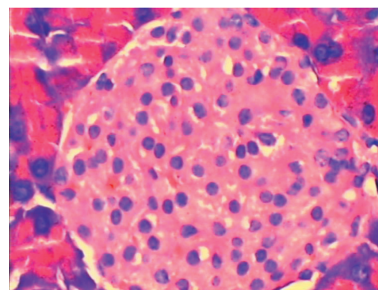

Benjamin Roffey, Avtar Atwal and Stan Kubow 739

Research Article**Pectin isolated from white cabbage – structure and complement-fixing activity**

Bjørge Westereng, Osman Yousif, Terje E. Michaelsen, Svein Halvor Knutsen, Anne Berit Samuelsen

. . . . 746

**Research Article****Relationship between acrylamide and thermal-processing indexes in commercial breakfast cereals: A survey of Spanish breakfast cereals**

José A. Rufián-Henares, Cristina Delgado-Andrade, Francisco J. Morales 756

**Research Article****Kinetic modeling of lutein production by heterotrophic *Chlorella* at various pH and temperatures**

Xianming Shi, Zhengyun Wu and Feng Chen 763

Research Article**G1793A polymorphisms in the methylene-tetrahydrofolate gene: Effect of folic acid on homocysteine levels**

Sandra Soares Melo, Darlene Camati Persuhn, Mônica S. Meirelles, Alceu Afonso Jordao, Helio Vannucchi 769

MNF Meetings Diary 777
